Who Am I? Who Is She? Gerard P. Montague, 2013-05-02 Are persons physical things members of the species homo sapiens which exist solely in materialist form continuous in structure with other living things Or is the issue a more complex one are there more dimensions to being a person than mere physical biological existence These are matters of interest and discussion in many fields of study in this age of individuality In this wide ranging essay the author addresses various aspects of the issue including the history of self and identity The ancient tradition of dualism is rejected in favour of a straightforward holistic and naturalistic account of selfhood it is argued that the mind arises in an emergent sense from the body and personal identity is best expressed in terms of a self reflective and meaningful narrative The approach is principally from an analytic philosophy point of view but also takes on board psychological and sociological aspects of self and identity
