## Science Workbook Critical Thinking:

Writing Science Through Critical Thinking Marilyn F. Moriarty, 1997 Written and extensively class tested with NSF NIH support this timely and useful text addresses a crucial need which is acknowledged in most universities and colleges It is the need for students to learn to write in the context of their field of study in this case science Although numerous how to writing books have been published few if any address the central pedagogical issues underlying the process of learning to think and write scientifically The direct connection between this writing skill and that of critical thinking is developed with engaging style by the author an English professor Moriarty s book is an invaluable guide for both undergraduate and graduate science students In the process of learning the specific requirements of organization demanded by scientific writing students will develop strategies for thinking through their scientific research well before they sit down to write This instructive text will be useful to students who need to satisfy a science writing proficiency requirement in the context of a science course a course in technical writing advanced composition or writing for the profession Critical Thinking in Science Elise Russo, 2010
