about the Cosmic Doctrine teaching has been the almost total emphasis in explaining evolution simply as being the psychic nuts and bolts of God Leaving one with the impression that God may be reduced from a Great and Infinite Being to a kind of mechanical Newtonian clockwork However there is much more to it than that The higher up the planes you go although esoteric theory tends to describe it as all more abstract in actual fact things become so much more complex vibrant vivid bursting and brimming with life in incredible profusion It is another form of experience however The broadest though simple analogy would be to liken the existence on the higher levels as something after the order of a Bach fugue which could indeed seem to some a rather dry abstraction but which to the attuned and educated ear is a revelation of divinity harmony and celestial order The reality is not easy to describe in concepts let alone in words How best to describe a rainbow to a blind man
