## **Right To Life:**

*Euthanasia, Abortion, Death Penalty and Religion - The Right to Life and its Limitations* Hans-Georg Ziebertz, Francesco Zaccaria, 2018-11-16 This book considers how the termination of life might be accepted in the view of a general obligation to protect life. It features more than 10 papers written by scholars from 14 countries that offer international comparative empirical research. Inside readers will find case studies from such areas as India, Chile, Germany, Italy, England, Palestine, Lithuania, Nigeria, and Poland. The papers focus on three limitations of the right to life: the death penalty, abortion, and euthanasia. The contributors explore how young people understand and evaluate the right to life and its limitations. The book presents unique empirical research among today's youth and reveals that among other concepts, religiosity matters. It provides insight into the acceptance, perception, and legitimation of human rights by people from different religious and cultural backgrounds. This investigation rigorously tests for inter-individual differences regarding political and judicial rights on religious grounds while controlling for other characteristics. It will help readers better understand the many facets of this fundamental yet controversial philosophical question. The volume will be of interest to students, researchers, as well as general readers searching for answers.

*Lethal Force, the Right to Life and the ECHR* Stephen Skinner, 2019-08-22 In its case law on the use of lethal and potentially lethal force, the European Court of Human Rights declares a fundamental connection between the right to life in Article 2 of the European Convention on Human Rights and democratic society. This book discusses how that connection can be understood by using narrative theory to explore Article 2 law's specificities and its deeper historical, social, and political significance. Focusing on the domestic policing and law enforcement context, the book draws on an extensive analysis of case law from 1995 to 2017. It shows how the connection with democratic society in Article 2's substantive and procedural dimensions underlines the right to life's problematic duality as an expression of a basic value demanding a high level of protection and a contextually limited provision allowing states leeway in the use of force. Emphasising the need to identify clear standards in the interpretation and application of the right to life, the book argues that Article 2 law's narrative dimensions bring to light its core purposes and values. These are to extract meaning from pain and death, ground democratic society's foundational distinction between acceptable force and unacceptable violence, and indicate democratic society's essential attributes as a restrained, responsible, and reflective system.

**Life's Dominion** Ronald Dworkin,1994-06-28

Internationally renowned lawyer and philosopher Ronald Dworkin addresses the crucially related acts of abortion and euthanasia in a brilliantly original book that examines their meaning in a nation that prizes both life and individual liberty From Roe v Wade to the legal battle over the death of Nancy Cruzan no issues have opened greater rifts in American society than those of abortion and euthanasia At the heart of Life s Dominion is Dworkin s inquest into why abortion and euthanasia provoke such controversy Do these acts violate some fundamental right to life Or are the objections against them based on the belief that human life is sacred Combining incisive moral reasoning and close readings of individual court decisions with a majestic interpretation of the U S Constitution itself Dworkin gives us a work that is absolutely essential for anyone who cares about the legal status of human life

*The Right to Life and Conflicting Interests* Elizabeth Wicks,2010 The right to life is a core human right which has not yet received the detailed legal analysis that it requires This book provides detailed critical analysis of the controversial human right to life and in particular assesses the weight of conflicting interests which could and or should serve to override the right This contemporary study of the right to life focuses on the legal as well as ethical issues raised by the value of life in modern day society It seeks to analyse the development meaning and value of the fundamental human right to life in the context of its conflicts with other competing interests The book begins with an overview of the right to life in which the concept of life itself is first analysed before both the right and its legal protection and enforcement are subjected to historical philosophical and comparative analysis The remainder of the book identifies and assesses the merits of various competing interests These comprise armed conflict prevention of crime rights of others autonomy quality of life and finite resources The right to life is unusual in having potential application to so many of today s ethically controversial questions This new work investigates

specific topics of current political legal and ethical concern such as the right to life during international conflicts the role of lethal force in law enforcement the death penalty the right to life of a foetus in the context of legalised abortion and the significance of quality of life and autonomy issues in respect of euthanasia and assisted suicide     Abbotts' Digest of All the New York Reports, 1913-[1917] Benjamin Vaughan Abbott,1914     **Docket No. 87574** ,1999     Woodland v.
