Nationalism Politics And The Practice Of Archaeology:

Nationalism, Politics and the Practice of Archaeology Philip L. Kohl, Clare P. Fawcett, 1995 Archaeology has often been put to political use particularly by nationalists The case studies in this timely collection range from the propaganda purposes served by archaeology in the Nazi state through the complex interplay of official dogma and academic prehistory in the former Soviet Union to lesser known instances of ideological archaeology in other European countries in China Japan Korea and the Near East The introductory and concluding chapters draw out some of the common threads in these experiences and argue that archaeologists need to be more sophisticated about the use and abuse of their studies The editors have brought together a distinguished international group of scholars Whilst archaeologists will find that this book raises cogent questions about their own work these problems also go beyond archaeology to implicate history and anthropology more generally

Bodies in the Bog and the Archaeological Imagination Karin Sanders, 2009-12 Over the past few centuries northern Europe's bogs have yielded mummified men women and children who were deposited there as sacrifices in the early Iron Age and kept startlingly intact by the chemical properties of peat In this remarkable account of their modern afterlives Karin Sanders argues that the discovery of bog bodies began an extraordinary and ongoing cultural journey Throughout the nineteenth and twentieth centuries Sanders shows these eerily preserved remains came alive in art and science as material metaphors for such concepts as trauma nostalgia and identity Sigmund Freud Joseph Beuys Seamus Heaney and other major figures have used them to reconsider fundamental philosophical literary aesthetic and scientific concerns Exploring this intellectual spectrum Sanders contends that the power of bog bodies to provoke such a wide range of responses is rooted in their unique status as both archaeological artifacts and human beings They emerge as corporeal time capsules that transcend archaeology to challenge our assumptions about what we can know about the past By restoring them to the roster of cultural phenomena that force us to confront our ethical and aesthetic boundaries Bodies in the Bog excavates anew the question of what it means to be human

Digging for Hitler David Barrowclough, 2017-01-20 During the 1930s in the build up to the Second World War the Nazis established a band of specialists the SS Ahnenerbe under the command of Heinrich Himmler and Hermann Wirth Their aim was nothing less than to prove the superiority of the Aryan race and with it the unique right of the German people to rule Europe The occult figured as a key feature in many of these increasingly desperate quack research efforts Part science part espionage and part fantasy Archaeological expeditions were sent to Iceland Tibet Kafiristan North Africa Russia the Far East Egypt and even South America and the Arctic The Nazi Ancestral Heritage Society's chief administrator was Dr Wolfram Sievers who cruelly conducted medical experiments on prisoners in concentration camps and was responsible for the looting of historic artefacts considered Germanic for return to Germany He rewarded those academics that took part with high military office whilst those academics who contradicted or criticized the SS Ahnenerbe

were carted off to concentration camps where they faced certain death This book tells the true history of the real life villains behind the Indiana Jones movies Sometimes truth really is stranger than fiction *A Companion to Cultural Studies* Toby Miller, 2008-04-15 Experts from five continents provide a thorough exploration of cultural studies looking at different ideas places and problems addressed by the field Brings together the latest work in cultural studies and provides a synopsis of critical trends Showcases thirty contributors from five continents Addresses the key topics in the field the relationship of cultural studies to other disciplines and cultural studies around the world Offers a gritty introduction for the neophyte who is keen to find out what cultural studies is and covers in depth debates to satisfy the appetite of the advanced scholar Includes a comprehensive bibliography and a listing of cultural studies websites Now available in paperback for the course market

Who Owns Antiquity? James Cuno, 2010-10-18 Whether antiquities should be returned to the countries where they were found is one of the most urgent and controversial issues in the art world today and it has pitted museums private collectors and dealers against source countries archaeologists and academics Maintaining that the acquisition of undocumented antiquities by museums encourages the looting of archaeological sites countries such as Italy Greece Egypt Turkey and China have claimed ancient artifacts as state property called for their return from museums around the world and passed laws against their future export But in *Who Owns Antiquity* one of the world's leading museum directors vigorously challenges this nationalistic position arguing that it is damaging and often disingenuous Antiquities James Cuno argues are the cultural property of all humankind evidence of the world's ancient past and not that of a particular modern nation They comprise antiquity and antiquity knows no borders Cuno argues that nationalistic retention and reclamation policies impede common access to this common heritage and encourage a dubious and dangerous politicization of antiquities and of culture itself Antiquities need to be protected from looting but also from nationalistic identity politics To do this Cuno calls for measures to broaden rather than restrict international access to antiquities He advocates restoration of the system under which source countries would share newly discovered artifacts in exchange for archaeological help and he argues that museums should again be allowed reasonable ways to acquire undocumented antiquities Cuno explains how partage broadened access to our ancient heritage and helped create national museums in Cairo Baghdad and Kabul The first extended defense of the side of museums in the struggle over antiquities *Who Owns Antiquity* is sure to be as important as it is controversial Some images inside the book are unavailable due to digital copyright restrictions **Archaeological Theory and the Politics of**
