almost every human need That led societies to develop specific technologies to acquire manage transform elaborate use and consume these resources The materials provided by woodlands covered a wide range of necessities such as food shelter clothing or tool production but they also provided resources employed for waterproofing dying medicine and adhesives among many others All these technological processes and uses are commonly difficult to identify through the archaeological record Some materials are exclusively preserved by charring or in anaerobic conditions at very exceptional sites or leave only a very slight trace behind them e g containers Consequently they have received far less attention in archaeobotanical studies compared to other kind of plant materials consumed as food or firewood This book provides an overview of technological uses of plants from the Palaeolithic to the Post Medieval period This collection of papers presents different archaeobotanical and archaeological studies dealing with the use of a wide range of woodland resources most of them among the less visible for archaeology such as bast fibres and fungi These papers present different approaches for their study combining archaeology archaeobotany and ethnoarchaeology

Bats of Colima, Mexico Cornelio Sánchez-Hernández, María de Lourdes Romero-Almaraz, Gary D. Schnell, Michael L. Kennedy, Troy L. Best, Robert D. Owen, Sara B. González-Pérez, 2016-09-16 The tiny state of Colima on Mexico's Pacific coast is one of the three most biodiverse hot spots in the world Straddling temperate

and tropical zones with rugged topography ranging from a volcanic mountaintop to sandy beaches the state shelters nearly half 66 of Mexico's species of Chiroptera or bats In this volume studded with more than 200 full color photographs and maps a team of mammalogists from Mexico and the United States marshal information gathered over decades to present a comprehensive portrait of the bats of Colima Bats of Colima Mexico provides readers with the tools necessary to understand and identify each species of Colima's bat population from the sac winged bats of family Emballonuridae to the mustached bats of family Mormoopidae A dichotomous key indicates how each bat can be differentiated and describes the seven families within which they fall The authors provide an in depth description of each species including a photograph a map of its distribution across Colima and information on habitat reproduction conservation status and more By calling attention to Colima's rich chiropteran fauna Bats of Colima Mexico should not only foster interest in the rich biodiversity of the region but also nurture further collaboration between scientists and naturalists in the United States and Mexico *Costa Rican*

Frontier Kurt J Gron, Lasse Sørensen, Peter Rowley-Conwy, 2020-02-15 All farming in prehistoric Europe ultimately came from elsewhere in one way or another unlike the growing numbers of primary centers of domestication and agricultural origins worldwide This fact affects every aspect of our understanding of the start of farming on the continent because it means that ultimately domesticated plants and animals came from somewhere else and from someone else In an area as vast as Europe the process by which food production becomes the predominant subsistence strategy is of course highly variable but in a sense the outcome is the same and has the potential for addressing more large scale questions regarding agricultural origins

Therefore a detailed understanding of all aspects of farming in its absolute earliest form in various regions of Europe can potentially provide a new perspective on the mechanisms by which this monumental change comes to human societies and regions In this volume we aim to collect various perspectives regarding the earliest farming from across Europe Methodological approaches archaeological cultures and geographic locations in Europe are variable but all papers engage with the simple question What was the earliest farming like This volume opens a conversation about agriculture just after the transition in order to address the role incoming people technologies and adaptations have in secondary adoptions The book starts with an introduction by the editors which will serve to contextualize the theme of the volume The broad arguments concerning the process of neolithisation are addressed and the rationale for the volume discussed Contributions are ordered geographically and chronologically given the progression of the Neolithic across Europe The editors conclude the volume with a short commentary paper regarding the theme of the volume

Mammals of North America - Volume 1 Sergio Ticul Álvarez-Castañeda, 2024-11-15 The book synthesizes nomenclature systematics and descriptions of North American mammal species Clear simple and illustrated identification keys are provided to make knowledge of mammals easier and facilitate the training both students and professionals in the field including readers without extensive experience Descriptions of the different species are provided up to Order highlighting the diagnostic features that allow identifying them promptly while the reader learns how to make subsequent identifications without having the book at hand Each species comes with potential distribution maps based on existing records in the main museums of North America The book includes the description characteristics and distribution maps of the 781 species with range in the North America subcontinent
