Nasser and the Missile Age in the Middle East Owen L. Sirrs, 2007-01-24 Egyptian efforts to acquire long range surface to surface missiles in the early 1960s carry important lessons for our time when weapons of mass destruction and charges of politicizing intelligence are key issues This new study traces the history of the early Egyptian ballistic missile program which began with the successful recruitment of German scientists who had experience in Hitler s V1 and V2 missile projects Yet even as these Germans began their work on developing missiles for Egyptian President Gamal Abdel Nasser Israeli intelligence was busy collecting information on their activities sparking a crisis in the Israeli leadership as top Israeli officials anxiously debated strategies to grapple with this new threat to their national security Ultimately they adopted a multifaceted approach that included intimidation of the scientists and their families appeals to the West German government to order the scientists recall and an attempt to involve the US government in the intricacies of the Arab Israeli conflict Drawing extensively on material from recently declassified US government documents this new major work demonstrates how Nasser s missile program played an instrumental role in cementing the US Israeli national security relationship The book concludes with several key lessons that can help stem the global proliferation of advanced weapons This book will be of great interest to scholars of proliferation international relations the Middle East disarmament and security studies in general

Reconstructing a Shattered Egyptian Army Youssef Aboul-Enein, 2014-06-15 Central to CDR Youssef Aboul Enein s career has been the mission to introduce America s military leaders to Arabic works of military significance Just like American military leaders who had an obsession for all things Russian during the Cold War in order to understand the

Soviets the war on al Qaida and the complex nuances of the Arab Spring demand a deeper comprehension of the Middle East from direct sources The memoirs of General Mohamed Fawzi Egyptian War Minister from 1967 to 1971 were first published in 1984 but his work has not been translated and remains undiscovered by English speaking readers Many in the United States Armed Services have yet to be introduced to his ideas perspectives and the seeds by which the 1973 Yom Kippur War were laid In this new contribution to his series of essays written for Infantry Journal Aboul Enein has determined to bring to life the military thoughts of this Arab War Minister This book is a joint Infantry Naval Institute Press project that has condensed the entire collection of essays on Fawzi to a single volume to provide future generations of America's military leaders with access his ideas Fawzi is unique among Arab generals for his scathing critique of his own armed forces and from his critical examination of what went wrong in 1967 he was able to slowly resurrect the Egyptian Armed Forces to a level that enabled Sadat to consider an offensive in 1973 This Egyptian general will provide insights into the level of Soviet cooperation and military aid provided Egypt after the 1967 Six Day War known simply in Arabic by one word al Naksah the setback not to be confused with the 1948 Arab Israeli War known by one word al Nakbah the catastrophe While Fawzi lapses into conspiracy indulges in wishful thinking and employs the language of pan Arabism on occasion much like Soviet military theorists couched their ideas in Marxist Leninist rhetoric this will not stop serious American students of war from recognizing his brilliance about the lessons learned from the crushing defeat of Egyptian arms in the 1967 Six Day War

Death Dust William C. Potter, Sarah Bidgood, Samuel Meyer, Hanna Notte, 2023-12-19 The postwar period saw increased interest in the idea of relatively easy to manufacture but devastatingly lethal radiological munitions whose use would not discriminate between civilian and military targets *Death Dust* explores the largely unknown history of the development of radiological weapons RW weapons designed to disperse radioactive material without a nuclear detonation through a series of comparative case studies across the United States the Soviet Union the United Kingdom Iraq and Egypt The authors illuminate the historical drivers of and impediments to radiological weapons innovation They also examine how new dire geopolitical events such as the war in Ukraine could encourage other states to pursue RW and analyze the impact of the spread of such weapons on nuclear deterrence and the nonproliferation regime *Death Dust* presents practical necessary steps to reduce the likelihood of a resurgence of interest in and pursuit of radiological weapons by state actors **Ballistic**

Missile Proliferation in Non-Nuclear States Karim El-Baz, Ali Ghanbarpour-Dizboni, 2024-08-14 This book offers an exploration of ballistic missile proliferation in the Middle East and also delves into the geopolitical landscape to unveil a narrative of contemporary Middle Eastern history The central focus of this book is to decipher the pivotal moments when three regional powers of the Middle East Egypt Saudi Arabia and Iran embraced ballistic capabilities as a strategic response to military vulnerabilities The authors contend that the very essence of ballistic proliferation incorporates a tactical rationale provided by military needs that varies from one state to another and it is upon the assessment of these military needs that the

decision to procure ballistic missiles is made Offering a blend of theoretical insights and primary sources based case studies this book dissects the decision making processes that spurred these states to choose ballistic missiles despite their inefficiencies in delivering conventional payloads The absence of an effective air force emerges as a catalyst triggering what the authors term a moment of ballistic consciousness Spanning three diverse regimes the work provides a rich historical tapestry and untangles the complexities of political decisions with military implications providing a fresh perspective on global power dynamics This narrative sheds light on the intersection of military strategy geopolitical realities and the pursuit of ballistic capabilities that shapes the world s security landscape This book will be of much interest to students of arms control nuclear proliferation Middle Eastern politics and International Relations

The United States and Europe John Baylis, Jon Roper, 2007-01-24 A penetrating new examination of the triangular political and cultural relationship between America Britain and continental Europe This relationship is both fraught and dynamic Post war reconstruction of Europe brought integration Creating a United States of Europe was a goal shared by many Americans Yet the contemporary War on Terror has redefined relationships between America Britain old and new Europe For Britain the Channel seems wider than the Atlantic although geopolitically it is part of Europe This book brings together experts from Britain Europe and America to explore the complexities of contemporary cultural and political relationships considering the challenges that have been met

and those that have to be faced *The Myth of the Poor Man's Atomic Bomb and the Politics of Proliferation* Biejan Poor Toulabi, 2021-04-07 Preventing the spread of weapons of mass destruction has been an important policy priority in the past decades This dissertation questions the prevailing view that chemical and biological weapons CBWs are a poor man's atomic bomb that are particularly attractive to developing countries that cannot acquire nuclear weapons The study shows that vague unverifiable and inflated threat assessments from US government sources have played an important role in sustaining this myth A unique dataset of CBW development programs in the period 1946-2010 demonstrates that significantly fewer countries have had CBW programs than often thought and that especially Third World countries have been incorrectly accused of pursuing or possessing CBWs *The EU and the European Security Order* Rikard Bengtsson, 2009-09-10 This book attempts to conceptualise EU action in the field of regional security Drawing on constructivist theory the framework of the book focuses on the meeting or interface of actors a situation reflecting the mutual construction of self other and situation The analytical framework applied here to European security politics is potentially open ended as the theoretical logic that informs the framework is general and abstract in character and not limited to state actors in an international setting The empirical aim of this book is to further our understanding of the EU as a security actor in a regional perspective The book thus links International Relations scholarship with that of EU studies By analyzing a number of different interfaces such as with Russia the US and other states we can learn more about the circumstances and preconditions and with what resources and power the EU acts in a regional security setting This book will be of great interest to students of European security EU policy IR theory and security studies in general Rikard Bengtsson is Assistant Professor of Political Science at Lund University Sweden He has a PhD in Political Science from Lund University Sweden **War, Torture and Terrorism** Anthony F. Lang, Jr., Amanda Russell Beattie, 2008-10-27 This book seeks to demonstrate how rules not only guide a variety of practices within international politics but also contribute to the chaos and tension on the part of agents in light of the structures they sustain Four central themes practice legitimacy regulation and responsibility reflect different dimensions of a rule governed political order The volume does not provide a single new set of rules for governing an increasingly chaotic international system Instead it provides reflections upon the way in which rules can and cannot deal with practices of violence While many assume that obeying the rules will bring more peaceful outcomes the chapters in this volume demonstrate that this may occur in some cases but more often than not the very nature of a rule governed order will create tensions and stresses that require a constant attention to underlying political dynamics This wide ranging volume will be of great interest to students of International Law International Security and IR theory
