Los Precios Del Trigo En La Historia Colonial De Mxico:

Los precios del trigo en la historia colonial de México Virginia García Acosta, 1988 Que Vivan Los Tamales! Jeffrey M. Pilcher, 1998 Connections between what people eat and who they are between cuisine and identity reach deep into Mexican history beginning with pre Columbian inhabitants offering sacrifices of human flesh to maize gods in hope of securing plentiful crops This cultural history of food in Mexico traces the influence of gender race and class on food preferences from Aztec times to the present and relates cuisine to the formation of national identity The metate and mano used by women for grinding corn and chiles since pre Columbian times remained essential to preparing such Mexican foods as tamales tortillas and mole poblano well into the twentieth century Part of the ongoing effort by intellectuals and political leaders to Europeanize Mexico was an attempt to replace corn with wheat But native foods and flavors persisted and became an essential part of indigenista ideology and what it meant to be authentically Mexican after 1940 when a growing urban middle class appropriated the popular native foods of the lower class and proclaimed them as national cuisine **Las reformas borbónicas y el nuevo orden colonial** Pedro Pérez Herrero, Francisco de Solano, José María Muriá, Clara Bargellini, Guadalupe Jiménez Codinach, 2020-06-30 Este libro aborda las formas y los efectos de las transformaciones que practicaron los hombres de la llamada Edad de la Raza El marco del Coloquio Internacional Las reformas borbónicas y el nuevo orden colonial destacados historiadores de México y España plantearon imaginativas vertientes de análisis de las características más notables de la época aludida tales como la economía el espacio las jurisdicciones civiles el arte y la transición al período independiente *Desastres agrícolas en México: Epocas prehispánica y colonial (958-1822)* Virginia García Acosta, Juan Manuel Pérez Zevallos, América Molina del Villar, 2003 El primer tomo de la presente serie reúne la información de más de tres mil fichas que forman el catálogo y ofrece un estudio introductorio que resume los logros de la historiografía mexicana o mexicanista en esta materia así como las perspectivas y los enfoques teóricos que han orientado los estudios sociales sobre desastres *Rischio, catastrofe e gestione dell'emergenza nel Mediterraneo occidentale e in Ispanoamerica in età moderna : omaggio a Jean-Philippe Luis* Armando Alberola Romá, Domenico Cecere, 2022-05-04 Italiano Il libro il primo risultato di un progetto di ricerca interdisciplinare e internazionale sui disastri di origine naturale verificatisi nei territori governati dalle monarchie borboniche tra il XVIII secolo e l'inizio del XIX I dodici saggi che lo compongono esplorano le strategie e le pratiche attraverso cui istituzioni e società cercarono di gestire mitigare e prevenire gli effetti catastrofici di eruzioni terremoti inondazioni carestie ed epidemie in territori geograficamente lontani e diversi tra loro dal Mediterraneo occidentale all'America centrale e meridionale tra l'età dei Lumi e quella delle Rivoluzioni Sebbene queste aree fossero governate da membri della stessa dinastia l'organizzazione politico amministrativa e i sistemi giuridici erano differenti e diverse erano anche le strategie di gestione dell'emergenza Il progetto ha coinvolto tre gruppi di ricerca incardinati in Università europee e ispano americane coordinati da Jean Philippe Luis Armando Alberola e Domenico Cecere Il volume

dedicato alla memoria di Jean Philippe Luis English The volume includes a significant part of the findings of an interdisciplinary and international research project on disasters that occurred in the territories under the Bourbon monarchies between the 18th and early 19th centuries It is composed of twelve essays that explore the strategies and practices by which institutions and societies sought to manage mitigate and prevent the catastrophic effects of eruptions earthquakes floods famine and epidemics The articles address several territories that are geographically distant and widely different from each other from the western Mediterranean to Central and South America between the Age of Enlightenment and the Age of Revolutions Although these areas were ruled by members of the same dynasty the political and administrative structures and legal systems were different and the emergency management strategies were dissimilar too The project involved three research groups based in European and Latin American universities coordinated by Jean Philippe Luis Armando Alberola and Domenico Cecere The volume is dedicated to the memory of Jean Philippe Luis Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin, 2008-03-12 Here at last is the massively updated and augmented second edition of this landmark encyclopedia It contains approximately 1000 entries dealing in depth with the history of the scientific technological and medical accomplishments of cultures outside of the United States and Europe The entries consist of fully updated articles together with hundreds of entirely new topics This unique reference work includes intercultural articles on broad topics such as mathematics and astronomy as well as thoughtful philosophical articles on concepts and ideas related to the study of non Western Science such as rationality objectivity and method You ll also find material on religion and science East and West and magic and science *Landscapes of Power and Identity* Cynthia Radding, 2006-01-18 This comparative frontier history explores the role that natural environments played in shaping the contours of European indigenous encounters and processes of colonization **Colonial Cataclysms** Bradley Skopyk, 2020-04-14 The contiguous river basins that flowed in Tlaxcala and San Juan Teotihuacan formed part of the agricultural heart of central Mexico As the colonial project rose to a crescendo in the sixteenth and seventeenth centuries the Indigenous farmers of central Mexico faced long term problems standard historical treatments had attributed to drought and soil degradation set off by Old World agriculture Instead Bradley Skopyk argues that a global climate event called the Little Ice Age brought cold temperatures and elevated rainfall to the watersheds of Tlaxcala and Teotihuacan With the climatic shift came cataclysmic changes great floods human adaptations to these deluges and then silted wetlands and massive soil erosion This book chases water and soil across the colonial Mexican landscape through the fields and towns of New Spain s Native subjects and in and out of some of the strongest climate anomalies of the last thousand or more years The pursuit identifies and explains the making of two unique ecological crises the product of the interplay between climatic and anthropogenic processes It charts how Native farmers responded to the challenges posed by these ecological rifts with creative use of plants and animals from the Old and New Worlds environmental engineering and

conflict within and beyond the courts With a new reading of the colonial climate and by paying close attention to land water and agrarian ecologies forged by farmers Skopyk argues that colonial cataclysms forged during a critical conjuncture of truly unprecedented proportions a crucible of human and natural forces unhinged the customary ways in which humans organized thought about and used the Mexican environment This book inserts climate earth water and ecology as significant forces shaping colonial affairs and challenges us to rethink both the environmental consequences of Spanish imperialism and the role of Indigenous peoples in shaping them *Problemas demográficos vistos desde la historia* América Molina del

Eighteenth-Century Mexico Eric Van Young, 2006-06-01 This classic history of the Mexican hacienda from the colonial period through the nineteenth century has been reissued in a silver anniversary edition complete with a substantive new introduction and foreword Eric Van Young explores 150 years of Mexico's economic and rural development a period when one of history's great empires was trying to extract more resources from its most important colony and when an arguably capitalist economy was both expanding and taking deeper root The author explains the development of a regional agrarian system centered on the landed estates of late colonial Mexico the central economic and social institution of an overwhelmingly rural society With rich empirical detail he meticulously describes the features of the rural economy including patterns of land ownership credit and investment labor relations the structure of production and the relationship of a major colonial city to its surrounding area The book's most interesting and innovative element is its emphasis on the way the system of rural economy shaped and was shaped by the internal logic of a great spatial system the region of Guadalajara Van Young argues that Guadalajara's population growth progressively integrated the large geographical region surrounding the city through the mechanisms of the urban market for grain and meat which in turn put pressure on local land and labor resources Eventually this drove white and Indian landowners into increasingly sharp conflict and led to the progressive proletarianization of the region's peasantry during the last decades of the Spanish colonial era It is no accident given this history that the Guadalajara region was one of the major areas of armed insurrection for most of the decade during Mexico's struggle for independence from Spain By highlighting the way haciendas worked and changed over time this indispensable study illuminates Mexico's economic and social history the movement for independence and the origins of the Mexican Revolution

Mercado regional y mercado urbano en Michoacán y Valladolid, 1778-1809 Jorge Silva Riquer, 2008 El libro aborda la problemática acerca de la integración del mercado interno colonial en el occidente de Nueva España afines del siglo XVIII El espacio de análisis está determinado por varios factores que buscan demostrar y explicar dicho mercado a

partir de la integración de una economía de magnitud media que estaba integrada a los diversos circuitos de circulación e intercambio establecidos a partir de la demanda agregada que generó la minería de plata del Bajío colonial. La importancia de centros mercantiles con características propias como el caso de Michoacán permiten entender la integración del espacio con base en el intercambio comercial.

El futuro de los jóvenes pobres en México David Vázquez Salguero, José Antonio Serrano Ortega, Diana Guillén Rodríguez, Gabriela Sánchez López, Paloma Paredes Bañuelos, 2022-07-27 Este libro resultado de un amplio estudio que se desarrolló desde San Cristóbal en Chiapas hasta Tijuana en Baja California muestra quiénes son quienes han experimentado cómo viven y cuál es la actualidad de los jóvenes de bajos ingresos en México. Pero además profundiza en sus perspectivas de futuro y propone de manera clara algunas políticas de Estado que podrán mejorar su presente y su futuro y por ende el de todos nosotros. Los autores son investigadores de centros Conacyt que se asociaron para realizar este trabajo.

Iberoamérica y España antes de las independencias, 1700-1820: Jorge Gelman, Enrique Llopis, Carlos Marichal, 2015-03-26 El presente libro permite poner en perspectiva comparada un conjunto de trabajos que reconstruyen y analizan el desempeño de las economías y la fiscalidad en España y varias regiones del mundo colonial ibérico. México, Perú, Nueva Granada, Colombia, Cuba, el Río de la Plata y Brasil durante una centuria. Se presta una especial atención al papel ejercido por las reformas ilustradas borbónicas en el ámbito hispánico y pombalinas en el portugués en ese desempeño pero además se vincula dicho comportamiento económico por primera vez para un amplio conjunto regional con las frecuentes guerras que impactaron de manera profunda a todo el mundo atlántico en el último cuarto del siglo XVIII y los inicios del XIX.

La Independencia Antonio Annino, Rafael Rojas, 2019-01-10 La independencia de México es el acontecimiento fundacional que ha producido casi todos los símbolos patrios y muchas de las ideas e instituciones centrales de la nación moderna. Casi desde su origen y hasta la fecha cientos de libros han dado cuenta de la lucha emancipatoria y sus consecuencias pero pocos han hecho una síntesis tan acertada y reunido tan amplia bibliografía como esta obra. La bibliografía que acompaña a estos dos ensayos conforma una guía para transitar por los textos clave generados en los siglos XIX y XX.

Mejor comida para todos Luis Osmar Pedroza Ortega, 2024-01-05 La alimentación es un tema deleitoso no sólo para conocer por mera cultura general sino para leer, escribir e investigar sobre ella. En México la alimentación está íntimamente ligada con la historia nacional: se han creado mitos culinarios y utilizado a la cocina como un elemento constitutivo de la identidad. No obstante se han dejado de lado los procesos económicos, políticos y sociales que impactaron en las formas de producir, abastecer y consumir los alimentos hasta aquellos platillos baluartes de la culinaria nacional. Con un punto de vista original esta obra analiza la alimentación mexicana durante gran parte del siglo XX partiendo del estudio de las representaciones creadas por el Estado mexicano a través de diversos materiales: recetas, cortometrajes y promocionales que difundieron un discurso oral, escrito, visual y audiovisual sobre los hábitos higiénicos, la nutrición, la producción, abastecimiento y consumo de alimentos básicos así como de la idea de una alimentación saludable y
