Scientists Peggy Saari, Stephen Allison, Marie C. Ellavich, 1996 Volume 02 P Z **Multicultural Information Quests** Marie Rodgers, 2000-03-15 If you're searching for research activities or multicultural topics for a diverse student population this is the book for you Reproducible quizzes guide students through subjects that range from holidays and food to sports heroes and literature Cultural searches are related to Hispanics Native Americans African Americans Asian Americans and other U.S. immigrant groups For each quest the author provides an annotated reference list search questions and an answer key This is a fun and inspirational approach to building research skills while fostering an appreciation of diversity

Scientists Editors: Peggy Saari and Stephen Allison, 1996 Biographical treatment of selected scientists covering personal details paths to discoveries contributions and impact of each scientific endeavor Media Skills for Middle Schools Lucille W. Van Vliet, 1999-01-15 These practical and useful lesson plans promote teaching information and computer skills as an integral part of the middle school curriculum Emphasizing the vital role shared by media specialists teachers and administrators in connecting students to the Information Superhighway this new edition contains current goals terminology learning strategies and resources that encompass the Information Age Making It in America Elliott Robert Barkan, 2001-05-01 This collection of over 400 biographies of eminent ethnic Americans celebrates a wide array of inspiring individuals and their contributions to U.S. history The stories of these 400 eminent ethnic Americans are a testimony to the enduring power of the American dream These men and women from 90 different ethnic groups certainly faced unequal access to opportunities Yet they all became renowned artists writers political and religious leaders scientists and athletes Kahlil Gibran Daniel Inouye Zbigniew Brzezinski Thurgood Marshall Madeleine Albright and many others are living proof that the land of opportunity sometimes lives up to its name Alongside these success stories as historian Elliot R. Barkan notes in his introduction to this volume there have been many failures and many immigrants who did not stay in the United States Nevertheless the stories of these trailblazers visionaries and champions portray the breadth of possibilities from organizing a nascent community to winning the Nobel prize They also provide irrefutable evidence that no single generation and no single cultural heritage can claim credit for what America is *The Elementary School Library Collection, Phases 1-2-3*, 2000

Chemistry Katherine Cullen, Katherine E. Cullen, 2005 Modern chemistry is the scientific study of the composition of the natural world From the atomic theory of matter to the development of the first periodic table of elements to the explanation of the nature of chemical bonding Chemistry examines 10 people who made some of the most progressive steps in the field

Each chapter contains relevant information on the scientist's childhood, research, discoveries, and lasting contributions to the field, and concludes with a chronology and a list of print and Internet references specific to that individual. **Library Media Connection**, 1997

The Faithful Scientist Christopher P. Scheitle, 2023-10-24 The Faithful Scientist uses engaging interview and survey data to reveal the unique perceptions, experiences, and challenges of religious individuals pursuing an advanced education and career in science.

Death of a Scientist Michael G. Welham, Mike Welham, 2013 A Time for War When a President and a Prime Minister want to go to war to remove a dictator and gain control of his country's vast reserves of oil, they must gain public support. A threat from the dictator, President, to use chemical and biological weapons gives them their reason. But the weapons inspectors just can't find the evidence that the country has such weapons. To counter this, a political dossier is created claiming the existence of weapons of mass destruction. A Time to Die Dr. John Finch, the world-renowned British specialist in chemical and biological weapons, is a member of a UN inspection team. He discovers that no such weapons exist; that the dossier is misleading and refuses to toe the political line. His actions do not stop the war, but it results in him becoming a target for a political assassination. Chuck Cornell, a member of the ultra-secret Black Eagles, is assigned the task, and Dr. Finch is his victim. When Dr. Finch is found dead in a wood, it looks like suicide, but somebody has tampered with the crime scene. Unidentified men are seen in the area, and unusual activity at the scene is observed. A Time for Justice To halt the media frenzy, a formal inquiry is set up, but vital witnesses are not called, and a political cover-up looks likely. The Excalibur Foundation, an organization that seeks justice for political victims, decides to take up the case. They propose to hunt down Chuck Cornell themselves, and former French Foreign Legion sniper Dan Pierce is hired for the mission. During the operation to eliminate the Black Eagle, however, a political target comes into Dan's sights. Dan now holds the power to bring justice to the world; it's just a matter of squeezing the trigger.

Science as a Career Choice Bernice T. Edguson, Linda Beckman, 1973-09-28 How can we identify the young men and women who as social and behavioral scientists of tomorrow will do the needed research to resolve our burgeoning social problems? How can the most promising be attracted to an investigatory career? How can they become identified with the behaviors, attitudes, and values that persons in science share? A provocative body of literature about the psychology of the scientist and his career emerged in the post-Sputnik era. Drs. Edguson and Beckman bring together more than seventy of the most significant and representative studies. These range over childhood and family influences, academic experiences, motivations, interests, and intellectual and personality strengths that have been examined as precursors for choosing science as adult work. The psychological mechanisms involved in socializing a young person toward a scientific career are suggested in readings from the outstanding theoreticians in the field. Selections on scientific career lines, decisions, and options at various stages of work, and factors influencing goals and career development contribute to the understanding of the psychological life of the highly endowed and well-functioning professional adult. Through showing the certain completeness of

effort of what has been learned about the psychology of scientists to date the authors anticipate a resurgence of interest in the creative individual a renewed enthusiasm for application and a refocusing of research on the issues unique to the social and behavioral research scientist

Remember the first time you planted a seed and watched it sprout Or explored how a magnet attracted a nail If these questions bring back memories of joy and wonder then you understand the idea behind inquiry based science an approach to science education that challenges children to ask questions solve problems and develop scientific skills as well as gain knowledge Inquiry based science is based on research and experience both of which confirm that children learn science best when they engage in hands on science activities rather than read from a textbook The recent National Science Education Standards prepared by the National Research Council call for a revolution in science education They stress that the science taught must be based on active inquiry and that science should become a core activity in every grade starting in kindergarten This easy to read and practical book shows how to bring about the changes recommended in the standards It provides guidelines for planning and implementing an inquiry based science program in any school district The book is divided into three parts Building a Foundation for Change presents a rationale for inquiry based science and describes how teaching through inquiry supports the way children naturally learn It concludes with basic guidelines for planning a program School administrators teachers and parents will be especially interested in the second part The Nuts and Bolts of Change This section describes the five building blocks of an elementary science program Community and administrative support A developmentally appropriate curriculum Opportunities for professional development Materials support Appropriate assessment tools Together these five elements provide a working model of how to implement hands on science The third part Inquiry Centered Science in Practice presents profiles of the successful inquiry based science programs in districts nationwide These profiles show how the principles of hands on science can be adapted to different school settings If you want to improve the way science is taught in the elementary schools in your community Science for All Children is an indispensable resource
