Risk Uncertainty And Government:

Risk, Uncertainty and Government Pat O'Malley, 2012-09-10 Both risk and uncertainty are neo liberal concepts which can be viewed as complementary techniques for governing diverse aspects of life rather than natural states of things This new book examines the way these constructs govern the production of wealth through uncertain speculation and calculable investment formulae The way in which risk and uncertainty govern the minimisation of harms through insurance and through the uncertain practices of reasonable foresight is discussed and O Malley looks at the way these same techniques were historically forged out of moral and social beliefs about how to govern properly In addition the book analyzes is how during this process ideas such as contract and distinctions between insurance and gambling were invented to order to properly govern the risky and uncertain future

Risk, Uncertainty and Policy Patrick Brown, Anna Olofsson, 2017-10-02 Policy making has always involved uncertainty however the presence of unknowns has become far more conspicuous and problematic in recent times One important way in which policy makers have increasingly sought to deal with such uncertainty is through approaches rooted in understandings of risk This book comprises a rather diverse collection of six chapters alongside one more explicitly theoretical introduction each taking up a distinct perspective in scrutinising the relationship between policy risk and uncertainty Important concerns addressed within these different studies include how risk governance policies are shaped by risk awareness or a lack thereof and the mediating role of trust the framing of policy through an emphasis on particular risks and the corresponding impact on societal beliefs discourses and institutional power the organisational processes which lead to some risks being tackled while others are neglected and processes of de politicising uncertainty at the interface between scientists and policy makers Contributors explore trans national institutions national bodies and local government within diverse geographical contexts including China Brazil the Baltic Sea Australia the UK and Europe This book was originally published as a special issue of the Journal of Risk Research

Cosmopolitan Government in Europe Owen Parker, 2013-04-26 The invocation of the market has been omnipresent in media discussions of crisis Europe On the one hand the market is presented as that to which EU member states must collectively respond It is the very purpose of a post national government and that which dictates individual and collective identities The expansion of market is that which guarantees and constitutes peace in Europe On the other hand the market is that which government must seek to tame It is the servant of government and ought not be permitted to undermine collective

identities and solidarities associated with the juridical imaginary of social contract and sovereign nation state It is from this perspective the expansion of the social institutions of nation state into the post national arena that will constitute a lasting peace in Europe Cosmopolitan Government in Europe uses a Foucauldian lens to consider the ethics of the scholarly and institutional discourses associated with these apparently divergent market and legal cosmopolitan visions of Europe It reflects on attempts to reconcile or move beyond these discourses particularly through the invocation of more pluralist modes of governance but claims that such moves have been largely unsuccessful in both practice and theory It argues that the very ambiguity in the relationship between the ideal subjects that these market and legal visions promote respectively post national entrepreneur and citizen is that which permits a space for resistance and politics Thus the book argues for a pragmatic politics which is cognizant of the violent potential inherent in any cosmopolitan attempt to govern Europe while recognising the contemporary dangers associated with the dominance of a market cosmopolitan Europe This work is an important and timely intervention in contemporary debates about democratic Europe and its shortcomings and will be of great interest to scholars of international political theory European studies and international political economy *Electronic Government: Concepts, Methodologies, Tools, and Applications* Anttiroiko, Ari-Veikko, 2008-03-31 Provides research on e government and its implications within the global context Covers topics such as digital government electronic justice government to government information policy and cyber infrastructure research and methodologies **Why Government Fails So Often** Peter H. Critique of Security Mark Neocleous,2008-05-12 This book brings together a range of diverse discussions about security in order to sustain a genuine critique of the subject It is unique in its examination of the historical and political links between social security and national security and in its assessment of the way that emergency powers as the most intense realisation of the rhetoric of national security have been synthesised with normal law

Among other ideas and concepts Mark Neocleous discusses the place of security in the liberal tradition of political theory Building on insights from Foucault and Marx he argues that liberalism s central category is not liberty but security He also deals with the role of security in justifying the introduction and continuation of emergency powers through a historical excavation of the state of emergency a political reading of the way emergency powers are only tangentially concerned with warfare and a theoretical reading of the debate between Schmitt and Benjamin

Introduction of a New Conceptual Framework for Government Debt Management Anja

Hubig,2013-01-18 Against the background of the financial cum sovereign debt crisis government debt managers are currently faced by a challenging environment One key element in that respect is the analysis and forecast of interest rates which is important for achieving the strategic objective of low borrowing costs Anja Hubig develops a new mathematical method to estimate the term structure of interest rates that is adopted to describe the term structure dynamics within a stochastic setting The introduced model is capable to capture the complex behavior of the entire yield curve with a reduced set of parameters It essentially ensures a comprehensive analysis of the costs and risks associated with individual funding strategies and thus effectively supports the selection of a long term optimal debt portfolio composition

Government as Entrepreneur Albert N. Link,Jamie R. Link,2009-08-26 Government acts as entrepreneur when its involvement in market activities is both innovative and characterized by entrepreneurial risk Thinking of government as entrepreneur is a unique lens through which the authors of this book examine a specific subset of U S government policy actions As such their viewpoint underscores the purposeful intent of government its ability to act in new and innovative ways and its willingness to undertake policy actions that have uncertain outcomes Viewing particular policy actions through an entrepreneurial lens is

useful in two broad dimensions First it underscores the forward looking nature of policy makers as well as the need to evaluate the social outputs and outcomes of their behavior in terms of broad spillover impacts Second government acting as entrepreneur parallels in concept similar activities that occur in the private sector Government as Entrepreneur is the first broad effort to emphasize the entrepreneurial aspects of governments It is also the first systematic treatment of U S innovation policies to promote the formation of strategic research partnerships It will foster a new perspective on the role of government and how incentives for government to act entrepreneurially might be institutionalized it will serve as a vehicle for policy makers and scholars to think about the entrepreneurial actors in an economy in a new way Political and Economic Relations Between Asia and Europe Euro-Asia Management Studies Association.
