National Health Insurance Health Resources The European Experience:

National Health Insurance and Health Resources Jan Blanpain, Luk Delesie, Herman Nys, 1978 Our study was initiated to provide background for the formulation of health insurance health care and health resource development in the united states it also offers a historical perspective on resources development within neighboring systems The five european countries we studied England and wales brd frankrig holland and sverige Our analysis and comparison focuses on the nature content origin and interdependence of policies on the issues that guided their development and on the forces that shaped their format and impact *National Health Insurance and Health Resources* Jan Blanpain, Luk Delesie, Herman Nys, 1998

Financing High Medical Risks Companje, 2025-10-01 Across the European Union common problems and challenges have arisen related to the accessibility quality and financial sustainability of long term healthcare services which represent a new social and medical risk This book compares national policies in Norway Germany and the Netherlands and how these countries approach issues such as old age insurance home help programs and mental healthcare The contributors look at different paths of policy development identify problems faced by public and private parties and ultimately discuss possible solutions Health planning reports subject index United States. Health Resources Administration, 1979 **Basic**

Readings in Social Security, 1982 **Annotated Readings in Social Security** United States. Social Security Administration. Office of Research and Statistics, 1982 Over 2500 references about social security Classified order Author subject indexes *Politics and Health Care Organization* Lawrence Brown, 2010-12-01 Among various health cost containment strategies proposed during the 1970s none has held more sustained fascination than the health maintenance organization HMO For many years policy analysts in search of market and incentive based alternatives to command and control regulation have argued that medical groups combining prepayment and group practice and offering comprehensive medical services within a fixed budget would hold down costs both by their own efficient operations and by the competitive pressures they would apply to the conventional systems During the 1970s three presidents and five Congresses worked to formulate and implement legislation to increase the HMO presence nationwide with very modest results Some observers concluded that but for the well intended but counterproductive efforts of the federal government HMOs might thrive Indeed the Reagan administration has called for an end to direct federal financial involvement in building HMOs though it has also promised legislation to promote HMOs and a newly competitive health care system based on revamped financial incentives and reinvigorated markets In this book Lawrence D Brown a senior fellow in the Brookings Governmental Studies program examines the interplay between politics and policy in the federal HMO development effort between 1970 and 1980 He argues that the basic explanation for the disappointments of the policy analysts and federal supporters of HMOs lies not in a political miscarriage but in the overambitious promises of the policy strategy itself Tracing the poor fit between policy and politics revealed by federal efforts to translate the attractive HMO idea into a workable strategy Brown concludes that the episode

augurs poorly for the competitive reforms frequently offered as a nonregulatory solution to rising health care costs in the 1980s *Vital and Health Statistics*, 1980 **Health Systems, Health Services and Inequality in Population Health** Peter P. Groenewegen, Ilmo Keskimäki, Alastair H. Leyland, 2025-10-29 This open access book shows the scientific and policy added value of combining health systems health services and population health research In doing so the authors create awareness among researchers to look beyond the boundaries of their own discipline and promote cross disciplinary collaboration The book also gives an overview of what is known in the scientific literature about the relationships between the structure of health systems health service provision and utilisation and inequalities in population health Health inequalities are unjust and avoidable and as a focus of health policy in many governments are widely studied in public health research But studies of health inequalities too often ignore the role that health systems and health services play in the production of inequalities in population health and as a consequence their potential to create or reduce inequalities in health Studies of inequalities in health often incorporate the social determinants of health The same societal structures that form the social determinants of health also determine the health system structure and their impact on access to and the provision of health services and the benefits of health service use to patients with different socioeconomic backgrounds This means that attempts to reduce health inequalities by addressing the social determinants of health must also consider the potential pathway through the health system and the provision of health services In the final chapter the authors discuss ways of breaking down the barriers between the three approaches After reading this compact volume researchers will be more aware of the theoretical and methodological approaches in the three areas and more inclined to look beyond the boundaries of their own discipline Health Systems Health Services and Inequality in Population Health is essential reading for researchers in health systems research health services research and population health research In addition the brief is relevant for health policy researchers health impact researchers health economists epidemiologists public health practitioners and professionals in health services planning and management **Health Planning Reports: Subject index. 4 v** United States.
