## **Risks And Wrongs:**

**Risks and Wrongs** Jules L. Coleman, 1992-11-27 Jules Coleman discusses the conflict between the goals of justice and economic efficiency in the allocation of risk especially risk pertaining to safety Causation and Responsibility Michael S. Moore, 2009 And its relation to causation Philosophers studying the metaphysics of causation **Wrongs, Harms, and Compensation** Adam Slavny, 2023-08-04 Non instrumentalist private law theory has been dominated by an interpretivist methodology that seeks to understand the concepts doctrines and structures of the law in principled terms This has resulted in the neglect of purely normative analysis and a failure to engage systematically with the methodologies of moral and political philosophy Wrongs Harms and Compensation Paying for our Mistakes departs from this approach arguing instead that the justification of tort law is dependent on our underlying moral corrective duties In this book Adam Slavny develops a pluralistic account of these duties which encompasses both wrongful and non wrongful conduct complicating the view that torts should be regarded as a coherent set of wrongs He also places the practice of enforcing corrective duties in a broader context arguing that it should not be isolated or immune to critiques based on distributive justice and that our duties are in fact consistent with institutional arrangements other than tort law including various types of compensation schemes What emerges is neither a wholesale defence of or attack on tort law but an insistence that its normative foundations are much more complex diverse and malleable than a focus on current legal practices would suggest From Morality to Law and Back Again Michelle Madden Dempsey, François Tanguay-Renaud, 2023-07-18 John Gardner was one of the most prolific widely read and influential scholars working in philosophy of law This book celebrates explores and develops themes of his work during his sixteen years as Professor of Jurisprudence at University of Oxford Written by a team of contributors whose own work has been influenced by Gardner s and with whom he has worked closely this book engages with many of the concepts themes and issues that were central to his philosophical work and outlook It expands on his arguments offers original rebuttals to some and draws connections with parallel and emerging fields that have been influenced by his work This is the first book length treatment covering the entire range of his scholarship and will serve as a handbook of sorts for those scholars seeking to engage Gardner s work and make connections across the wide range of topics on which he has written In particular the volume comprises discussions of duties to try and succeed in relation to Hume s maxim that ought implies can the role of continuity conservatism and corrective justice in private law the interrelations between wrongdoing blame punishment and the justification of criminal law justifications excuses and responsibility the distinctiveness of the wrongs of rape and discrimination as well as general jurisprudence and how it may or may not illuminate the questions of normativity and the nature of constitutions The volume also engages with further concepts and questions addressed through the prism of Gardner s work include Indigenous rights and law Equity corporate responsibility and the possibility of state crimes and the nature structure and phenomenology of virtue Together the papers collected in this volume pay homage to

the breadth of John Gardner's legal philosophy The conversations begun or continued in this volume will continue to inform the contributors' future work and thus increase the likelihood that John's body of work will have an ever greater influence on the future of legal philosophy

A Sociological Perspective* Sangeeta Chattoo, Chimaraoke Izugbara, Andrzej Klimczuk, Magdalena Klimczuk-Kochańska, Piotr Toczyski, Ashwani Kumar, Rubal Kanozia, Grzegorz Piotr Gawron, Ahmad Ozair, 2025-08-26 Building on the Millennium Development Goals the UN Sustainable Development Goals are the cornerstone of the 2030 Agenda for Sustainable Development billed by the UN as An Agenda of unprecedented scope and significance The seventeen ambitious goals which are intended to be reached by 2030 are conceived as integrated indivisible and as balancing the economic social and environmental dimensions of sustainable development They are organized around five core pillars People ending poverty and hunger and ensuring that all human beings can lead fulfilling lives in a healthy and dignified environment Planet protecting the environment while ensuring sustainable use and management of natural resources Prosperity ensuring environmentally sustainable economic growth mutual prosperity and decent work for all Peace building societies that are peaceful just and inclusive and in which human rights and gender equality are respected Partnership strengthening global solidarity to address inequalities within and between countries by focusing on the needs of the most vulnerable This Research Topic addresses third Sustainable Development Goal which is to ensure healthy lives and promote wellbeing for all at all ages Progress toward this goal is measured by a number of individual targets and indicators As highlighted in the UN s most recent SDG progress report the COVID 19 pandemic has heavily impacted progress toward this goal Prior to the pandemic there had been improvements in maternal child health immunization coverage suicide rates and reductions in the incidence of communicable diseases and mortality rates from non communicable diseases The pandemic threatens to reverse or stall much of this progress As of June 2021 the global death toll from COVID 19 stood at 3 7 million with manifold wider ramifications of the disease Ninety per cent of countries are still reporting one or more disruptions to essential health services and available data indicates that the pandemic has shortened life expectancy The

pandemic has also severely impacted mental health and increased waiting times for elective health services. At the same time it has exacerbated inequalities at the national and international levels including access to vaccines. In emerging from the pandemic and mitigating its effects the UN has placed emphasis on expanding universal health coverage and multisectoral coordination for health emergency preparedness as well as improving demographic and epidemiological data. This Research Topic will address the third Sustainable Development Goal from a sociological specific perspective. It will focus on how social stratification, geographical location and culture impact communities' health but also on groups' specific health problems, availability, understanding and reception of medications and treatment and the functioning of primary health care as a service aiming to influence and inform policymakers on the development of equal public health policies. A specific focus will be dedicated to how disparities in gaining access to health care reproduce important social inequalities in wellbeing and quality of life. Due to the COVID 19 pandemic unprecedented health economic and social challenges are threatening lives and livelihoods making the attainment of SDGs much more onerous. This call invites contributions in the form of studies, reviews and opinion articles from the experts to provide sustainable solutions to achieve SDGs. This Research Topic welcomes papers that will provide both theoretical and empirical findings. Potential issues include but are not limited to: Transformations of social determinants of health including lifestyles and environments; Health inequalities and interventions towards their reduction; Development of demographic and epidemiological data collecting and processing; Advances in the fields of health emergency preparedness and access to universal health coverage; Good health and wellbeing through access to clean and green agriculture; Improving crop productivity on limited land in the era of climate change and COVID 19 pandemic; Application of sustainable practices in agriculture and food sectors; Public health and health sector innovations during the pandemic and for the post pandemic period; Tensions between national and international health policies in response to global health challenges; Role of experts in making law and public policies related to the COVID 19 pandemic e.g. response and recovery plans, programs, strategies and funds; Innovative co design, co creation and co production schemes based on diversity of policy ideas in the environmental policy and health policy; Disruptions and challenges for integrated public policies and programs on social, environmental and health issues related to delivering social health and care services; Opportunities, criticism and ethical controversies related to digital social innovation e.g. health plant based innovation, food innovation, AI, ICT and 3D solutions, social and service robotics, smart environments, gerontechnology and welfare technology. *Managing Risk* Romney Beecher Duffey, John Walton Saull, 2008-09-15. The human element is the principle cause of incidents and accidents in all technology industries hence it is evident that an understanding of the interaction between humans and technology is crucial to the effective management of risk. Despite this no tested model that explicitly and quantitatively includes the human element in risk prediction is currently available. *Managing Risk: The Human Element* combines descriptive and explanatory text with theoretical and mathematical analysis offering important new concepts that can be used to improve the

management of risk trend analysis and prediction and hence affect the accident rate in technological industries It uses examples of major accidents to identify common causal factors or echoes and argues that the use of specific experience parameters for each particular industry is vital to achieving a minimum error rate as defined by mathematical prediction New ideas for the perception calculation and prediction of risk are introduced and safety management is covered in depth including for rare events and unknown outcomes Discusses applications to multiple industries including nuclear aviation medical shipping chemical industrial railway offshore oil and gas Shows consistency between learning for large systems and technologies with the psychological models of learning from error correction at the personal level Offers the expertise of key leading industry figures involved in safety work in the civil aviation and nuclear engineering industries Incorporates numerous fascinating case studies of key technological accidents Managing Risk the Human Element is an essential read for professional safety experts human reliability experts and engineers in all technological industries as well as risk analysts corporate managers and statistical analysts It is also of interest to professors researchers and postgraduate students of reliability and safety engineering and to experts in human performance congratulations on what appears to be at a high level of review a significant contribution to the literature I have found much to be admired in your research Mr Joseph Fragola Vice President of Valador Inc The book is not only technically informative but also attractive to all concerned readers and easy to be comprehended at various level of educational background It is truly an excellent book ever written for the safety risk managers and analysis professionals in the engineering community especially in the high reliability organizations Dr Feng Hsu Head of Risk Assessment and Management NASA Goddard Space Flight Center I admire your courage in confronting your theoretical ideas with such diverse ecologically valid data and your success in capturing a major trend in them I should add that I find all this quite inspiring The idea that you need to find the right measure of accumulated experience and not just routinely used calendar time makes so much sense that it comes as a shock to realize that this is a new idea Professor Stellan Ohlsson Professor of Psychology University of Illinois at Chicago      *Counterparty Credit Risk* Jon Gregory, 2011-09-07 The first decade of the 21st Century has been disastrous for financial institutions derivatives and risk management Counterparty credit risk has become the key element of financial risk management highlighted by the bankruptcy of the investment bank Lehman Brothers and failure of other high profile institutions such as Bear Sterns AIG Fannie Mae and Freddie Mac The sudden realisation of extensive counterparty risks has severely compromised the health of global financial markets Counterparty risk is now a key problem for all financial institutions This book explains the emergence of counterparty risk during the recent credit crisis The quantification of firm wide credit exposure for trading desks and businesses is discussed alongside risk mitigation methods such as netting and collateral management margining Banks and other financial institutions have been recently developing their capabilities for pricing counterparty risk and these elements are considered in detail via a characterisation of credit value adjustment CVA The implications of an institution

valuing their own default via debt value adjustment DVA are also considered at length Hedging aspects together with the associated instruments such as credit defaults swaps CDSs and contingent CDS CCDS are described in full A key feature of the credit crisis has been the realisation of wrong way risks illustrated by the failure of monoline insurance companies Wrong way counterparty risks are addressed in detail in relation to interest rate foreign exchange commodity and in particular credit derivative products Portfolio counterparty risk is covered together with the regulatory aspects as defined by the Basel II capital requirements The management of counterparty risk within an institution is also discussed in detail Finally the design and benefits of central clearing a recent development to attempt to control the rapid growth of counterparty risk is considered This book is unique in being practically focused but also covering the more technical aspects It is an invaluable complete reference guide for any market practitioner with any responsibility or interest within the area of counterparty credit risk
