Scientific Evidence And Equal Protection Of The Law:

Scientific Evidence and Equal Protection of the Law Angelo N Ancheta, 2006-02-02 Scientific and social scientific evidence has informed judicial decisions and the making of constitutional law for decades but for much of U S history it has also served as a rhetorical device to justify inequality It is only in recent years that scientific and statistical research has helped redress discrimination but not without controversy Scientific Evidence and Equal Protection of the Law provides unique insights into the judicial process and scientific inquiry by examining major decisions of the U S Supreme Court civil rights advocacy and the nature of science itself Angelo Ancheta discusses leading equal protection cases such as Brown v Board of Education and recent litigation involving race related affirmative action gender inequality and discrimination based on sexual orientation He also examines less prominent but equally compelling cases including McCleskey v Kemp which involved statistical evidence that a state s death penalty was disproportionately used when victims were white and defendants were black and Castaneda v Partida which established key standards of evidence in addressing the exclusion of Latinos from grand jury service For each case Ancheta explores the tensions between scientific findings and constitutional values

Nussbaum and Law Robin West, 2017-07-05 The essays collected in this volume reflect the profound impact of Martha Nussbaum s philosophical writings on law and legal scholarship The capabilities approach that she has largely authored has influenced the approach scholars take to the law of disabilities both in the United States and in Canada as well as to international human rights and to domestic private law s protections of vulnerable populations Her analyses of the relationship between our emotions and our thought and action has triggered a re assessment of the legal regulation and recognition of emotion in a range of fields most particularly in the field of criminal law and her writing on the nature of dignity has informed an understanding of the emerging civil rights of gay and lesbian citizens worldwide Our appreciation of the role of narrative in legal thought and discourse and the contributions of literature to law and legal culture have also been broadened and deepened by her contributions Taken together and including the introduction by the editor the essays

collected in this volume demonstrate the far reaching impact of Nussbaum s philosophical oeuvre

Tucker, 1994 Unlike other critiques of the scientific literature on racial difference The Science and Politics of Racial Research argues that there has been no scientific purpose or value to the study of innate differences in ability between groups William Tucker shows how for more than a century scientific investigations of supposedly innate differences in ability between races have been used to rationalize social and political inequality as the unavoidable consequence of natural differences Tucker structures his work chronologically with each chapter describing how research on genetic difference was used in a particular era to support a particular political agenda He begins with the use of science to support slavery in the mid nineteenth century and ends with the effects of Jensenism in the 1970s Highlights include one chapter describing a little known but concerted attempt by a group of scientists to overturn the Brown v Board of Education decision on the basis of expert testimony about racial differences and another that presents a review of the eugenics movement in the twentieth century The author also considers how to balance the rights and responsibilities of scientists concluding that one generally neglected method is to strengthen the rights of research subjects **Family Life and Family Interests** Gerda A. Kleijkamp, 2023-07-03 The purpose of this comparative study is three fold Firstly it offers an analysis of and a comparison between the application and interpretation of Article 8 often in conjunction with the anti discrimination principle of Article 14 of the European Convention of Human Rights and the application and interpretation of
