the century This happened not just in the developed world but also inside sectors that were demarcated as organized and modern within developing countries like India In these sectors unlike the greater part of the Indian economy insecure jobs were uncommon before winds of change made them normal This shift had occurred before the great global financial crisis of 2008 Between 2005-8 a survey based on over thousand structured interviews with workers in offices factories shops and establishments below the supervisory rank in Mumbai was undertaken This is the innovative segment of the book which tries to measure and quantify some of these changes and their associations It is designed to investigate the central proposition of the Insecurity Hypothesis IH which is that the economic risk of increased and global competition was being progressively passed on from the employer to the employee This was happening through shortened job tenure erratic remuneration variable work contingent employment and institutional changes that remove or reduce protection bargaining power of employees in the work place everywhere The corollary is that widespread and unremitting work and income related insecurity is an expedient competitive strategy but a damaging socio economic phenomenon Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka

urban experiences of dissent and emergent resistance against disjunctive global and local capital technology and labour flows that converge and intersect in some of Asia's fastest growing cities. Rather than constructing occupants of the city as simply passive victims of globalisation or urbanisation, it presents ways in which people are using everyday strategies embedded in cultural practice to challenge dominant socio-economic and political forces impacting on urban space. Taking the city as a site of contestation and a stage where social conflicts are played out, the book highlights the connections between urban power and dissent, the nature and impact of resistance, how the spatiality and built environment of the city generates conflict, and conversely how protagonists use the cityscape to stage their everyday and public dissent. The contributors explore the conditions, strategies and outcomes of such dissent and forms of cultural resistance, and explore the following themes: the impact of urban development, gentrification and ghettoisation; urban counter-narratives and the re-imagining of city spaces; the role of grassroots activism and social movements; cultural resistance in the creation of neighbourhoods and communities; the impact of gender, class and the politics of identity on forms of dissent; the formation of transgressive spaces.

Globalization in the Asian Region Gloria Davies, Chris Nyland, 2004-04-28

For anyone seeking a diverse range of perspectives on globalisation in the Asia Pacific region, this collection of highly readable essays is a good place to start. Focusing on individual countries, the chapters examine the specific modalities of global integration and the responses of different sections of society in each country. The authors address questions of major importance for democratic societies, such as the connection between globalisation and the rise of religious extremism, whether globalisation is in reality a new form of imperial preference, who the winners and losers are. These are complemented by three short case studies dealing with Indonesia's unrealised potential, foreign investment in China, and patterns in the movement of people between Hong Kong and the mainland. The essays provide a rich source of thought-provoking analysis of the complex cultural and political responses arising from both opportunities provided by globalisation and its more negative impacts.

Melanie Beresford, Macquarie University, Australia

Globalization in the Asian Region draws confident, ragged lines across disciplines, themes and the conventional boundaries of scholarship. The range of material in the anthology is astounding. The diversity and admixture of political positions and approaches is confronting. Contemporary Asia is thus mapped without overgeneralizing a homogenous whole.

Paul James, RMIT University, Australia

This collection of thoughtful essays provides a reliable picture of the dynamic and often ironic operation of globalization in Asia today, and challenges individuals to believe that, as communities, we have a choice in how we respond and contribute to globalization. The editors highlight the multifaceted nature of globalization and bring to the fore its supraterritoriality. A dozen detailed studies make good on these claims, from analyses of American militancy since 9/11, terrorism and poverty, to case studies on Malaysia, Indonesia, India, Australia, New Zealand, Japan and China. These essays make clear the interactive nature of globalization, as various economic, cultural and political forces pour into Asian societies, while the impact of their responses, from exports to currency,

fluctuations to migration flows to transnational religious movements in turn reshape the selfsame globalization process Timothy Cheek University of British Columbia Canada Bringing together contributors from both the university sector and business centered research institutions this comprehensive volume offers diverse perspectives on the impacts and consequences of globalization in different parts of the Asian region Each chapter offers a substantial account of globalization within a particular nation state or area in the region Different understandings underpin the chapters Some contributors perceive globalization as progress in the form of economically driven processes that have made nations mutually dependent in unprecedented and complex ways Others emphasize the uneven outcomes of globalization as well as the stakes for economic growth and social order in the global climate of deepening political and religious divisions since September 2001 General and specialist readers alike will gain an appreciation of the myriad emphases placed on globalization within different nations and from various vantage points The book showcases diverse styles of discourse and serves to greatly broaden the scope of what can be discussed under the rubric of globalization within a single volume

The Emerging Asian City Vinayak Bharne, 2013 Asian cities create concomitant imagery polarizations of poverty and wealth blurry lines between formality and informality and stark juxtapositions of ancient historic places with shimmering new skylines With Asia's re emergence on the global stage there is an acute focus on its multifarious urban issues and identities What are Asian cities going to become Will they surpass the economic and environmental debacles of the West This collection of twenty four essays surveys the most dominant issues shaping the Asian urban landscape today It offers scholarly reflections and positions on the forces shaping Asian cities and the forces that they in turn are shaping

Megacity Slums Marie-Caroline Saglio-Yatzimirsky, 2013 This book looks at slums and social exclusion in the four major megacities of India and Brazil and analyzes the interrelationships between urban policies and housing and environmental issues The challenges posed in Delhi Mumbai Rio de Janeiro and Sao Paulo have spurred public reformers into action through housing rehabilitation and conservation programs Civil society and the inhabitants of these cities have also begun to get involved On the other hand one must wonder whether these challenges were partly created by the deficiencies of these very reformers and civil society be it their lack of intervention as advocates of government intervention would argue or the flaws and inadequacies of their actions as supporters of the free market would suggest Are policies alleviating or aggravating social exclusion This book explores these questions and more

The Making of an Indian Metropolis Prashant Kidambi, 2016-12-05 This book explores the social history of colonial Bombay in the late Victorian and Edwardian eras a pivotal time in its emergence as a modern metropolis Drawing together strands that hitherto have been treated in a piecemeal fashion and based on a variety of archival sources the book offers a systematic analytical account of historical change in a premier colonial city In particular it considers the ways in which the turbulent changes unleashed by European modernity were negotiated appropriated or resisted by the colonised in one of the major cities of the Indian Ocean region A series of crises in the 1890s triggered far reaching changes in the relationship between state and society in Bombay The city's colonial rulers responded to the upheavals of this decade by adopting a more interventionist approach to urban governance The book shows how these new strategies and mechanisms of rule ensnared colonial authorities in contradictions that they were unable to resolve easily and rendered their relationship with local society increasingly fractious The study also explores important developments within an emergent Indian civil society It charts the density and diversity of the city's expanding associational culture and shows how educated Indians embraced a new ethic of social service that sought to improve and uplift the urban poor In conclusion the book reflects on

the historical legacy of these developments for urban society and politics in postcolonial Bombay This wide ranging work will be essential reading for specialists in British imperial history postcolonial studies and urban social history It will also be of interest to all those concerned with the comparative history of governance and public culture in the modern city
