The Omega Point Mike Hockney, 2013-09-30 History's biggest lie is that there's one God and he created the universe out of nothing Nothing has done more damage to the human psyche than monotheism the doctrine of an all powerful Spy God the divine peeping Tom who sentences to hell anyone who doesn't slavishly obey him In fact the universe is a mathematical God factory and creates infinite Gods over eons of time The universe via dialectical ontological mathematics is converging on the perfect answer to everything the condition known as the Absolute or the Omega Point The universe travels mathematically from Alpha to Omega from perfect potential to perfect actualization The ancient secret

society of the Illuminati has waged a war against Abrahamic monotheism and promoted the doctrine of becoming God Mathematics is the Philosopher s Stone that can transmute base metal ordinary humans into gold Gods You too can complete your cosmic journey across countless reincarnations Are you ready to become an Omega Human **More than Money** Paul Godfrey,2013-12-11 Is poverty inevitable No says author Paul Godfrey More than Money shows how organizations can win the fight against poverty and create prosperity for people at the base of the pyramid in the developing and developed world This book presents a novel framework that shows how five types of interrelated capital institutional human social organizational and physical enable development and sustainable growth In addition to a widely applicable model Godfrey provides principles to guide application Core chapters articulate each specific form of capital and provide examples of how it contributes to the triple bottom line Not just a theoretical examination of poverty More than Money delivers timely advice to organizations that produce goods and services implement policies and create meaningful change on the ground This book will guide social innovators and entrepreneurs in business government and civil society settings as they create a vision assemble a team of strong partners and effectively measure social innovation **Scientific Romances** Charles Howard Hinton,1898 *Scientific Discovery, Logic, and Rationality* Thomas Nickles,2012-12-06 It is fast becoming a cliché that scientific discovery is being rediscovered For two philosophical generations that of the Founders and that of the Followers of the logical positivist and logical empiricist movements discovery had been consigned to the domain of the intractable the ineffable the inscrutable The philosophy of science was focused on the so called context of justification as its proper domain More recently as the exclusivity of the logical reconstruction program in philosophy of science came under question and as the critique of justification developed within the framework of logical and epistemological analysis the old question of scientific discovery which had been put on the back burner began to emerge once again Emphasis on the relation of the history of science to the philosophy of science and attention to the question of theory change and theory replacement also served to legitimate a new concern with the origins of scientific change to be found within discovery and invention How welcome then to see what a wide range of issues and what a broad representation of philosophers and historians of science have been brought together in the present two volumes of the Boston Studies in the Philosophy of Science For what these volumes achieve in effect is the continuation of a tradition which had once been strong in the philosophy of science namely that tradition which addressed the question of scientific discovery as a central question in the understanding of science **A World Scientific Encyclopedia Of Business Storytelling, Set 2: Methodologies And Big Data Analysis Of Business Storytelling (In 5 Volumes)** ,2023-10-13 This set of multi reference works is meant to be read together as the five volumes interlace one another like the laces of a shoe in the famous painting by Vincent van Gogh The question of who will wear the shoes is long debated in art history and philosophy If we take these five volumes from different points of view on the theory and practice of business storytelling then we have a crisscrossing a new and impressive dialogue for the reader This set is

presented as a new way to lace up the laces of business storytelling Volume 1 aims to help and inspire leaders business owners and researchers in creating a commitment to ethical and sustainable changes and ideas and live in a world of high complexity without getting stressed but experiencing freedom instead The book combines tools case studies and theories about the ethical change management method of True Storytelling and other perspectives and views on ethics and storytelling It delves into important topics such as true storytelling sustainability and freedom storytelling and start ups in the health industry storytelling and diversity and culture storytelling and teams storytelling sustainability and the UN Goals storytelling and well being storytelling in higher education and storytelling and fundraising Book authors are experienced and successful researchers business owners leaders and consultants from Scandinavia the USA Africa and Europe Volume 2 is an endeavor into the creation of new concepts for engaging with sustainability It maintains that storytelling is important for our emplacement in nature and can be important for enacting another relationship between nature and the cultural artifice our social and material constructions of houses cities villages harbors streets and railways and our use of objects and artifacts to construct our lives Business storytelling communication is that space for social symbolic work that brings the symbolic objects of the organization the human and the natural environment into a dialogical relationship Volume 3 posits that organizations are arranged as social symbols that are arranged in institutions based on the needs of organics for example health food shelter mating leisure and labor Organics as a social symbolic object specifically humans have emotions language and culture to organize their institutions and organizations In this book readers will find that many of the authors attempt to understand the body s exclusion or attempt to bring the body back into the organization Business storytelling communication takes aim at the social symbolic work of making space to negotiate the social arrangement of organizations with its organic components Volume 4 covers a variety of methodological topics from a storytelling perspective Why a storytelling perspective Consider that a common business research goal is to convince others that what the researcher has to say matters If the researcher is a basic researcher who wishes to promote a theory the goal is to make a convincing case for the value of that theory If the researcher is an applied researcher who wishes to promote a particular application intervention or policy change the goal is likewise to make a convincing case Either way the researcher has a story to tell and the onus is on the researcher to tell the best possible story storytelling failures likely will result in a failure to convince others of the value of one s theory or application Here is where methodological issues come into play Poor methodology whether in the form of less than optimal study designs or invalid statistical analyses harms story quality In contrast high quality methods and statistics enhance story quality Moreover the larger one s methodological and statistical toolbox the greater the opportunities for researchers to tell effective stories The chapters in this book come from a wide variety of perspectives and should enhance researchers storytelling in the following ways By opening many different methodological and statistical perspectives researchers should be more able to think of research stories that otherwise would remain unavailable or

inaccessible Secondly the present chapters should aid researchers in better executing their research stories Therefore researchers and graduate students will find this book an invaluable resource Volume 5 opens a window into the world of quantum storytelling as an organizational research methodology providing numerous exemplars of work in this storytelling science that has disrupted qualitative inquiry only with the intention of providing expanded improved and generative ways of understanding and knowing the narratives that emerge from qualitative interviews and observations during organizational research studies

The Mourning After ,2007-01-01 Have we moved beyond postmodernism Did postmodernism lose its oppositional value when it became a cultural dominant While focusing on questions such as these the articles in this collection consider the possibility that the death of a certain version of postmodernism marks a renewed attempt to re negotiate and perhaps re embrace many of the cultural literary and theoretical assumptions that postmodernism seemly denied outright Including contributions from some of the leading scholars in the field N Katherine Hayles John D Caputo Paul Maltby Jane Flax among others this collection ultimately comes together to perform a certain work of mourning Through their explorations of this current epistemological shift in narrative and theoretical production these articles work to get over postmodernism while simultaneously celebrating a certain postmodern inheritance an inheritance that can offer us important avenues to understanding and affecting contemporary culture and society

Identified Flying Objects Dr. Michael P. Masters,2019-03-22 Could UFOs and Aliens simply be us but from the future This provocative new book cautiously examines the premise that extraterrestrials may instead be our distant human descendants using the anthropological tool of time travel to visit and study us in their own hominin evolutionary past Dr Michael P Masters a professor of biological anthropology specializing in human evolutionary anatomy archaeology and biomedicine explores how the persistence of long term biological and cultural trends in human evolution may ultimately result in us becoming the ones piloting these disc shaped craft which are likely the very devices that allow our

future progeny to venture backward across the landscape of time Moreover these extraterrestrials are ubiquitously described as bipedal large brained hairless human like beings who communicate with us in our own languages and who possess technology advanced beyond but clearly built upon our own These accounts coupled with a thorough understanding of the past and modern human condition point to the continuation of established biological and cultural trends here on Earth long into the distant human future

Insatiable Curiosity Helga Nowotny, 2010-08-13 An influential scholar in science studies argues that innovation tames the insatiable and limitless curiosity driving science and that society's acute ambivalence about this is an inevitable legacy of modernity Curiosity is the main driving force behind scientific activity Scientific curiosity insatiable in its explorations does not know what it will find or where it will lead Science needs autonomy to cultivate this kind of untrammelled curiosity innovation however responds to the needs and desires of society Innovation argues influential European science studies scholar Helga Nowotny tames the passion of science harnessing it to produce deliverables Science brings uncertainties innovation successfully copes with them Society calls for both the passion for knowledge and its taming This ambivalence Nowotny contends is an inevitable result of modernity In Insatiable Curiosity Nowotny explores the strands of the often unexpected intertwining of science and technology and society Uncertainty arises she writes from an oversupply of knowledge The quest for innovation is society's response to the uncertainties that come with scientific and technological achievement Our dilemma is how to balance the immense but unpredictable potential of science and technology with our acknowledgement that not everything that can be done should be done We can escape the old polarities of utopias and dystopias writes Nowotny by accepting our ambivalence as a legacy of modernism and a positive cultural resource
