not on displacement but on survival Persistence is closely tied to the gradual nature of technological change The contrasts between independent commercial artisans and outwork weavers are striking Displacement occurs but only among artisans devoting their time to independent workshop weaving Alternatively outwork weavers adapted to changing markets and survived The design and development of spinning and weaving device is stressed as are the roles of economic conditions management organization size of firms political implications and social factors contribute to the impact of technological change on outwork and craft weavers The Vertical Loom Jules Klot,1976 Silk ,1908
