Risk in The New York Times (1987-2014) Jens O. Zinn, Daniel McDonald, 2017-11-09 This book investigates to what extent claims of common social science risk theories such as risk society governmentality risk and culture risk colonisation and culture of fear are reflected in linguistic changes in print news media The authors provide a corpus based investigation of risk words in The New York Times 1987 2014 and a case study of the health domain The book presents results from an interdisciplinary enterprise which combines sociological risk theories with a systematic functional theory of language to conduct an empirical analysis of linguistic patterns and social change It will be of interest to students and scholars interested in corpus linguistics and digital humanities and social scientists looking for new research strategies to examine long term social change
