Edited by James Harrison James Harrison,1965 *Scientific Writing = Thinking in Words* David Lindsay,2011-02-01 Telling people about research is just as important as doing it But many researchers who in all other respects are competent scientists are afraid of writing They are wary of the unwritten rules the unspoken dogma and the inexplicably complex style all of which seem to pervade conventional thinking about scientific writing This book has been written to expose these phantoms as largely smoke and mirrors and replace them with principles that make communicating research easier and encourage researchers to write confidently It presents a way of thinking about writing that emulates the way good scientists think about research It concentrates on the structure of articles rather than simply on grammar and syntax So it is an ideal reference for researchers preparing articles for scientific journals posters conference presentations reviews and popular articles for students preparing theses and for researchers whose first language is not English *Scientific Writing Thinking in Words* expounds principles that produce scientific articles in a wide range of disciplines that are focussed concise and best of all easy to write and read As one senior scientist observed This book not only made me a better writer it made me a better scientist **The Oxford Book of Modern Science Writing** Richard Dawkins,2008-03-13 Selected and introduced by Richard Dawkins The Oxford Book of Modern Science Writing is a celebration of the finest writing by scientists for a wider audience revealing that many of the best scientists have displayed as much imagination and skill with the pen as they have in the laboratory This is a rich and vibrant collection that captures the poetry and excitement of communicating scientific understanding and scientific effort from 1900 to the present day Professor Dawkins has included writing from a diverse range of scientists some of whom need no introduction and some of whose works have become modern classics while others may be less familiar but all convey the passion of great scientists writing about their science **The Craft of Science**
