Hawley, 2006-10-18 Raise organizational effectiveness to improve the quality of instruction and dramatically impact student achievement Working in tandem with the powerful National Education Association's KEYS initiative Keys to Excellence in Your Schools this second edition focuses on how to change a school's organizational structure and culture to improve the quality of teaching and learning Each chapter revised and updated to address continuous improvement and narrowing the achievement gap provides a wealth of knowledge from leading experts in the field including Patricia A Alexander Eva L Baker James A Banks Peter Cookson Lorna M Earl Richard F Elmore Michael Fullan Geneva Gay Willis D Hawley Jacqueline Jordan Irvine Kenneth Leithwood Ann Lieberman Judith Warren Little Lynne Miller P Karen Murphy Fred M Newmann Sonia Nieto Janet Ward Schofield Walter G Stephan Gary Sykes and Linda Valli Educators at all levels policymakers and parents will discover how to apply the lessons learned from research This essential handbook provides new chapters including exemplary practice on teaching and learning for a multicultural society and on continuous school improvement Now you can advance to the next level of change with an integral resource for school reform Transformative Learning Through Engagement Jane Fried, 2023-07-03 Jane Fried's overarching message is that higher education is based on a profoundly outdated industrial model of the purpose and delivery of learning and needs urgently to be changed Student affairs professionals and academic faculty have become frustrated with the alienation of so many students from academic learning because they cannot see its connection to their lives This book addressed to everyone involved in helping college students learn presents what we now know about the learning process particularly those elements that promote behavioral change and the ability to place information in a broader context of personal meaning and long term impact Central to its argument is that learning must be experiential and engage students holistically that it must be grounded in brain science and an understanding of the cultural drivers of knowledge construction that academic faculty and student affairs professionals must cooperate to help students make connections and see the implications of their learning for their lives and that the entire learning environment needs to be integrated to reflect the organic nature of the process A second purpose of this book is to enable student affairs professionals to articulate their own role in helping students learn Student affairs as a profession has had difficulty describing its work with students as teaching because the dominant paradigm of teaching continues to suggest a classroom an academic expert and a model of learning that is basically verbal and cognitive Student affairs professionals who read this book will be able to understand and articulate the processes of experiential transformative education to their academic colleagues and to help collegially design integrated learning experiences as partners with academic faculty The book concludes with a number of brief invited chapters that describe a few emerging models and programs that illustrate Jane Fried's vision of transformative learning
