

# Long Run firm equilibrium

# Longrun Economics

**Theodore Rosenof**

## **Longrun Economics:**

**Long-run Economics** Norman Clark, Calestous Juma, 2013-11-07 A major problem of conventional economic theory as applied to long run economic change is its unduly narrow and static character which compromises its capacity to handle conceptually a social process inherently systemic complex and dynamic At the same time there is a growing realization in relevant government and industrial circles reinforced by the example of Japan that effective economic policy making needs a strategic and therefore a technological content Long Run Economics suggests a more realistic conceptual framework for the analysis of economic and technological change Borrowing from other disciplines such as sociology psychology and biology the authors develop a model that is evolutionary and systemic in character Special emphasis is given to the role of information flows in the innovative process while the overall argument is illustrated by two case studies photovoltaics and fuel ethanol Finally the book stresses the strategic importance of science and technology policy and the role of appropriate institutions in facilitating long run economic change

**Economics in the Long Run** Theodore Rosenof, 2000-11-09 Though understandably preoccupied with the immediate problems of the Great Depression the generation of economists that came to the forefront in the 1930s also looked ahead to the long term consequences of the crisis and proposed various solutions to prevent its recurrence Theodore Rosenof examines the long run theories and legacies of four of the leading members of this generation John Maynard Keynes of Great Britain who influenced the New Deal from afar Alvin Hansen and Gardiner Means who fought over the direction of New Deal policy and Joseph Schumpeter an opponent of the New Deal Rosenof explores the conflicts that arose among long run theorists arguing that such disputes served eventually to set the stage for the emergence and domination of a short run Keynesian approach to economic policy that collapsed under the impact of 1970s stagflation Tracing the subsequent revival of long run theories Rosenof demonstrates their relevance to an understanding of the economy's problems over the past quarter century and to the current debate over public policy Originally published in 1997 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value

[Long-Run Economic Growth](#) Steven Durlauf, John F. Helliwell, Baldev Raj, 2012-12-06 One of the most enduring questions in economics involves how a nation could accelerate the pace of its economic development One of the most enduring answers to this question is to promote exports either because doing so directly influences development via encouraging production of goods for export or because export promotion permits accumulation of foreign exchange which permits importation of high quality goods and services which can in turn be used to expand the nation's production possibilities In either case growth is said to be export led the latter case is the so called two gap hypothesis McKinnon 1964 Findlay 1973 The early work on export led growth consisted of static cross country comparisons Michaely 1977 Balassa 1978 Tyler 1981 Kormendi and Meguire 1985

These studies generally concluded that there is strong evidence in favour of export led growth because export growth and income growth are highly correlated However Kravis pointed out in 1970 that the question is an essentially dynamic one as he put it are exports the handmaiden or the engine of growth To make this determination one needs to look at time series to see whether or not exports are driving income This approach has been taken in a number of papers Jung and Marshall 1985 Chow 1987 Serletis 1992 Kunst and Marin 1989 Marin 1992 Afentis and Serletis 1991 designed to assess whether or not individual countries exhibit statistically significant evidence of export led growth using Granger causality tests

**Understanding Long-Run Economic Growth** Dora L. Costa, Naomi R. Lamoreaux, 2011-10 The conditions for sustainable growth and development are among the most debated topics in economics and the consensus is that institutions matter greatly in explaining why some economies are more successful than others over time This book explores the relationship between economic conditions growth and inequality Introductory Economics Arleen J. Hoag, John H. Hoag, 2006 This carefully constructed textbook empowers the reader with an understanding of fundamental economic concepts There are 31 one concept chapters Each short chapter highlights one economic principle The student can study one concept and be reinforced by the learning process before proceeding to another The writing is lucid and at the student's level Self review exercises conclude each chapter The text is well integrated to show the relationship among the basic concepts and to offer a comprehensive overview of economics The one concept chapters provide organizational flexibility for the instructor There are eight modules The Economic Problem Price Determination Behind the Supply Curve Measuring the Economy The Level of Income Money Trade Conclusion A study guide is available on line without charge Each chapter in the text has a corresponding chapter in the study guide as well as an introduction to graphing **Demand, Complexity, and Long-Run Economic Evolution** Andreas Chai, Chad M. Baum, 2019-05-11 The purpose of this contributed volume is to consider how global consumption patterns will develop in the next few decades and what the consequences of that development will be for the economy policymakers and society at large In the long run the extent to which economic growth translates into better living conditions strongly depends on how rising affluence and new technologies shape consumer preferences The ongoing rise in household income in developing countries raises some important questions Will consumption patterns always continue to expand in the same manner as we have witnessed in the previous two centuries If not how might things evolve differently And what implications would such changes hold for not only our understanding of consumption behavior but also our pursuit of more sustainable societies Economics without Time G. Snooks, 1993-08-03 This is a book about real time in economics a dimension increasingly unused by the leading edge of the profession This it is argued has serious implications for economics role as the premier policy advising source for national governments and international organisations It is also a book about the great waves of economic change that are surging out of the distant past and into the future waves of change that economists have failed even to identify let alone analyse It however challenges economics to put

its house in order before it is engulfed by this rising tide But the question is however will economics have time **Economic Development in the Long Run** A.J. Youngson, 2013-11-05 This book enlarges our understanding of economic development by bringing together items or aspects of historical experience relevant to the present day problems of developing countries by looking at the problems over a longer period than is usual in development economics so that the influence of underlying forces may be made evident and by comparing the experiences of different countries in similar situations A variety of countries are dealt with and most of the significant problems in development economics are covered in one context or another The authors of this symposium each an internationally acknowledged authority offer expert assessments of development as it has actually taken place The chapter by Professor Rosovsky shows what is significant what is peculiar and what could be imitated in Japan Professor Black takes the little studied case of Ireland and Dr Macpherson gives an informed and balanced account of Indian development This unique book was first published in 1972 **The Journal of Agricultural Economics Research**, 1990 **Demographic Change and Long-Run Development** Matteo Cervellati, Uwe Sunde, 2017-10-27 Recent approaches to economic demography investigating the effect of the transition to low mortality and low fertility on economic development Over the last two hundred years mortality and fertility levels in the Western world have dropped to unprecedented levels This demographic transition was accompanied by an economic transition that led to widespread education and economic growth after centuries of near stagnation At the same time other changes have occurred in family structures culture and the organization of society Economists have only recently begun to take into account the demographic transition from high mortality and high fertility when modeling and researching economic development This CESifo volume reviews recent approaches to economic demography considering such topics as the bio geographic origins of comparative development differences the role of health improvements and mortality decline as well as physiological familial cultural and social aspects After an overview of the study of demography and economic demography the chapters cover subjects including the Neolithic era and the period of the formation of states and social institutions longevity and economic growth household decision making and fertility land inequality education and marriage in nineteenth century Prussia and caste systems and technology in pre modern societies The book concludes with a call for further investigation of the institutional and social factors that influence demographics and economies suggesting that unified growth theory offers a potential approach to studying development Contributors Matteo Cervellati Francesco Cinnirella David de la Croix Carl Johann Dalgaard Matthias Doepke Elena Esposito Davide Fiaschi Tamara Fioroni Oded Galor Boris Gershman Erik Hornung Fabian Kindermann Nils Petter Lagerlöf Holger Strulik Uwe Sunde David N Weil
