Shadow Summer:

Summer's Shadow Anna Wilson, 2014-07-03 Her mother's will states that Summer's legal guardian is her uncle Tristan a man Summer has never even heard of before Forced to leave her life in London Summer moves to Tristan's creepy ancient house in Cornwall There she is met with indifference from him open hostility from her cousin and an aunt who has chosen to leave rather than to tolerate her presence Soon Summer comes to believe that the house may be haunted But is it haunted by ghosts or by the shadows of her family's past Scared and lonely Summer begins to spend more and more time in the beautiful sheltered cove she discovers nearby But she's not alone A local boy frequents it too Can Summer find first love and the answers to the mysteries of her new home with this good looking boy who appears to be too perfect to be true In Pursuit of Poem Shadows Kay Pritchett, 2011-04-07 Born in the small Extremaduran town of Moraleja in 1946 Spanish poet Pureza Canelo at the age of twenty five published her first collections of poetry *Celda verde* and *Lugar común* winner of the 1970 Adonais Prize By 1979 she had settled upon an understanding of her own aesthetic evolution which she elaborated in *Habitable Primera poética* Then in 1986 after a period of disenchantment with the written word during which she published only two chapbooks *Espacio de emoción* 1981 and *Vega de la paloma* 1984 she redefined her position in *Tendido verso Segunda poética* Designed to complement Nature's Colloquy with the Word Pureza Canelo's First Poetics Bucknell 2004 the current text deciphers the intricate poetic language of the poet's mature works which at the time of writing included the two above mentioned chapbooks as well as *Tendido verso Pasion in dita* 1990 and *No escribir* 1999 The author traces recurrent aesthetic and philosophical positions that serve to differentiate the poet's first and second poetics *Tendido verso* is the volume in which temporality supersedes essence and in so doing breaks with insights expressed by Juan Ramón Jiménez during his Modernist phase In *Pasion in dita* the intimate pronominal discourse between poet and creative other allows them to coalesce into an indeterminate being At this point the desired goal of the creative process is achieved the holy wedding hierogamos of poet and creative other occurs *No escribir* abandons the struggle of Canelo's previous books and carries out the method prescribed by her second poetics She recognizes that only the creative process can satisfy her desire and that love the dominant symbol for creation indeed allows the pain of poetic failure to cease Passion nonetheless must stop short of fulfillment since the written poem laden with the poet's gaze and subjectivity cannot exist apart from its shadow

Spurrier, Dan Watters, 2018-05-09 For the better part of a century the Shadow's sinister laughter brought the chill of fear to evil doers but in our modern times the streets of Manhattan have gone largely silent But he is not forgotten Not by the people he's saved Mary Jerez is one of those people The Shadow saved her from a horrifying school shooting Mary knows all too well what evil lurks in the hearts of men So when a horribly burnt man incredibly strong and fierce despite his terrible injuries arrives under her care as a resident at the hospital she believes she knows who he is too Is this mysterious man actually the Shadow and with Mary's help will evil doers again know what it means to fear his terrible justice Si Spurrier X Force X Men Legacy Judge Dredd and Daniel HDR Superman Cyborg bring the pulp icon into modern day in a tale full of deadly intrigue gun blazing action and a study of the nature of evil Los Angeles Air Force Base (AFB), Land Conveyance, Construction, and Development, 2003 Astral Sciences in Mesopotamia Hermann Hunger, David Pingree, 2015-11-02 Astronomy and astrology or the astral sciences played an enormous if not a key role in the political and religious life of the Ancient Near East and later of the Greek and Roman world This is the first comprehensive and up to date account of the origins of the astral sciences in the Ancient Near East Every type of Sumerian or Akkadian text dealing with descriptive or mathematical astronomy including many individual tablets are thoroughly dealt with All aspects such as the history of discovery reconstruction and interpretation come to the fore accompanied by a full bibliography At that the reader will find descriptions of astronomical contents an explanation of their scientific meaning and the place a given genre or tablet has in the development of astronomy both within the Mesopotamian culture and outside of it Because celestial omens are intimately related to astronomy in Mesopotamian science these are also discussed extensively The material is arranged both chronologically and thematically so as to help make Astral Sciences in Mesopotamia a reference work on the subject in its truest sense General Technical Report INT., 1995 **Sticks, Stones, and Shadows** Martin Isler, 2001 What do the pyramids of Egypt really represent What could have driven so many to so great and often so dangerous an effort Was the motivation religious or practical Illustrated with more than 300 photographs and drawings this book presents an original approach to the subject of pyramid building It reveals the connection between devices that served both a practical need for survival and a spiritual belief in gods and goddesses It examines Egyptian technologies and techniques from the origins of pyramid development to the step by step details of how the ground was leveled how the site was oriented and how the stone was raised and placed to meet at a distant point in the sky Here the author also asks and answers questions virtually ignored for the last century He discloses for example the ancient use of shadows now denigrated to the ornamental back yard sundial but once an important tool for telling the height of an object geographical directions the seasons of the year and the time of day He also reinterprets the ancient stretching of the cord ceremony which once was thought to have only religious significance but here is shown as the means of establishing the sides of a pyramid **Solar Energy Thermal Technology** Brian Norton, 2012-12-06 Solar Energy Technology deals with all aspects of solar energy systems The fundamentals of

predicting availability economic appraisal strategies specific collector sub systems including a proven analytical procedure for predicting performance and analyses of solar energy systems from dryers to greenhouses passive solar buildings to water pumps are covered in depth Researchers and technologists need to have an insight into the challenges implementation entails and this book presents practical constraints operational considerations and the latest research results The book should be of great interest to students as well as professionals undertaking feasibility studies development and implementation technical assistance and training assignments Political action and pressure groups will also find the text useful for developing energy policies
