Duffuaa,Abdul Raouf,Jezdimir Knezevic,Daoud Ait-Kadi,2009-07-30 To be able to compete successfully both at national and international levels production systems and equipment must perform at levels not even thinkable a decade ago Requirements for increased product quality reduced throughput time and enhanced operating effectiveness within a rapidly changing customer demand environment continue to demand a high maintenance performance In some cases maintenance is required to increase operational effectiveness and revenues and customer satisfaction while reducing capital operating and support costs This may be the largest challenge facing production enterprises these days For this maintenance strategy is required to be aligned with the production logistics and also to keep updated with the current best practices Maintenance has become a multidisciplinary activity and one may come across situations in which maintenance is the responsibility of people whose training is not engineering This handbook aims to assist at different levels of understanding whether the manager is an engineer a production manager an experienced maintenance practitioner or a beginner Topics selected to be included in this handbook cover a wide range of issues in the area of maintenance management and engineering to cater for all those interested in maintenance whether practitioners or researchers This handbook is divided into 6 parts and contains 26 chapters covering a wide range of topics related to maintenance management and engineering Changing Times Frank Mielke,Charles Kocher,2020-03-06 Many times the police are the first to respond to an individual in crisis even those involving mentally ill While we see evidence of positive change there are still shortcomings when it comes to criminal justice response in the behavioral health system There is a lack of access availability continuity coordination and responsiveness But we see accomplishments to changes in attitudes and behaviors through such programs like Crisis Intervention Specialist Training CIT Training and Mental Health First Aid which have been well received Changing Times Transforming Culture and Behaviors for Law Enforcement proposes a shift to divert those in a behavioral health crisis away from incarceration and into treatment as well as invites Law Enforcement intervention away from the criminal justice system and into treatment The authors successfully blend the theoretical with hands on experience throughout the book enabling the reader to understand

the influences of Law Enforcement's tradition and other forces that drive attitudes culture and behavior and how to bring change The additional and difficult task ahead is to bring about systemic change in culture and a concurrent change in attitudes and behaviors Changing Times proves to be the reliable and accessible reference for those intent on bringing change to the vital effort of diversion
