Ben Barr Lindsey,Wainwright Evans,1927 **Ethnic Factors in Health and Disease** J. K. Cruickshank,D. G. Beevers,2013-10-22 Ethnic Factors in Health and Disease discusses ethnicity from a medical perspective The book is comprised of 35 chapters that are grouped into four sections The text first covers the background issues concerning the relationship between ethnicity and health The next part deals with topics related to epidemiology such as the health of migrants and interethnic comparison of cardiovascular disease Next the book tackles the sociology of health this part covers occupational status housing and racism The last part discusses the specific medical aspects including pregnancy viral infections and cardiovascular disease The book will be of great use to medical researchers and practitioners Professionals dealing with ethnicity such as sociologists anthropologists and psychologists will also benefit from this book Demographic Analysis Roland Pressat,2020-10-11 Population control requires that the birth rate equal to the death rate If it is too low population will decline if it is too high population will increase If either condition persists long enough the population will diminish towards zero or increase towards infinity Fortunately the birth trajectory does not have to be set once and for all but can be adjusted within limits Since birth and death rates determine whether we are heading for population extinction or explosion they are well designated vital statistics Their understanding and use are a central theme of demographic analysis Demographic Analysis presents those techniques that are often called for in the study of demographic problems Such techniques permit researchers to fill the gap between the large amounts of data made available by censuses and the theoretical and practical questions that need to be answered the techniques of this book effectively bring the data into confrontation with the problems In his treatment of population projection Pressat applies methods developed in earlier sections for mortality and fertility The emphasis is on population projection and accords with its usefulness in demographic analysis The meaning of a demographic rate or trend is brought out by seeing to what condition it would lead if continued No

assumption is made that the concrete future will follow either path The substance of the book is devoted to the main themes of mortality and fertility Underlying these as well as nearly every other kind of data with which the demographer deals is the problem of location in time the relation of vital events to the calendar and also to the age of the persons undergoing them Pressat's detailed attention to this problem forms a solid basis for how current methodology accounts of demographic changes

Honour-Based Violence and Forced Marriages Clara Rigoni, 2022-08-12 In the last 20 years the related phenomena of honour based violence and forced marriages have received increasing attention at the international and European level Punitive responses towards this type of violence have been adopted including ad hoc criminalisation and legislation containing direct references to the concepts of honour culture and tradition However criminal law based responses present several shortcomings and have often disregarded the specific needs that victims of such crimes might encounter This book examines the possibility of using alternative programmes to address cases of honour based violence and forced marriages After reviewing previous existing literature it presents new empirical data Introducing a case study from the United Kingdom the book recalls the debate on Sharia Councils and the Muslim Arbitration Tribunal but examines instead other community based secular programmes By comparison a study from Norway on the work of the National Mediation Agency and the so called Cross Cultural Transformative Mediation model is investigated as part of a larger multi agency approach Ultimately in an attempt to reconcile pluralism and the rule of law the book proposes effective ways to tackle honour crimes based on

cooperation and individualisation of the proceedings and capable of improving women s access to justice and reducing secondary victimisation The book will be essential reading for researchers and academics in Law Criminology Sociology and Anthropology and for policy makers and practitioners working with honour based violence cases **Vital and Health Statistics** ,1989 *Basic Concepts of Probability and Statistics* J.
