## **National Environmental Accounting Bridging The Gap Between Ecology And Economy:**

National Environmental Accounting Joy E. Hecht, 2005 Publisher Description      *National Environmental Accounting* Joy Hecht, 2012-05-04 This book presents national environmental or green accounting as it has developed in Europe and other parts of the world. It introduces the most recent methods developed through the United Nations Statistical Department and other international organizations but bridges the gap between the superficial treatment of environmental accounting in economics textbooks and environmental literature on the one hand and the highly technical manuals of international organizations on the other. Joy Hecht begins with a history and introduction to national income accounting. The first part of her book explains how the environmental accounts build on the structure of the 1993 System of National Accounts. She then shows the UN approach to accounting applied to pollution, recycling and the management of natural resources such as forests, minerals and fisheries. The third section discusses how the accounts approach green GDP and other macroeconomic indicators. The book concludes by going beyond the UN structures to discuss other adjusted macroeconomic measures and how accounting data can be used to build them. National Environmental Accounting is a non-technical introduction to an increasingly important field. It is a must-read for anyone interested in how environmental accounts can help society move towards greater sustainability.

This theme introduces welfare economics and sustainable development in four topics dealing with four important issues to be considered in implementing sustainable development. These are the use of ethics and discounting and economic growth models in balancing the interests of future generations against those of the present; the advantages and limitations of national accounting methodologies as means of evaluating sustainability; the international dimensions of sustainable development arising out of environmental and economic linkages among nations; and the nature of institutions required to promote sustainable development. These two volumes are aimed at the following five major target audiences: University and College students, Educators, Professional practitioners, Research personnel and Policy analysts, managers and

decision makers and NGOs      **Rethinking Sustainable Development** Seck TAN,2024-06-03 This book demonstrates falsified economic performance of global economies when the environment is not recognised as a capital and when the ecosystem is overlooked towards sustainable development Seck begins with an analysis of standard macroeconomic framework and policy practice He argues with reference to environmental accounting literature that environmental capital must form an integral component of economic measurement This paves the way for an alternative environmental macroeconomics framework for policy analysis that promotes sustainable development The book demonstrates how environmental capital can be measured with reference to select OECD countries and provides a methodology for analysing how macroeconomic goals are related to a steady state economy Seck then concludes with a summary of the conflict between current economic growth and ecosystem preservation and outlines possible policy improvements and directions for research Rethinking Sustainable Development is an invaluable reference for policymakers as well as researchers and students of environmental economics sustainable development and macroeconomics      **Quantitative Eco-nomics** Peter Bartelmus,2008-04-19 This thought provoking and colorful book cuts through the fog of vision and advocacy by comparing and applying new quantitative tools of both environmental and ecological economics Environmental accounts and empirical analyses provide operational concepts and measures of the sustainability of economic performance and growth The text raises doubts however about the measurability of sustainable development Further reading sections are provided at the end of each chapter      **Reality and Accounting** Richard Mattessich,2013-07-31 This book discusses and summarizes the revived interest in reality issues ontology within accounting economics and the information sciences with a view to informing scholars from these different disciplines about each other s endeavours in ontological research Even more importantly the book aims at familiarizing scholars from various disciplines with an evolutionary approach for examining questions about reality in the social sciences The book is based on a partly pluralistic approach that assures unity in diversity Unity because all existence arises from physical reality diversity because emergent properties create biological and social realities that cannot be reduced to physical phenomena Hence the book recognizes not only concrete but also abstract entities It shows however that the actualization of these abstract entities requires objectification and concrete manifestation This pluralistic approach is central to this book It also is a challenge to those who reject abstract entities as socially real as well as to those who defend a non realist position The major task of this book is to explore proposals towards a uniform ontological basis This uniform and universal presentation extends beyond traditional ontology asking what is real to such questions as on which reality level is something real and in which temporal and modal way is it real Such an extended analysis is relevant to accountants economists information scientists other social scientists as well as philosophers      **Green Business** Nevin Cohen,2011-06-28 Annotation Presenting 150 signed entries this book provides an overview of key principles approaches strategies and tools businesses have used to reduce environmental impacts and contribute to sustainability      Green
