Risk Environment And Society Ongoing Debates Current Issues And Future Prospects:

Risk, Environment, and Society Piet Strydom, 2002 How and why have the closed expert debates of past decades become an open public discourse about nuclear environmental and biotechnological risks What can a cultural and institutional analysis reveal about risks and their social construction Is it possible to develop a new critical theory of the risk society This book offers an overview and analysis of nuclear global environmental and biotechnological dangers threats and hazards in the context of public debates about risk from the 1950s to the present It considers what impact these risks and debates are having on society transforming underlying cultural assumptions for example about nature but also public communication social institutions and even the way society is organized Piet Strydom reconstructs public debates and social scientific theories to provide a fresh approach to the risk society From this comes a new theoretical perspective for studying the emerging social conditions of the twenty first century The result is a penetrating and essential text for students and researchers across a range of areas including sociology environmental studies politics and cultural and communications studies

Risk and Hyperconnectivity Andrew Hoskins, John Tulloch, 2016-05-02 Risk and Hyperconnectivity brings together for the first time three paradigms new risk theory neoliberalization theory and connectivity theory to illuminate how the kaleidoscope of risk events in the opening years of the new century has recharged a neoliberal battlespace of media economy and security Hoskins and Tulloch argue that hyperconnectivity is both a conduit of risk and a form of risk in itself and that it alters the ways in which we experience events and remember them Through interdisciplinary dialogue and case study analysis they offer original perspectives on the key questions of risk of our age including What is the path to a balance between individual privacy and state or corporate security Is hyperconnectivity itself a new risk condition of our time How do remembering and forgetting shape citizen insecurity and cultures of risk and legitimize neoliberal governance How do journalists operate as public intellectuals of risk Through probing a series of risk events that have already scarred the twenty first century Hoskins and Tulloch show how both established and emergent media are central in shaping past present and future horizons of neoliberalism while also propelling wide pressure for its alternatives on those ranging from economics students worldwide to potential political leaders cultivated by austerity policies

Education and the Risk Society Steven Bialostok, Robert Whitman, William Bradley, 2012-12-23 Sociological and anthropological literature has examined how contemporary western society has become a risk society Education and the Risk Society is the first volume to explore this seminal concept through the lens of education Drawing on a theoretical literature that has great potential as a lens to view changes in neoliberal discourses of global capitalism from both critical and generative perspectives Education and the Risk Society presents situated empirical studies investigating an uncertain world as people practice it on the ground through language and activity within educational settings

Risk in The New York Times (1987-2014) Jens O. Zinn, Daniel McDonald, 2017-11-09 This book investigates to what extent claims of common social science risk theories such as risk

society governmentality risk and culture risk colonisation and culture of fear are reflected in linguistic changes in print news media The authors provide a corpus based investigation of risk words in The New York Times 1987 2014 and a case study of the health domain The book presents results from an interdisciplinary enterprise which combines sociological risk theories with a systematic functional theory of language to conduct an empirical analysis of linguistic patterns and social change It will be of interest to students and scholars interested in corpus linguistics and digital humanities and social scientists looking for new research strategies to examine long term social change Social Theories of Risk and Uncertainty Jens O. Zinn, 2009-01-22 Written by leading experts in the field Social Theories of Risk and Uncertainty is an introduction to mainstream theorizing on risk and uncertainty in sociology Provides an overview of the historical developments and conceptual aspects of risk Identifies why theorizing on risk is necessary and highlights specific sociological contributions to this field of research Explores key topics including risk society and reflexive modernization culture and risk governmentality and risk systems theory and risk and edgework and voluntary risk taking Offers a comprehensive look at the promises pitfalls and perspectives of risk theorizing *Nature, Environment and Society* Philip Sutton, 2017-03-14 How have sociologists responded to the emergence of environmentalism What has sociology to offer the study of environmental problems This uniquely comprehensive guide traces the origins and development of environmental movements and environmental issues providing a critical review of the most significant debates in the new field of environmental sociology It covers environmental ideas environmental movements social constructionism critical realism ecocentric theory environmental identities risk society theory sustainable development Green consumerism ecological modernization and debates around modernity and post modernity Philip Sutton adopts a long term view which focuses on the relationship between ideas of nature and environment ecological identities and social change providing a framework for future research Bringing environmental issues into contact with sociological theories *Nature Environment and Society* provides an up to date introduction to this important new field It will be essential reading for all students of sociology environmental studies and anyone interested in understanding environmental problems World at Risk Ulrich Beck, 2013-10-29 Twenty years ago Ulrich Beck published *Risk Society* a book that called our attention to the dangers of environmental catastrophes and changed the way we think about contemporary societies During the last two decades the dangers highlighted by Beck have taken on new forms and assumed ever greater significance Terrorism has shifted to a global arena financial crises have produced worldwide consequences that are difficult to control and politicians have been forced to accept that climate change is not idle speculation In short we have come to see that today we live in a world at risk A new feature of our world risk society is that risk is produced for political gain This political use of risk means that fear creeps into modern life A need for security encroaches on our liberty and our view of equality However Beck is anything but an alarmist and believes that the anticipation of catastrophe can fundamentally change global politics We have the opportunity today to reconfigure power in

terms of what Beck calls a cosmopolitan material politics World at Risk is a timely and far reaching analysis of the structural dynamics of the modern world the global nature of risk and the future of global politics by one of the most original and exciting social thinkers writing today **New Medicalism and the Mental Health Act** John Fanning,2018-08-09 Ten years have passed since the Mental Health Act MHA 2007 came into force in England An amending statute the Act reformed the MHA 1983 and reshaped the law governing the compulsory care and treatment of people suffering from mental disorders Primarily driven by concerns about risk it sought to remove legalistic obstacles to civil commitment and extend the law s coercive reach into the community At the time of its introduction the 2007 Act was written off as a retrograde step and a missed opportunity for radical rights focused reform Despite this little attention has been paid to its impact in the years since Published to coincide with the tenth anniversary of the 2007 Act this book offers a timely evaluation of mental health law and policy in England It argues that the current MHA defies easy categorisation within any of the descriptive models which have customarily narrated the mechanics of civil commitment namely legalism new legalism and medicalism It therefore makes the case for a new model new medicalism to account for the 2007 Act s enhancement of the discretion of mental health professionals for the express purposes of facilitating the management of situations of risk In doing so the book critically examines the problems inherent in civil commitment frameworks organised around the concept of risk explores the theoretical foundations of new medicalism considers the challenges facing proponents of future reform in the era of the UN Convention on the Rights of Persons with Disabilities and reflects on the 2007 Act s practical impact **The Environment** Philip W. Sutton,2013-04-29 How are human societies changing the global environment Is sustainable development really possible Can environmental risks be avoided Is our experience of nature changing This book shows how questions about the environment cannot be properly answered without taking a sociological approach It provides a comprehensive guide to the ways in which sociologists have responded to the challenge of environmental issues as diverse as global warming ozone depletion biodiversity loss and marine pollution It also covers sociological ideas such as risk interpretations of nature environmental realism ecological modernization and globalization Environmentalism and green politics are also introduced Unlike many other texts in the field the book takes a long term view locating environmental dilemmas within the context of social development and globalization The Environment A Sociological Introduction is unique in presenting environmental issues at an introductory level that assumes no specialist knowledge on the part of readers The book is written in a remarkably clear and accessible style and uses a rich range of empirical examples from across the globe to illustrate key debates A carefully assembled glossary and annotated further reading suggestions also help to bring ideas to life The book will be a valuable resource for students in a range of disciplines including sociology geography and the environmental sciences but also for anyone who wants to get to grips with contemporary environmental debates **Environmental Values in a Globalizing World** Ian Lowe,Jouni Paavola,2004-08-02 This multidisciplinary volume presents a refreshing new

approach to environmental values in the global age it investigates the challenges that globalization poses to traditional environmental values in general as well as in politics and international governance Divided into five parts the book investigates how environmental values could be reconceived in a globalizing world Part I explores contemporary environmental values and their implications for a globalizing world Part II examines the development of Western and Eastern environmental values Part III discusses contemporary environmental politics Part IV examines how values inform environmental governance and how governance solutions influence which values are realised Part V concludes the volume with two different views of the prospects of environmental values in a globalising world This study will be of great interest to students and researchers studying the environment in philosophy political science international relations international environment law environmental studies and development studies

Development in Coastal Zones and Disaster Management Amita Singh, R. Lalitha S. Fernando, Nivedita P. Haran, 2020-10-13 In the last two decades coastal regions have relatively endured some of the fiercest oceanic and geophysical disasters than the earlier decades Yet disaster management governance fails to match the human nonhuman and environmental calamity which is unfolding in its most frequent and unpredictable pattern Between the Asian Tsunami of 2004 to the devastating Chennai and Kerala floods of 2018 the socio industrial livelihood impact alerts governments towards a greater and more serious compliance to laws for coastal conservation The United Nations Office for Disaster Risk Reduction UNDRR in 2018 had shocking statistics to share as the deaths and damages related to only Tsunami disaster at the coasts to 251 770 and US 280 billions respectively in the last 20 years 1998 2017 as compared to 998 and US 2.7 billion in the previous 20 years 1978 1997 Coastal conservation is no more a question of casual governance but has become a need for survival The region of South Asia which ranks much higher in its vulnerability weak resilience and relatively undersupplied governance structures ought to take this responsibility on a priority The spirit of Hyogo Declaration and the Sendai Framework for Action suggests preparedness and resilience building as key approach areas in coastal governance The book is incomparable in its holistic and transdisciplinary social science based approach to disaster management which links conservation of marine flora and fauna ecosystems and land management with decision making processes and coastal regulations These grass root findings from the subcontinent are substantiated by a section on the most powerful court battle on the Kerala Floods as a guideline for readers to discerningly identify an Act of God often used as a veil to hide lack of preparedness apathy and political greed This book becomes indispensable reading for anyone involved in research administration or any level of decision making for the mitigation and

prevention of disasters *Routledge International Handbook of Contemporary Social and Political Theory* Gerard Delanty, Stephen P. Turner, 2011-03-23 The Handbook will address a range of issues that have emerged out of recent social and political theory It will focus on key themes as opposed to schools of thought or major theorists Each chapter is an emerging cutting edge topic that is of interest both to social theory and to political theory Most topics will have a clear and substantive focus on social or political problems **A Time of Disastrous Anticipations** Reidar Staupe, Monika Gabriela Bartoszewicz, 2025-06-11 This book explores the pervasive anticipation of catastrophe in contemporary society examining how temporal expectations shape personal and collective experiences and influence our perspectives and responses A Time of Disastrous Anticipations highlights the role of anticipation in shaping societal narratives exploring strategies for redefining responses to catastrophic imaginaries Through a combination of theoretical insights with practical examples it offers a comprehensive view of anticipation s impact in contemporary society The vista of disastrous anticipations reveals that catastrophe is not so much a matter out of place but primarily a matter out of time Targeted at scholars students and professionals in sociology disaster studies and public policy this book is also valuable for policymakers and practitioners interested in understanding the societal dimension of disaster anticipation **Happiness and Well-Being in Chinese Societies** Chau-kiu Cheung, Xiaodong Yue, 2021-03-23 This book addresses the sustainability of happiness and well being in Chinese societies It starts by introducing the various conceptions of well being particularly in the Chinese sociocultural context The book then proceeds with the examination of the sustainability of well being by scrutinizing the effects of sociocultural contextual and personal factors on well being The contextual factors are the aggregates or averages of personal factors at the contextual levels of the regions and colleges in Mainland China its special administrative region and Taiwan These factors cover personality traits strengths orientations beliefs values and idolizing By bringing together empirical studies and theoretical perspectives applied to Chinese societies this book offers researchers in social science and humanities a valuable reference work on happiness and well being in Chinese societies The Environmental Communication Yearbook Stephen P. Depoe, 2014-04-08 First published in 2006 Routledge is an imprint of Taylor Francis an informa company Anthropology and Risk Asa Boholm, 2015-04-24 Drawing on theory from anthropology sociology organisation studies and philosophy this book addresses how the perception communication and management of risk is shaped by culturally informed and socially embedded knowledge and experience It provides an account of how interpretations of risk in society are conditioned by knowledge claims and cultural assumptions and by the orientation of actors based on roles norms expectations identities trust and practical rationality within a lived social world By focusing on agency social complexity and the production and interpretation of meaning the book offers a comprehensive and holistic theoretical perspective on risk based on empirical case studies and ethnographic enquiry As a selection of sa Boholm s publications throughout her career along with a newly written introduction overviewing the field this book provides a unified

perspective on risk as a construct shaped by social and cultural contexts This collection should be of interest to students and scholars of risk communication risk management environmental planning environmental management and environmental and applied anthropology

Into the Extreme Valerie Olson, 2018-05-22 The first book length in depth ethnography of U S human spaceflight What if outer space is not outside the human environment but rather defines it This is the unusual starting point of Valerie Olson s Into the Extreme revealing how outer space contributes to making what counts as the scope and scale of today s natural and social environments With unprecedented access to spaceflight worksites ranging from astronaut training programs to life science labs and architecture studios Olson examines how U S experts work within the solar system as the container of life and as a vast site for new forms of technical and political environmental control Olson s book shifts our attention from space s political geography to its political ecology showing how scientists physicians and engineers across North America collaborate to build the conceptual and nuts and bolts systems that connect Earth to a specifically ecosystemic cosmos This cosmos is being redefined as a competitive space for potential economic resources social relations and political strategies Showing how contemporary U S environmental power is bound up with the production of national technical and scientific access to outer space Into the Extreme brings important new insights to our understanding of modern environmental history and politics At a time when the boundaries of global ecologies and economies extend far below and above Earth s surface Olson s new analytic frameworks help us understand how varieties of outlying spaces are known made and organized as kinds of environments whether terrestrial or beyond

Art, Culture and International Development John Clammer, 2014-11-13 Culture is not simply an explanation of last resort but is itself a rich multifaceted and contested concept and set of practices that needs to be expanded appreciated and applied

in fresh ways if it is to be both valued in itself and to be of use in practical development This innovative book places culture specifically in the form of the arts back at the centre of debates in development studies by introducing new ways of conceptualizing art in relation to development The book shows how the arts and development are related in very practical ways as means to achieve development goals through visual dramatic filmic and craft inspired ways It advocates not so much culture and development but rather for the development of culture Without a cultural content to economic and social transformation the problems found in much development up rooting of cultures loss of art forms languages and modes of expression and performance may only accelerate Paying attention to the development of the arts as the content of development helps to amend this culturally destructive process Finally the book argues for the value of the arts in attaining sustainable cultures promoting poverty alleviation encouraging self empowerment stimulating creativity and the social imagination which in turn flow back into wider processes of social transformation Discussion questions at the end of each chapter make this book ideal to help foster further thinking and debate This book is an inspiring read for postgraduate students and researchers in the fields of development studies cultural studies and sociology of development
