Country Love and City Life Charles Henry St. John,1880 **Grasping Shadows** William Chapman Sharpe,2017-08-04 Grasping Shadows offers the most thorough examination of the cultural uses of shadows Exploring a myriad of major literary and artistic evocations of shadows Grasping Shadows puts forth a unifying theory for how shadows function and how they transformed our relationship to darkness and light **Bangkok Utopia** Lawrence Chua,2021-02-28 Utopia is a word not often associated with the city of Bangkok which is better known for its disorderly sprawl overburdened roads and stifling levels of pollution Yet as early as 1782 when the city was officially founded on the banks of the Chao Phraya river as the home of the Chakri dynasty its orientation was based on material and rhetorical considerations that alluded to ideal times and spaces The construction of palaces monastic complexes walls forts and canals created a defensive network while symbolically locating the terrestrial realm of the king within the Theravada Buddhist cosmos Into the twentieth century pictorial narrative and built representations of utopia were critical to Bangkok s transformation into a national capital and commercial entrep t But as older representations of the universe encountered modern architecture building technologies and urban planning new images of an ideal society attempted to reconcile urban based understandings of Buddhist liberation and felicitous states like nirvana with worldly models of political community like the nation state Bangkok Utopia outlines an alternative genealogy of both utopia and modernism in a part of the world that has often been overlooked by researchers of both It examines representations of utopia that developed in the city as expressed in built forms as well as architectural drawings building manuals novels poetry and ecclesiastical murals from its first general strike of migrant laborers in 1910 to the overthrow of the military dictatorship in 1973 Using Thai and Chinese language archival sources the book demonstrates how the new spaces of the city became arenas for modern subject formation utopian desires political hegemony and social unrest arguing that the modern city was a space of antinomy one able not only to sustain

heterogeneous temporalities but also to support conflicting world views within the urban landscape By underscoring the paradoxical character of utopias and their formal narrative expressions of both hope and hegemony Bangkok Utopia provides an innovative way to conceptualize the uneven economic development and fractured political conditions of contemporary global cities
