Risky Business Science Government And Global Markets:

Risky Business G. Bruce Doern, Edward James Reed, 2000-01-01 The essays in this volume ask what risks Canadians might be exposed to as fiscal pressures strain the capacity of regulators in areas such as food drugs pesticides fisheries and the environment *Political Science Abstracts* ,2012-12-06 Political Science Abstracts is an annual supplement to the Political Science Government and Public Policy Series of The Universal Reference System which was first published in 1967 All back issues are still available **Rationality in Public Policy** Douglas G. Hartle, Canadian Tax Foundation, 1999 *The Politics of Green Transformations* Ian Scoones, Melissa Leach, Peter Newell, 2015-01-09 Multiple green transformations are required if humanity is to live sustainably on planet Earth Recalling past transformations this book examines what makes the current challenge different and especially urgent It examines how green transformations must take place in the context of the particular moments of capitalist development and in relation to particular alliances The role of the state is emphasised both in terms of the type of incentives required to make green transformations politically feasible and the way states must take a developmental role in financing innovation and technology for green transformations The book also highlights the role of citizens as innovators entrepreneurs green consumers and members of social movements Green transformations must be both top down involving elite alliances between states and business but also bottom up pushed by grassroots innovators and entrepreneurs and part of wider mobilisations among civil society The chapters in the book draw on international examples to emphasise how contexts matter in shaping pathways to sustainability Written by experts in the field this book will be of great interest to researchers and students in environmental studies international relations political science development studies geography and anthropology as well as policymakers and practitioners concerned with sustainability *The National Research Council in the Innovation Policy Era* G. Bruce Doern, Richard Levesque, Institute of Public Administration of Canada, 2002-01-01 The authors show how the NRC s history is interwoven with the evolution of Canada s economic and industrial development and with the fostering of science at Canada s universities in industry and within the federal government *Global Governance* Timothy J. Sinclair, 2004 Policing the Markets James Williams, 2012-01-17 Set against the backdrop of the recurring waves of financial scandal and crisis to hit Canada the US the UK and Europe over the last decade this book examines the struggles of securities enforcement agencies to police the financial markets While allegations of regulatory failure in this realm are commonplace and are well documented in policy and legal scholarship James Williams seeks to move beyond these conventional accounts arguing that they are based on a limited view of the regulatory process and overlook the actual practices and dilemmas of enforcement work Informed by interviews with police regulators lawyers accountants and investor advocates along with a wealth of documentary materials the book is rooted in a uniquely interdisciplinary social science perspective Peering inside the black box of enforcement it examines the organizational professional geographical technological and legal influences that shape securities enforcement as a distinctly knowledge

based enterprise The result of these influences Williams argues is the production of a very particular vision of financial disorder which captures certain forms of misconduct while overlooking others a reflection not of incompetence or capture but of the unique demands and constraints of the regulatory craft Providing a very different and much needed account of the challenges faced by regulators and enforcement agencies this book will be of enormous interest to current research on enforcement regulation and governance both within and beyond the financial realm **Corporate Strategies Under International Terrorism and Adversity** Gabriele G. S. Suder,2006-01-01 Corporate Strategies under International Terrorism and Adversity raises key issues facing international business and management in an era of global uncertainty Global Marketing Management Masaaki (Mike) Kotabe,Kristiaan Helsen,2020-01-09 Global Marketing Management 8th Edition combines academic rigor contemporary relevance and student friendly readability to review how marketing managers can succeed in the increasingly competitive international business environment This in depth yet accessible textbook helps students understand state of the art global marketing practices and recognize how marketing managers work across business functions to achieve overall corporate goals The author provides relevant historical background and offers logical explanations of current trends based on information from marketing executives and academic researchers around the world Designed for students majoring in business this thoroughly updated eighth edition both describes today s multilateral realities and explores the future of marketing in a global context Building upon four main themes the text discusses marketing management in light of the drastic changes the global economy has undergone the explosive growth of information technology and e commerce the economic and political forces of globalization and the various consequences of corporate action such as environmental pollution substandard food safety and unsafe work environments Each chapter contains review and discussion questions to encourage classroom participation and strengthen student learning *The Routledge Companion to Non-Market Strategy* Thomas C. Lawton,Tazeeb S. Rajwani,2015-04-24 It is commonplace for today s transnational enterprises to undertake political risk analysis when choosing foreign markets and creating entry strategies Despite this non market elements of corporate strategy are less well researched than the traditional market based perspectives Providing comprehensive and leading edge overviews of current scholarship this Companion surveys the current state of the field and provides a basis for improving our understanding of the non market environment encouraging new insights to improve strategies for enhancing a firm s performance and legitimacy With a foreword by David Baron the international team of contributors includes Jean Philippe Bonardi Bennet Zelner and Jonathan Doh who combine to create a book that is essential reading for students and researchers in business management and politics including those interested in business regulation environmental policy political risk and corporate social responsibility **Post-Kyoto Climate Governance** Asim Zia,2013 In the midst of human induced global climate change powerful industrialized nations and rapidly industrializing nations are still heavily dependent on fossil fuels Even if we arrive at a Hubbert s peak for oil extraction in the

21st century the availability of technologically recoverable coal and natural gas will mean that fossil fuels continue to be burned for many years to come and our civilization will have to deal with the consequences far into the future Climate change will not discriminate between rich and poor nations and yet the UN driven process of negotiating a global climate governance regime has hit serious roadblocks This book takes a trans disciplinary perspective to identify the causes of failure in developing an international climate policy regime and lays out a roadmap for developing a post Kyoto post 2012 climate governance regime in the light of lessons learned from the Kyoto phase Three critical policy analytical lenses are used to evaluate the inherent complexity of designing post Kyoto climate policy the politics of scale the politics of ideology and the politics of knowledge The politics of scale lens focuses on the theme of temporal and spatial discounting observed in human societies and how it impacts the allocation of environmental commons and natural resources across space and time The politics of ideology lens focuses on the themes of risk and uncertainty perception in complex pluralistic human societies The politics of knowledge lens focuses on the themes of knowledge and power dynamics in terms of governance and policy designs such as marketization of climate governance observed in the Kyoto institutional regime

China's Global Energy Expansion Xiaohan Gong, 2024-10-03 Should Chinese energy investments be excluded from the liberal economic system based on geopolitical assessments only This book explores the potential regulatory control by the Chinese government over foreign energy investments to achieve their perceived strategic objectives Host states in which Chinese energy companies make investments have increasingly opposed Chinese energy investments in their national security reviews based on concerns that these investments have strategic objectives The book analyses China's investment related law regulations and energy policies to examine how overseas energy investment making is governed The book also explores the role of the Chinese government in energy investment promotion and protection Uniquely the examination of China's potential regulatory control provides an objective criterion rather than geopolitical considerations for host states to assess the nature of Chinese energy investments The book helps readers to open the black box of Chinese energy investments from a regulatory perspective It is a useful resource for researchers as well as practising lawyers assisting their Chinese clients through national security reviews or when trying to determine whether China's SOEs can bring cases before investor state arbitration tribunals

Implosion L. Parker Temple, 2012-11-27 Implosion is a focused study of the history and uses of high reliability solid state electronics military standards and space systems that support our national security and defense This book is unique in combining the interdependent evolution of and interrelationships among military standards solid state electronics and very high reliability space systems Starting with a brief description of the physics that enabled the development of the first transistor Implosion covers the need for standardizing military electronics which began during World War II and continues today The book shows how these twin topics affected and largely enabled the highest reliability and most technologically capable robotic systems ever conceived This riveting history helps readers Realize the complex

interdependence of solid state electronics and practical implementations in the national security and defense space programs Understand the evolution of military standards for piece parts quality and reliability as they affected these programs Gain insight into the attempted reforms of federal systems acquisition of security and defense related space systems in the latter half of the twentieth century Appreciate the complexity of science and technology public policy decisions in the context of political organizational and economic realities Written in clear jargon free language but with plenty of technical detail Implosion is a must read for aerospace and aviation engineers manufacturers and enthusiasts technology students and historians and anyone interested in the history of technology military technology and the space program **Energy**
