The story of how these progressive clients contributed to the innovative design of their houses brings fresh insights to mid twentieth century Australian domestic architecture and to Canberra's rich cultural history.

**The Making of British Anthropology, 1813-1871** Efram Sera-Shriar, 2016-08-03 Victorian anthropology has been derided as an armchair practice distinct from the scientific discipline of the twentieth century. But the observational practices that characterized the study of human diversity developed from the established sciences of natural history, geography and medicine. Sera Shriar argues that anthropology at this time went through a process of innovation which built on scientifically grounded observational study. Far from being an evolutionary dead end, nineteenth century anthropology laid the foundations for the field based science of anthropology today.
