National Deconstruction Violence Identity And Justice In Bosnia:

National Deconstruction David Campbell, How did Bosnia once a polity of intersecting and overlapping identities come to be understood as an intractable ethnic problem David Campbell pursues this question and its implications for the politics of community democracy justice and multiculturalism through readings of media and academic representations of the conflict in Bosnia National Deconstruction is a rethinking of the meaning of ethnic nationalist violence and a critique of the impoverished discourse of identity politics that crippled the international response to the Bosnian crisis Rather than assuming the preexistence of an entity called Bosnia Campbell considers the complex array of historical statistical cartographic and other practices through which the definitions of Bosnia have come to be These practices traverse a continuum of political spaces from the bodies of individuals and the corporate body of the former Yugoslavia to the international bodies of the world community Among the book s many original disclosures arrived at through a critical reading of international diplomacy is the shared identity politics of the peacemakers and paramilitaries Equally significant is Campbell s conclusion that the international response to the Bosnian war was hamstrung by the poverty of Western thought on the politics of heterogeneous communities Indeed he contends that Europe and the United States intervened in Bosnia not to save the ideal of multiculturalism abroad but rather to shore up the nationalist imaginary so as to contain the ideal of multiculturalism at home By bringing to the fore the concern with ethics politics and responsibility contained in more traditional accounts of the Bosnianwar this book is a major statement on the inherently ethical and political assumptions of deconstructive thought and the reworkings of the politics of community it enables

home By bringing to the fore the concern with ethics politics and responsibility contained in more traditional accounts of the Bosnianwar this book is a major statement on the inherently ethical and political assumptions of deconstructive thought and the reworkings of the politics of community it enables **Documenting the Undocumented** Veronica P. Fynn,2010 Proceedings of the annual conference held Apr 16 17 2009 at York University **Ontological Security in International Relations** Brent J. Steele,2008-03-10 The central assertion of this book is that states pursue social actions to serve self identity needs even when these actions compromise their physical existence Three forms of social action sometimes referred to as motives of state behaviour moral humanitarian and honour driven are analyzed here through an ontological security approach Brent J Steele develops an account of social action which interprets these behaviours as fulfilling a nation state s drive to secure self identity through time The anxiety which consumes all social agents motivates them to secure their sense of being and thus he posits that transformational possibilities exist in the Self of a nation state The volume consequently both challenges and complements realist liberal constructivist and post structural accounts to international politics Using ontological security to interpret three cases British neutrality during the American Civil War 1861 1865 Belgium s decision to fight Germany in 1914 and NATO s 1999 Kosovo intervention the book concludes by discussing the importance for self interrogation in both the study and practice of international relations Ontological Security in International Relations will be of particular interest to students and researchers of international politics international ethics international relations and security studies **Genocide, Risk and Resilience** B. Ingelaere,S. Parmentier,2013-11-13 This interdisciplinary volume aims to understand the linkages between the origins and aftermaths of genocide Exploring social dynamics and human behaviour this collection considers the interplay of various psychological political anthropological and historical factors at work in genocidal processes The Edge of Law Alex Jeffrey,2019-12-19 The Edge of Law explores the spatial implications of establishing a new legal institution in the wake of violent conflict Using the example of the establishment of the War Crimes Chamber of the Court of Bosnia and Herzegovina Alex Jeffrey argues that legal processes constantly demarcate a line of inclusion and exclusion materially territorially and corporally In contrast to accounts that have focused on the judicial outcomes of these transitional justice efforts The Edge of Law draws on long term fieldwork in Bosnia and Herzegovina to focus on the social and political consequences of the trials tracing the fraught mechanisms that have been used by international and local political elites to convey their legitimacy This book will be of interest to socio legal and geographical scholars working in the fields of transitional justice legal systems critical geopolitics and criminology **Meaning and International Relations** Peter Mandaville,Andrew Williams,2015-04-15 This innovative volume brings together specialists in international relations to tackle a set of difficult questions about what it means to live in a globalized world where the purpose and direction of world politics are no longer clear cut What emerges from these essays is a very clear sense that while we may be living in an era that lacks a single universal purpose ours is still a world replete with meaning The authors

in this volume stress the need for a pluralistic conception of meaning in a globalized world and demonstrate how increased communication and interaction in transnational spaces work to produce complex tapestries of culture and politics Meaning and International Relations also makes an original and convincing case for the relevance of hermeneutic approaches to understanding contemporary international relations *Nationalism* Philip Spencer, Howard Wollman, 2002-04-25 Spencer and Wollman remain succinct and clear in their critical introduction to the most influential nationalism theories The book is well structured the arguments clearly presented Its format makes it a great textbook for all seeking a deeper understanding of nationalism and national identity while those already familiar with the subject will no doubt enjoy this erudite volume as well Sociology This book is a valuable source for the interested reader who needs a concise and critical introduction into theories and theorists of nationalism The extensive bibliography and a good index make it a work which should be on the bookshelf of anyone teaching nationalism Journal of Contemporary European Studies Nationalism provides an indispensable review of the study of nationalism that both introduces and critically positions all the main issues theories and contemporary debates Drawing upon and introducing a wide range of literatures from across politics sociology history social anthropology and cultural studies the authors seek to further challenge fixed notions of national identity ethnicity and culture to more fully explore and understand the contemporary complexities of citizenship and the genuine potential for a cosmopolitan democracy The text surveys both classical and contemporary approaches including those from within feminism postmodernism postcolonialism and globalization studies It will be essential reading for all students and academics seeking a deeper understanding of nationalism and national identity today **The Balkans and the West** Andrew Hammond, 2017-03-02 This collection of essays locates investigates and challenges the manner in which the Balkans and the West have constructed each other since 1945 Scholars from the two sections of the continent explore a wide range of fiction film journalism travel writing and diplomatic records both to analyse Western European balkanism and to study Balkan representations of the West over the last fifty years The first section looks back to the Cold War examining the divergent often favourable images of the Balkans that existed in Western culture as well as the variety of responses that appeared in South East European writings on the West The second section analyses the transitions that took place in representation during the 1990s Here contributors explore both the harsh denigration of the Balkans which came to dominate western discourse after the initial euphoria of 1989 and the emerging tradition of contesting Western balkanism in South East European cultural production Through this dual emphasis the volume exposes the representational practices that help to maintain a deeply divided Europe and challenges the economic and political injustices that result Despite the rise to prominence of postcolonial theory with its awareness of global inequality the current crises in many parts of South East Europe have received scant attention in literary and cultural studies The Balkans and the West addresses this deficiency Ranging in focus from Serbian cinema to Romanian travel literature from Western economic writings to Yugoslav fiction and

from public discourse in Albania to NATO's vast propaganda machine the essays offer wide insight into representation and power in the contemporary European context
