Scientific Russian Reader Noah D. Gershevsky, 1960 **Elementary scientific Russian reader** George Alexandrovich Znamensky, 1943 *Scientific Babel* Michael D. Gordin, 2015-04-13 English is the language of science today No matter which languages you know if you want your work seen studied and cited you need to publish in English But that hasn't always been the case Though there was a time when Latin dominated the field for centuries science has been a polyglot enterprise conducted in a number of languages whose importance waxed and waned over time until the rise of English in the twentieth century So how did we get from there to here How did French German Latin Russian and even Esperanto give way to English And what can we reconstruct of the experience of doing science in the polyglot past With *Scientific Babel* Michael D Gordin resurrects that lost world in part through an ingenious mechanism the pages of his highly readable narrative account teem with footnotes not offering background information but presenting quoted material in its original language The result is stunning as we read about the rise and fall of languages driven by politics war economics and institutions we actually see it happen in the ever changing web of multilingual examples The history of science and of English as its dominant language comes to life and brings with it a new understanding not only of the frictions generated by a scientific community that spoke in many often mutually unintelligible voices but also of the possibilities of the polyglot and the losses that the dominance of English entails Few historians of science write as well as Gordin and *Scientific Babel* reveals his incredible command of the literature language and intellectual essence of science past and present No reader who takes this linguistic journey with him will be disappointed **Scientific Russian Reader. Department of the Army, 1963 Reader's Guide to the History of Science Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn *Current Research and Development in Scientific Documentation*, 1960
Circular, 1930 *Dialectics of Force: Ontóbia*. Олег Арин/Алекс Бэттлер, In this book for the first time in world scientific literature the category of Force is presented as an attribute of matter alongside motion space and time This has enabled the author to develop a different approach to the Big Bang to give a new formulation of the border between life and the inorganic world and to offer his own interpretation in the disputes on the mind body problem The category of Ontological

Force formulated by the author has allowed him to develop a new definition of the concept of Progress which creates a methodological basis for fruitful research in the fields of the social sciences and international relations Current Research and Development in Scientific Documentation National Science Foundation (U.S.). Keep Tab on the Lab ,1960-02 **Arab and Muslim Science Fiction** Hosam A. Ibrahim Elzembely,Emad El-Din Aysha,2022-04-04 How is science fiction from the Arab and Muslim world different than mainstream science fiction from the West What distinctive and original contributions can it make Why is it so often neglected in critical considerations of the genre While other books have explored these questions all have been from foreign academic voices Instead this book examines the nature genesis and history of Arabic and Muslim science fiction as well as the challenges faced by its authors in the authors own words These authors share their stories and struggles with censors recalcitrant publishers critics the book market and the literary establishment Their uphill efforts with critical contributions from academics translators and literary activists will enlighten the sci fi enthusiast and fill a gap in the history of science fiction Topics covered range from culture shock to conflicts between tradition and modernity proactive roles for female heroines blind imitation of storytelling techniques and language games External Research.
