Scientist A Metaphysical Autobiography:

The Scientist Lilly, 1996-10-23 The author of Mind of the Dolphin and Center of the Cyclone tells the story of his astonishing discoveries from his early experiments mapping the brains of monkeys and communication with dolphins to his awesome breakthroughs with consciousness expanding drugs and isolation tanks His revelations in The Scientist are staggering his latest report on the solid state conspiracy on communication with extraterrestrials and the imperative of dolphin human dialog will grip the reader with its sense of cosmic vision. This expanded edition of The Scientist contains bubbles of consensus reality text and photos in the hyperspace narrative It includes an introduction by Timothy Leary an afterward by Burgess Meredith biographical and bibliographic information The third edition has an update on John Lilly s work with Human Dolphin communication and the results of recent reintroduction of captive dolphins and other cetaceans to the wild The Scientist; a Metaphysical Autobiography John C. Lilly, 1996 Reign of the Anunnaki Jan Erik Sigdell, 2018-09-11 Reveals the ongoing alien manipulation of humanity and how we can break free Explores how the Anunnaki have maintained invisible surveillance over us and how they control our development through religion secret societies and catastrophes Reveals how they feed off our energies and how this ability has allowed them to remain here on Earth as multidimensional entities enforcing their control invisibly Explains how they established religion to control us and how Gnostic Christianity which came from Christ and not the Anunnaki offers a way out of their matrix of control Cuneiform texts found on clay plates in Mesopotamia tell us about an extraterrestrial race called the Anunnaki who came from space to exploit our planet Through genetic manipulation they created modern humans from existing earthly life forms to serve them as slaves They physically left our planet millennia ago but as Jan Erik Sigdell reveals their influence and control over humanity is still pervasive and significant Sigdell explains how the Anunnaki have maintained invisible surveillance over us as well as control over how humanity develops setting limits on our evolution and holding back our development by means of manipulation and catastrophes including the deluge immortalized in the Bible and many other ancient myths He shows how they still manipulate our politics and affairs via secret societies such as the Illuminati and the political elite such as the Bilderberg Group Examining ancient descriptions of the Anunnaki as entities that resemble winged reptiles or amphibians the author also explores their diet and how they feed off blood and the energies given off by lower life forms such as humans when they are expressing extreme negative emotions having sex or dying This energy feeding ability has allowed them to remain here on Earth as multidimensional entities enforcing their control invisibly He explains how the Anunnaki established religions as tools for control setting up the major religions with themselves as gods and playing them against each other to keep humanity s attention away from ongoing Anunnaki manipulation They have also hidden from us the existence of the true highest creator who created the cosmos as well as the Anunnaki themselves The author reveals how the highest creator sent a messenger called Jesus to expose the Anunnaki and show us a way out of their matrix of control through a spirituality based on love empathy and sacred sexuality But the god of the Anunnaki defeated this messenger and replaced him with a false Christ This led to the development of Paulinian Christianity under Anunnaki influence as well as other parallel religions such as Islam and the suppression and elimination of the original Christianity Gnostic Christianity With the discovery of hidden Gnostic texts and teachings at Nag Hammadi in 1945 the way is now paved for our release from the reign of the Anunnaki

Lilly, 2009-06-15 In this intellectually bracing work John C Lilly whose groundbreaking research inspired Day of the Dolphins and Altered States likens humans to biochemical robots without an operating manual By learning to program the robot he argues humans gain spiritual

independence Knowing one's core beliefs and understanding how they direct one's actions are critical steps towards such independence But for many people spiritual beliefs are like clothes put on and taken off for various occasions and like clothes become a kind of confining uniform rendering one person virtually identical to the next In The Steersman Lilly shows readers how to identify their guiding beliefs and most importantly how to change them in ways that they choose making it possible to break out of the confines of beliefs accepted without consideration and navigate a new path of self discovery Is God Timothy Leary, 2001-06-15 This collection of essays written by the poster boy of 1960s counterculture describes the psychological journey Timothy Leary made in the years following his dismissal from Harvard as his psychedelic research moved from the scientific to the religious arena He discusses the nature of religious experience and eight crafts of God including God as hedonic artist Leary also examines the Tibetan Buddhist and Taoist experiences In the final chapters he explores man as god and LSD as sacrament Musings on Human Metamorphoses Timothy Leary, 2025-01-22 The human species is evolving Leary describes eight circuits of human metamorphosis and the imprints that occur at each Psychedelic drugs suspend imprints and conditioning to allow new imprints to evolve Leary describes each circuit in depth along with the consciousness that manifest at each level and its purpose Leary believes that human are morphing into space beings We are becoming the aliens This book describes the complicated psychological metamorphosis that proceeds our launch into space Programming the Human Biocomputer John C. Lilly, 2010-06-15 The parallels between the human brain and life computers is easy to see today But in the 1950 s when John Lilly developed his theory of the human biocomputer this was a dramatic new way of viewing humans Much like a driver can step out of the car we are not our biocomputer The Self is something far greater and more mysterious Rooted in his extensive knowledge of neurophysiology neuroanatomy and electronics and developed through personal experimentation in the sensory isolation tank which he invented Lilly presents a method for learning to manipulate to drive the bio robot which is our vehicle here on Earth robots This manual shows how to step out of the mind body and find out who we really are
