programming styles and paradigms according to a new slogan computation is pattern matching It is the contribution of this book to systematically and elegantly present and evaluate the power of pattern matching as the guiding paradigm of programming Patterns are dynamically generated discovered passed applied and automatically adapted based on pattern matching and rewriting technology which allows one to elegantly relate things as disparate as functions and data structures Of course pattern matching is not new It underlies term rewriting it is for example incorporated in typically functional programming languages like Standard ML but it has never been pursued as the basis of a unifying framework for programming

A History of Scientific Journals Aileen Fyfe, Noah Moxham, Julie McDougall-Waters, Camilla Mørk Røstvik, 2022-10-03

Modern scientific research has changed so much since Isaac Newton's day it is more professional collaborative and international with more complicated equipment and a more diverse community of researchers Yet the use of scientific journals to report share and store results is a thread that runs through the history of science from Newton's day to ours Scientific journals are now central to academic research and careers Their editorial and peer review processes act as a check on new claims and findings and researchers build their careers on the list of journal articles they have published The journal that reported Newton's optical experiments still exists First published in 1665 and now fully digital the Philosophical Transactions has carried papers by Charles Darwin Dorothy Hodgkin and Stephen Hawking It is now one of eleven journals published by the Royal Society of London Unrivalled insights from the Royal Society's comprehensive archives have enabled the authors to investigate more than 350 years of scientific journal publishing The editorial management business practices and financial difficulties of the Philosophical Transactions and its sibling Proceedings reveal the meaning and purpose of journals in a changing scientific community At a time when we are surrounded by calls to reform the academic publishing system it has never been more urgent that we understand its history
