Simplicius Corollaries On Place And Time:

The Philosophy of the Commentators, 200-600 AD: Logic and metaphysics Richard Sorabji, 2005 The third volume of this invaluable sourcebook covers three main subject areas the metaphysics of Aristotle's logical works logic and the higher metaphysics of Neoplatonism *Neoplatonism* Pauliina Remes, 2014-12-05 Although Neoplatonism has long been studied by classicists until recently most philosophers saw the ideas of Plotinus et al as a lot of religious magical mumbo jumbo Recent work however has provided a new perspective on the philosophical issues in Neoplatonism and Pauliina Remes new introduction to the subject is the first to take account of this fresh research and provides a reassessment of Neoplatonism's philosophical credentials Covering the Neoplatonic movement from its founder Plotinus AD 204-70 to the closure of Plato's Academy in AD 529 Remes explores the ideas of leading Neoplatonists such as Porphyry Iamblichus Proclus Simplicius and Damascius as well as less well known thinkers Situating their ideas alongside classical Platonism Stoicism and the neo Pythagoreans as well as other intellectual movements of the time such as Gnosticism Judaism and Christianity Remes provides a valuable survey for the beginning student and non specialist *Corollaries on Place and Time* Simplicius (de Cilicie.), 1992 Simplicius surveys ideas about place and time from the preceding thousand years of Greek philosophy

Urmson, 2014-04-10 Is there such a thing as three dimensional space Is space inert or dynamic Is the division of time into past present and future real Does the whole of time exist all at once Does it progress smoothly or by discontinuous leaps Simplicius surveys ideas about place and time from the preceding thousand years of Greek Philosophy and reveals the extraordinary ingenuity of the late Neoplatonist theories which he regards as marking a substantial advance on all previous ideas **The Medieval Concept of Time** Pasquale Porro, 2021-08-04 This volume

examines the changing perceptions of time in the transition from the medieval debate to early modern philosophy Some of the foremost contemporary experts try to weave the various strands of the topic into a methodological and doctrinal whole The book consists of 21 studies 19 in English 2 in French subdivided into five main sections entitled respectively The Late Antique Legacy The Scholastic Debate Late Scholasticism Time and Medicine Early Modern Philosophy Themes discussed include the reception of Aristotle's doctrine of time the Augustinian and Neoplatonic heritage the concepts of divine eternity and angelic duration and the particular role attributed to time in medieval and early modern medicine This collection of studies aims at offering a comprehensive historico doctrinal analysis of one of the most fascinating topics in western

intellectual history **The Fate of Place** Edward Casey, 2013-05-13 In this imaginative and comprehensive study Edward Casey one of the most incisive interpreters of the Continental philosophical tradition offers a philosophical history of the evolving conceptualizations of place and space in Western thought Not merely a presentation of the ideas of other philosophers The Fate of Place is acutely sensitive to silences absences and missed opportunities in the complex history of philosophical approaches to space and place A central theme is the increasing neglect of place in favor of space from the seventh century A D onward amounting to the virtual exclusion of place by the end of the eighteenth century Casey begins with mythological and religious creation stories and the theories of Plato and Aristotle and then explores the heritage of Neoplatonic medieval and Renaissance speculations about space He presents an impressive history of the birth of modern spatial conceptions in the writings of Newton Descartes Leibniz and Kant and delineates the evolution of twentieth century phenomenological approaches in the work of Husserl Merleau Ponty Bachelard and Heidegger In the book s final section Casey explores the postmodern theories of Foucault Derrida Tschumi Deleuze and Guattari and Irigaray Space, Imagination and the Cosmos from Antiquity to the Early Modern Period Frederik A. Bakker, Delphine Bellis, Carla Rita Palmerino, 2019-02-05 This volume provides a much needed historically accurate narrative of the development of theories of space up to the beginning of the eighteenth century It studies conceptions of space that were implicitly or explicitly entailed by ancient medieval and early modern representations of the cosmos The authors reassess Alexandre Koyr s groundbreaking work From the Closed World to the Infinite Universe 1957 and they trace the permanence of arguments to be found throughout the Middle Ages and beyond By adopting a long timescale this book sheds new light on the continuity between various cosmological representations and their impact on the ontology and epistemology of space Readers may explore the work of a variety of authors including Aristotle Epicurus Henry of Ghent John Duns Scotus John Wyclif Peter Auriol Nicholas Bonet Francisco Suarez Francesco Patrizi Giordano Bruno Libert Froidmont Marin Mersenne Pierre Gassendi Gottfried Wilhelm Leibniz and Samuel Clarke We see how reflections on space imagination and the cosmos were the product of a plurality of philosophical traditions that found themselves confronted with and enriched by various scientific and theological challenges which induced multiple conceptual adaptations and innovations This volume is a useful resource for historians of philosophy those with an interest in the history of science and particularly those seeking to understand the historical background of the philosophy of space **Interrogating the Tradition** Charles E. Scott, John Sallis, 2000-01-06 Interrogating the Tradition interprets figures in the history of Western thought from a broad continental perspective Divided into three major sections hermeneutical thought Heidegger and the Greeks and the question of nature in German Idealism the question of origins is central throughout and takes various shapes all within the context of the history of Western philosophy Addressed are the form inquiries take into manners by which we receive our philosophical tradition the originary force of Plato and Aristotle in the formation of philosophical interpretations of time and human life and inceptual concepts

of nature in the nineteenth century The philosophers treated here are primarily ancient Greek and nineteenth century German but also included are careful discussions of Heidegger and Gadamer Coming from both sides of the Atlantic and representing various approaches to the issues the contributors showcase their work on one of the major cutting edges of philosophy Contributors to this book include Robert Bernasconi Walter Brogan Tina Chanter Fran oise Dastur John Ellis G nter Figal Rodolphe Gasch Jean Grondin David Farrell Krell Michael Naas James Risser John Russon John Sallis Charles E Scott Ben Vedder and Jason M Wirth Timing and Temporality in Islamic Philosophy and Phenomenology of Life Anna-Teresa Tymieniecka, 2007-09-19 From time immemorial concern with timing of life has been crucial for the regulation of human praxis as well as for the philosophical quest to understand existence by seeking its meaning The two used to inform each other until modernity when they parted In spite of the extensive progress in manipulating change and motion and of the abundance of metaphysical attempts to enlighten human beings about their fate the puzzling nature of temporality and timing of reality remains controversial The present collection of studies seeks a new answer by initiating a novel investigation informed by the ancient wisdom of the Greco Arabic Islamic sources and inheritance on the one side and the contemporary discernment of Occidental phenomenology of life on the other in a common dialogical effort to unravel this great enigma of existence Papers by Anna Teresa Tymieniecka William C Chittick Reza Akbarian Daniela Verducci Michael F Andrews Seyyed Mohammed Khamenei Nader El Bizri Mehdi Aminrazavi Massimo Durante Abdul Rahim Afaki Maria Chiara Teloni A L Samian Kathleen Haney Jad Hatem Robert J Dobie Michel Dion *The Elements of Avicenna's Physics* Andreas Lammer, 2018-02-05 This study is the first comprehensive analysis of the physical theory of the Islamic philosopher Avicenna d 1037 It seeks to understand his contribution against the developments within the preceding Greek and Arabic intellectual milieus and to appreciate his philosophy as such by emphasising his independence as a critical and systematic thinker Exploring Avicenna s method of teaching and learning it investigates the implications of his account of the natural body as a three dimensionally extended composite of matter and form and examines his views on nature as a principle of motion and his analysis of its relation to soul Moreover it demonstrates how Avicenna defends the Aristotelian conception of place against the strident criticism of his predecessors among other things by disproving the existence of void and space Finally it sheds new light on Avicenna s account of the essence and the existence of time For the first time taking into account the entire range of Avicenna s major writings this study fills a gap in our understanding both of the history of natural philosophy in general and of the philosophy of Avicenna in particular This monograph has been awarded the annual BRAIS De Gruyter Prize Kulturpreis Bayern in the Study of Islam and the Muslim World and the Iran World Award for Book of the Year 2020 *Damascius' Philosophy of Time* Pantelis Golitsis, 2023-06-19 The late Platonist philosopher Damascius both reassumed and rejuvenated the rich and long established Greek thinking about time In distinguishing between different perceptions of time by Plato Aristotle and his Neoplatonist predecessors Damascius offered novel perspectives which can be seen as

anticipating modern and contemporary theories of time such as McTaggart's series and presentism. The greatest merit of his philosophy of time however is his deep reflection on what it is for a living being to have its being in becoming as it happens with us human beings and how this relates to stillness, temporality and temporalization. Time is interpreted by Damascius not merely as a concomitant of the celestial motions nor as an abstract entity existing in the human soul but as a power of ordering which is active at different levels. Damascius' time comprises the biological and the historical time but is also the time that pertains to the essence and the activity of heaven in which there is neither past nor future. The present book explores the richness of Damascius' thought by going into the fundamental concepts of his philosophy of time: the indivisible now and the present time, the flowing now and the non-flowing now, the flowing time and the whole of time in which past, present and future coincide. Damascius fully developed his thoughts about time in his treatise *On Time* which is lost. The preserved fragments of this treatise are translated and annotated in an Appendix.

Medieval Islamic Civilization Josef W. Meri, 2006. Examines the socio-cultural history of the regions where Islam took hold between the 7th and 16th century. This two-volume work contains 700 alphabetically arranged entries and provides a portrait of Islamic civilization. It is of use in understanding the roots of Islamic society as well to explore the culture of medieval civilization.

Spatial Questions Rob Shields, 2013-07-11. Rob Shields provides here an immensely sophisticated and detailed examination of the topological turn. He has been examining these issues for some decades and this book will surely become the standard work on cultural and spatial topology. John Urry, Distinguished Professor, Department of Sociology, Lancaster University. Our understanding of space is crucial to the way in which we understand major social problems and issues and the way we develop and maintain our worldviews. Building from a history of philosophical and geographical theories of space, Shields presents the importance of spatialisation and cultural topology in social theory and the possibilities that lie within these theoretical tools. Innovative and thought-provoking, this book goes beyond traditional ideas of spatiality and temporality to understand the multiplicity of spatialisations and relates them to everyday life.

Space and Political Universalism in Early Modern Physics and Philosophy Pablo Bustinduy, 2024-03-05. How did early modern philosophy of space shape the modern concept of political universalism? In this book, Pablo Bustinduy persuasively argues that political universalism emerged from both the developments of Newtonian science and the formulation of the modern philosophy of the State. In the metaphysics of an open, empty, abstract and absolute space, Bustinduy suggests the universalist project of modern politics found its logical model and foundation. There, the anxiety of a dislocated world was overcome and the ontology of modern physics found a specific political expression that, despite being besieged by multiple crises, still animates our political imagination. By offering a political reading of early modern philosophy of space, *Space and Political Universalism in Early Modern Physics and Philosophy* reveals the connections between the logical development of early modern science, the contemporary elaborations of the philosophy of the State and the historical articulations of the Westphalian system, early capitalist social formations and the European colonial project. In

doing so it offers a powerful reflection on how we might detach democracy from the perilous metaphysics of infinite space that has engendered political violence and domination positing space as an emptiness that prevents the closure of the political itself

On Location Benjamin Morison, 2002-02-07 Aims to explain as carefully as possible Aristotle's account of place given in the Physics Book IV Chs 1-5 Also aims to rehabilitate it as a piece of philosophy after many centuries of its being dismissed as inadequate Discusses the importance of the concept of place to natural philosophy including the role of so called natural places in the explanation of the natural motion of the elements

St Theodore the Studite's Defence of the Icons Torstein Theodor Tollefsen, 2018-05-04 St Theodore the Studite's Defence of the Icons provides an investigation of the icon theology of St Theodore the Studite mainly as it is presented in his three refutations of the iconoclasts the *Antirrhetici tres adversus iconomachos* Torstein Theodor Tollefsen explores Theodore's philosophy of images namely his doctrine of images and his arguments that justify the legitimacy of images in general and of Christ in particular Tollefsen offers a historical theological and philosophical exploration of Theodore's doctrine of images and his arguments justifying the legitimacy of images and of Christ In addition to the main elements of Theodore's defence of the icon like the Christological issue the relation between image and prototype the question of veneration his explanation of why we may say of an image that this is Christ and his innovative thinking on the representative character of the icon the book has an introduction that places Theodore in the history of Byzantine philosophy he has some knowledge of traditional logical topics and is able to utilize argumentative forms in countering his iconoclast opponents The volume also provides an appendix which shows that the making of images is somehow natural given the character of Christianity as a religion

Plato's Timaeus, 2020-11-23 Plato's Timaeus brings together a number of studies from both leading Plato specialists and up and coming researchers from across Europe The contributions cover a wide variety of topics ranging from the literary form of the work to the ontology of sense perception and the status of medicine in Timaeus account Although informed by a commitment to methodological diversity the collection as a whole forms an organic unity opening fresh perspectives on widely read passages while shedding new light on less frequently discussed topics The volume thus provides a valuable resource for students and researchers at all levels whether their interest bears on the Timaeus as a whole or on a particular passage

The Temporal Mechanics of the Fourth Gospel Douglas Estes, 2008-01-01 By redefining narrative temporality in light of modern physics this book advances a unique and innovative approach to the deep seated temporalities within the Gospel of John and challenges the implicit assumptions of textual brokenness that run throughout Johannine
