*Handbook of Moral Development* Melanie Killen, Judith G. Smetana, Judith Smetana, 2005-07-06 The psychological study of moral development has expanded greatly both in terms of the diversity of theoretical perspectives that are represented in the field as well as in the range of topics that have been studied This Handbook of Moral Development represents the diversity and multidisciplinary influences on current theorizing about the psychological study of moral development and the range and broad scope of topics being considered by scholars in the field The Oxford Handbook of Developmental Psychology, Vol. 1

Brehl, Sonia Matwin, 2005-09-12 Documents the narrative accounts and moral evaluations that children between the ages of 5 and 16 made of incidents in which they had been the targets of their peers unfair or harmful actions and incidents in which they had been those inflicting harm on their peers P 4 of cover Connections Between Theory of Mind and Sociomoral Development Bryan W. Sokol, 2004-04-13 The heightened attention to research on theory of mind is due in large part to the shared intuition that this core aspect of development must have important consequences for and connections with children s evolving social competence This seems particularly true for the moral domain where a psychological or inward focus is often taken to be a constitutive feature of what distinguishes moral actions from other kinds of behavior Unfortunately the theory of mind enterprise has largely failed to capitalize on this fundamental connection between mental life and morality and as a result it has been effectively cut off from the study of sociomoral development Contributors to this volume illustrate different though complementary attempts to bridge the gap that exists between these research traditions Two central questions are addressed First what is the impact of children s conceptions of the mind on their moral judgments Second does children s mental state understanding influence the moral quality of their own behavior In the concluding chapters prominent scholars from both the theory of mind literature and the moral development domain comment on the efforts being made to link these research traditions and offer suggestions for future inquiry This is the 103rd volume of the Jossey Bass quarterly report

*Threatening Dystopias* Kasia Paprocki, 2021-12-15 Bangladesh is currently ranked as one of the most climate vulnerable countries in the world In *Threatening Dystopias* Kasia Paprocki investigates the politics of climate change adaptation throughout the South Asian nation Drawing on ethnographic and archival fieldwork she engages with developers policy makers scientists farmers and rural migrants to show how Bangladeshi and global elites ignore the history of landscape transformation and its attendant political conflicts Paprocki looks at how groups craft economic narratives and strategies that redistribute power and resources away from peasant communities Although these groups claim that increased production of export commodities will reframe the threat of climate change into an opportunity for economic development and growth the reality is not so simple For the country's rural poor these promises ring hollow As development dispossesses the poor from agrarian livelihoods outmigration from peasant communities leads to precarious existences in urban centers And a vision of development in which urbanization and export led growth are both desirable and inevitable is not one the land and its people can sustain *Threatening Dystopias* shows how a powerful rural movement although hampered by an all consuming climate emergency is seeking climate justice in Bangladesh
