Thommessen,2013-11-05 An important tool for researchers and decision makers alike Gro Harlem Brundtland Director General World Health Organization WHO An invaluable source for everyone who needs to be up to date on international efforts to solve global environmental challenges Unique in its presentations of the interrelationship between treaties IGO NGOs and governments Jonathan Lash President World Resources Institute WRI The essential reference to all the rapidly multiplying international agreements on environment and development issues This ninth annual edition of the Yearbook demonstrates the international community s position on specific environment and development problems the main obstacles to effective international solutions and how to overcome them It assesses both the achievements and shortcomings of co operation distinguishing between the rhetoric and the reality of environment world politics Contents Current Issues and Key Themes Agreements on Environment and Development Systematically listed key data and illustrations concerning the most important international agreements presented on the basis of information from the organizations in question and other sources covering such matters as objectives scope time and place of establishment status of participation affiliated instruments and organizations major activities secretariat finance rules and standards monitoring and implementation decision making bodies key publications Internet sources This edition includes the new International Treaty on Plant Genetic Resources for Food and Agriculture Intergovernmental Organizations IGOs including UN specialized agencies objectives type of organization membership date of establishment secretariat activities decision making bodies finance key publications Internet sources International Non governmental Organizations NGOs objectives type of organization membership date of establishment secretariat activities budget key publications Internet sources Originally published in 2002 Solid Waste: Assessment, Monitoring and Remediation I. Twardowska,H.E. Allen,A.F. Kettrup,W.J. Lacy,2004-04-22 This book covers a broad group of wastes from biowaste to hazardous waste but primarily the largest by mass and volume group of wastes that are not hazardous but also are not inert and are problematic for three major reasons 1 they are difficult to manage because of their volume usually they are used in civil engineering as a common fill etc where they are exposed to environmental conditions almost the same way as at disposal sites 2 they are not geochemically stable and in the different periods of

environmental exposure undergo transformations that might add hazardous properties to the material that are not displayed when it is freshly generated 3 many designers and researchers in different countries involved in waste management are often not aware of time delayed adverse environmental impact of some large volume waste and also do not consider some positive properties that may extend the area of their environmentally beneficial application The Global Environment and International Law Joseph F. C. DiMento, 2010-01-01 2004 A Choice Outstanding Academic Book International law has become the key arena for protecting the global environment Since the 1970s literally hundreds of international treaties protocols conventions and rules under customary law have been enacted to deal with such problems as global warming biodiversity loss and toxic pollution Proponents of the legal approach to environmental protection have already achieved significant successes in such areas as saving endangered species reducing pollution and cleaning up whole regions but skeptics point to ongoing environmental degradation to argue that international law is an ineffective tool for protecting the global environment In this book Joseph DiMento reviews the record of international efforts to use law to make our planet more livable He looks at how law has been used successfully often in highly innovative ways to influence the environmental actions of governments multinational corporations and individuals And he also assesses the failures of international law in order to make policy recommendations that could increase the effectiveness of environmental law He concludes that a supranational model is not the preferred way to influence the actions of sovereign nations and that international environmental law has been and must continue to be a laboratory to test approaches to lawmaking and implementation for the global community
