The International Handbook of Parental Alienation Syndrome Richard A. Gardner,S. Richard Sauber,Demosthenes Lorandos,2006 The dramatic increase in the number of child custody disputes since the seventies has created an equally dramatic need for a standard reference work that examines the growing social problem of children who develop an irrational hatred for a parent as the result of divorce The International Handbook of Parental Alienation Syndrome Conceptual Clinical and Legal Considerations features clinical legal and research perspectives from 32 contributors representing eight countries building on the work of the late Dr Richard Gardner a pioneer in the theory practice diagnosis and treatment of Parental Alienation Syndrome PAS This unique book addresses the effects of PAS on parents and children discusses issues surrounding reconciliation between parent and alienated child and includes material published for the first time on incidence gender and false allegations of abuse in PAS Content highlights examines PAS and the roles of family members the criminal justice system and the need for public awareness and policymakers to respond to PAS Descriptive statistics on 84 cases are given and the factors affecting reconciliation between the child and target parent are listed The mild moderate and severe categories of PAS are explored and the psychological consequences of PAS indoctrination for adult children of divorce and the effects of alienation on parents are researched The role of medical reports in the development of PAS sexual abuse

allegations and future predictions on the fate of PAS children are many of the clinical considerations in this book The legal issues concern PAS in American law criticisms of PAS in courts of law protecting the fundamental rights of children in families family law reform International PAS abductions and the legal requirements of experts giving evidence to courts The impact and implications of PAS are immense and no other single source provides the depth and breadth of coverage of the topic than the clinical and forensic chapters in this book Parental Alienation Syndrome in Court Referred Custody Cases Janelle Burrill, 2002 This dissertation summarizes the research of 30 court referred custody dispute cases assessing the behaviors of the parents and their children to determine the presence or absence of Parental Alienation Syndrome PAS The criteria to determine the parent and their children's behaviors is Dr Gardner's definition of Parental Alienation Syndrome The parents were placed in three categories mild moderate or severe based on their symptoms and behaviors Their children 59 were then categorized into three groups mild moderate severe This investigation seeks to determine additional information regarding the presence or absence of PAS Reluctance by the courts and mental health community to accept the validity of PAS probably contributes to the perpetuation of the disruption of parent child relations in custody disputes Findings and Conclusions It appears the data from this study corroborates observations and definitions of Parental Alienation Syndrome The data from this study indicates that the parents in the mild PAS category have children who exhibit fewer negative behaviors toward the alienated parents whereas children whose parents are in the severe category exhibit more negative behaviors towards the alienated parents This study found that the more negative behaviors a child exhibits towards an alienated parent the more severe their parent's symptoms and behaviors Consequently there is more severe alienation from the alienated parent and the more disruption to that parent child relation PAS is a distinctive form of child abuse generally found in intractable custody disputes Download 1st chapter [ByteSizeSystems Reader FREE](#) and buy [ByteSize b](#) book for 5 00
