

CHAPTER 8

National Concern with the Effective Planning and Coordination of Scientific and Technical Communication

This chapter describes existing and proposed arrangements for the continuing over-all assessment and guidance of scientific-and-technical-communication efforts in the United States. The principal objectives of such arrangements are to maintain effective performance and assure reasonable standards of economy. Since attempts to maintain continuing effective oversight necessarily depend heavily on the federal government, most of them have been initiated or sponsored by the government.

Two areas of special concern in planning and coordinating activities are: (a) the comprehensive programs which embrace major information services for entire disciplines, typically operated by private organizations; and (b) mission-oriented programs, which departments of the federal government operate either in accordance with specific legislation or to provide for their own information needs. Our emphasis in this chapter is not so much on the design and operation of individual programs, even those of comprehensive size, as on the determination of their relative scope and the coordination of their mutual interaction.

A. HISTORICAL BACKGROUND

The directives and policies formulated by Lenin immediately following the October Revolution of 1917 are among the earliest instances in which the efficient management and coordination of scientific and technical communication was recognized as a national concern. One of Lenin's first decrees dealt with library procedures and policies, and thereafter he continuously urged attention at the highest level of government to the development of measures that would assure the progress of Soviet science and the utilization of the newest scientific and technical
