Literary Translation and the Making of Originals Karen Emmerich, 2017-09-21 Literary Translation and the Making of Originals engages such issues as the politics and ethics of translation how aesthetic categories and market forces contribute to the establishment and promotion of particular originals and the role translation plays in the formation re formation and deformation of national and international literary canons By challenging the assumption that stable originals even exist Karen Emmerich also calls into question the tropes of ideal equivalence and unavoidable loss that contribute to the low status of translation translations and translators in the current literary and academic marketplaces

Translation and Interpreting in the 20th Century Wolfram Wilss, 1999-02-15 This book provides a historical survey of the unfolding of translation and interpreting language mediation in the 20th century with special reference to the German speaking area It is based first on extensive archive research in Austria Germany and Switzerland second on a large number of interviews with experts in the field of language mediation and third on the author's observations and experiences in the field of translation practice translation teaching and translation studies between 1950 1995 A specific feature of the book is the description of the social role of the language mediator through the prisms of communicative targets and technological developments and to determine his function as that of an indispensable bridge builder between the members of differing linguistic and cultural communities Historically it distinguishes between three main phases the period from 1900 to 1919 with the dominance of French as lingua franca in international communication the period from 1919 to 1945 which is characterized by English French bilingualism and the period from 1945 to approximately 1990 with its massive trend toward multilingualism and the development of language mediation into a translation industry The book continues with chapters on the implications of globalization specialization and automaticization for international communication and it closes with reflections on future prospects for the profession in a knowledge society both from a practical and a pedagogical viewpoint

Untranslatability Duncan Large, Motoko Akashi, Wanda Józwickowska, Emily Rose, 2018-07-27 This volume is the first of its kind to explore the notion of untranslatability from a wide variety of interdisciplinary perspectives and its implications within the broader context of translation studies Featuring contributions from both leading authorities and emerging scholars in the field the book looks to go beyond traditional comparisons of target texts and their sources to more rigorously investigate the myriad ways in which the term untranslatability is both conceptualized and applied The first half of the volume focuses on untranslatability as a theoretical or philosophical construct both to ground and extend the term's conceptual remit while the second half is composed of case studies in which the term is applied and contextualized in a diverse set of literary text types and genres including poetry philosophical works song lyrics memoir and scripture A final chapter examines untranslatability in the real world and the challenges it brings in practical contexts Extending the conversation in this burgeoning contemporary debate this volume is key reading for graduate students and researchers in translation studies comparative literature gender studies and philosophy of language The editors are grateful to the University of East Anglia Faculty of Arts and Humanities who supported the book with a publication grant

The Didactics of Audiovisual Translation Jorge Díaz-Cintas, 2008 While complementing other volumes in the BTL series in its exploration of the state of the art of translator training this collection of essays is solely focused on audiovisual translation one of the most complex and dynamic areas of the translation discipline

The book offers an easily accessible yet comprehensive introduction to the fascinating subject of translating films video games and other audiovisual material Offering a balance between theory and practice the main aim of this volume is to provide a wealth of teaching and learning ideas in areas such as subtitling dubbing and voice over without forgetting the newer fields of subtitling for the deaf and audio description for the blind The Didactics of Audiovisual Translation comes with an accompanying CD Rom highlighting its fundamentally interactive approach and the activities proposed can be adapted to different learning environments and used with different language combinations *Multiple Voices in the Translation Classroom*

Maria González Davies, 2004-07-15 The main aim of this book is to provide teaching ideas that can be adapted to different learning environments and that can be used with different language combinations The pedagogical approach and the activities tasks and projects are based on Communicative Humanistic and Socioconstructivist principles the students are actively involved in their learning process by making decisions and interacting with each other in a classroom setting that is a discussion forum and hands on workshop Clear aims are specified for the activities which move from the most rudimentary level of the word to the more complicated issues of syntax and finally to those of cultural difference Moreover they attempt to synthesize various translation theories not only those based on linguistics but those derived from cultural studies as well This volume will be of interest to translation teachers to foreign language teachers who wish to include translation in their classes to graduates and professional translators interested in becoming teachers and also to administrators exploring the possibility of starting a new translation programme **Claims, Changes and Challenges in Translation Studies**

Ghelly V. Chernov, 2004-12-23 Until now Ghelly Chernov's work on the theory of simultaneous interpretation SI was mostly accessible only to a Russian speaking readership Finally Chernov's major work originally published in Russia in 1987 under the title Introduction to Simultaneous Interpretation and widely considered a classic in interpretation theory is now available in English as well Adopting a psycholinguistic approach to professional SI Chernov defines it as a task performed in a single

pass concurrently with the source language speech under extreme perception and production conditions in which only a limited amount of information can be processed at any given time Being both a researcher and a practitioner Chernov drew from a rich interpreting corpus to create the first comprehensive model of simultaneous interpretation His model draws on semantics pragmatics Russian Activity Theory and the SI communicative situation to formulate the principles of objective and subjective redundancy and identify probability prediction as the enabling mechanism of SI Edited with notes and a critical foreword by two active SI researchers Robin Setton and Adelina Hild this book will be useful to practicing interpreters in providing a theoretical basis for appreciating the syntactic and other devices that can be used by both students and experienced interpreters in fine tuning their performance in the booth

Training for the New Millennium Martha Tennent, 2005-02-28 Originating at an international forum held at the University of Vic Spain the twelve essays collected here attest to important changes in translation practice and the assumptions which underpin them Leading theorists respond to the state of Translation Studies today particularly the epistemological dilemma between theories that are empirically oriented and those that are inspired by developments in Cultural Studies But the volume is also practical Experienced instructors survey existing pedagogies at translator interpreter training programs and explore new techniques that address the technological and global challenges of the new millennium Among the topics considered are how to use translation technology in the classroom how to construct a syllabus for a course in audiovisual translating or in translation theory and how to develop guidelines for a program for community interpreters or conference interpreters The contributors all assume that translation whether written or oral does not occupy a neutral space It is a cross cultural exchange that produces far reaching social effects Their essays significantly advance the theoretical and practical understanding of translation along these lines

The Discourse of Court Interpreting Sandra Beatriz Hale, 2004-01-01 This book explores the intricacies of court interpreting through a thorough analysis of the authentic discourse of the English speaking participants the Spanish speaking witnesses and the interpreters Written by a practitioner educator and researcher the book presents the reader with real issues that most court interpreters face during their work and shows through the results of careful research studies that interpreter s choices can have varying degrees of influence on the triadic exchange It aims to raise the practitioners awareness of the significance of their choices and attempts to provide a theoretical basis for interpreters to make informed decisions rather than intuitive ones It also suggests solutions for common problems The book highlights the complexities of court interpreting and argues for thorough training for practicing interpreters to improve their performance as well as for better understanding of their task from the legal profession Although the data is drawn from Spanish English cases the main results can be extended to any language combination The book is written in a clear accessible language and is aimed at practicing interpreters students and educators of interpreting linguists and legal professionals

Corpus Use and Translating Allison Beeby, Patricia Rodríguez Inés, Pilar Sánchez-Gijón, 2009-03-11 Professional translators are increasingly

dependent on electronic resources and trainee translators need to develop skills that allow them to make the best use of these resources The aim of this book is to show how CULT Corpus Use for Learning to Translate methodologies can be used to prepare learning materials and how novice translators can become autonomous users of corpora Readers interested in translation studies translator training and corpus linguistics will find the book particularly useful Not only does it include practical technical advice for using and learning to use corpora but it also addresses important issues such as the balance between training and education and how CULT methodologies reinforce student autonomy and responsibility Not only is this a good introduction to CULT but it also incorporates the latest developments in this field showing the advantages of using these methodologies in competence based learning

The Translator's Visibility Heather Cleary, 2020-12-10 At the intersection of translation studies and Latin American literary studies The Translator's Visibility examines contemporary novels by a cohort of writers including prominent figures such as Cristina Rivera Garza César Aira Mario Bellatin Valeria Luiselli and Luis Fernando Verissimo who foreground translation in their narratives Drawing on Latin America's long tradition of critical and creative engagement of translation these novels explicitly visibly use major tropes of translation theory such as gendered and spatialized metaphors for the practice and the concept of untranslatability to challenge the strictures of intellectual property and propriety while shifting asymmetries of discursive authority above all between the original as a privileged repository of meaning and translation as its hollow emulation In this way The Translator's Visibility show that translation not only serves to renew national literatures through an exchange of ideas and forms when rendered visible it can help us reimagine the terms according to which those exchanges take place Ultimately it is a book about language and power not only the ways in which power wields language but also the ways in which language can be used to unseat power

Self-Preservation in Simultaneous Interpreting Claudia Monacelli, 2009-05-20 The image of the tightrope walker illustrates the interpreter's balancing act Compelled to move forward at a pace set by someone else interpreters compensate for pressures and surges that might push them into the void The author starts from the observation that conference interpreters tend to see survival as being their primary objective It is interpreters awareness of the essentially face threatening nature of the profession that naturally induces them to seek what the author calls dynamic equilibrium a constantly evolving state in which problems are resolved in the interests of maintaining the integrity of the system as a whole By taking as a starting point the more visible interventions interpreters make comments on speed of delivery on exchanges between the chair and the floor the author is able to explore the interpreter's instinct for self preservation in an inherently unstable environment This volume is an insightful and refreshing account of interpreters behavior from the other side of the glass fronted booth

Less Translated Languages Albert Branchadell, Lovell Margaret West, 2005 This is the first collection of articles devoted entirely to less translated languages a term that brings together well

known widely used languages such as Arabic or Chinese and long neglected minority languages with power as the key word at play It starts with some views on English the dominant language in Translation as elsewhere considers the role of translation for minority languages both a source of inequality and a means to overcome it takes a look at translation from less translated major languages and cultures and ends up with a closer look at translation into Catalan a paradigmatic case of less translated language in a final section that includes a vindication of six prominent Catalan translators Combining sound theoretical insight and accurate analysis of relevant case studies the contributors to this collection make a convincing case for a more thorough examination of less translated languages within the field of Translation Studies

Voices of the Invisible Presence Kumiko Torikai, 2009-01-14 *Voices of the Invisible Presence* Diplomatic interpreters in post World War II Japan examines the role and the making of interpreters in the social political and economic context of postwar Japan using oral history as a method The primary questions addressed are what kind of people became interpreters in post WWII Japan how they perceived their role as interpreters and what kind of role they actually played in foreign relations In search of answers to these questions the living memories of five prominent interpreters were collected in the form of life story interviews which were then categorized based on Pierre Bourdieu s concept of habitus field and practice The experiences of pioneering simultaneous interpreters are analyzed as case studies drawing on Erving Goffman s participation framework and the notion of kurogo in Kabuki theatre leading to the discussion of in visibility of interpreters and their perception of language culture and communication

Revisiting the Interpreter's Role Claudia V. Angelelli, 2004-09-23 Through the development of a valid and reliable instrument this book sets out to study the role that interpreters play in the various settings where they work i e the courts the hospitals business meetings international conferences and schools It presents interpreters perceptions and beliefs about their work as well as statements of their behaviors about their practice For the first time the administration and results of a survey administered across languages in Canada Mexico and the United States offer the reader a glimpse of the interpreters views in their own words It also discusses the tension between professional ideology and the reality of interpreters at work This book has implications for the theory and practice of interpreting across settings
