Nationstate And Global Order A Historical Introduction To Contemporary Politics:

The Nation-state and Global Order Walter C. Opello, Stephen J. Rosow, 1999 Rejecting models of linear development Opello and Rosow both in political science State U of New York Oswego fuse governing practices technological change political economy language and culture in an analysis of the formation of specific forms of the state from imperial Rome to the present state of states and future challenges Includes several basic maps of early political divisions and a glossary of terms from arquebus a primitive firearm to *virtus* the Roman political ideal of manliness based on great military deeds Paper edition unseen 19 95 Annotation copyrighted by Book News Inc Portland OR

Hazards, Risks, and Disasters in Society Andrew E. Collins, Jones Samantha, Bernard Manyena, Janaka Jayawickrama, 2014-11-21 Hazards Risks and Disasters in Society provides analyses of environmentally related catastrophes within society in historical political and economic contexts Personal and corporate culture mediates how people may become more vulnerable or resilient to hazard exposure Societies that strengthen themselves or are strengthened mitigate decline and resultant further exposure to what are largely human induced risks of environmental social and economic degradation This book outlines why it is important to explore in more depth the relationships between environmental hazards risk and disasters in society It presents challenges presented by mainstream and non mainstream approaches to the human side of disaster studies By hazard categories this book includes critical processes and outcomes that significantly disrupt human wellbeing over brief or long time frames Whilst hazards risks and disasters impact society individuals groups institutions and organisations offset the effects by becoming strong healthy resilient caring and creative Innovations can arise from social organisation in times of crisis This volume includes much of use to practitioners and policy makers needing to address both prevention and response activities Notably as people better engage prevalent hazards and risks they exercise a process that has become known as disaster risk reduction DRR In a context of climatic risks this is also indicative of climate change adaptation CCA Ultimately it represents the quest for development of sustainable environmental and societal futures Throughout the book cases studies are derived from the world of hazards risks and disasters in society Includes sections on prevention of and response to hazards risks and disasters Provides case studies of prominent societal challenges of hazards risks and disasters Innovative approaches to dealing with disaster drawing from multiple disciplines and sectors

Shifting Grounds Burak Kadercan, 2023 In *Shifting Grounds* Burak Kadercan draws upon a wide variety of cases ranging from the Thirty Years War to ISIS to examine the relationship between territorial ideas and armed conflict He argues that states and societies have adhered to different forms of territoriality across time and space and territory as well as territorial control has meant different things in different time periods and regions Ranging broadly across different eras and world regions the book sheds light on the shifting nature of the relationship between territorial ideas and armed conflict not only in the context of the distant the past but also in present day global politics

International Relations: All That Matters Ken Booth, 2014-07-25 This is a short book about the biggest questions

in politics To paraphrase a famous dictum of Trotsky you might not be interested yet in international relations but international relations are always interested in you The practices of international relations critically shape who gets what and who is who across the world and its theories inform how we live together globally Decisive things take place at the international level and they directly or indirectly affect all our lives war trade and the provision of human rights for example This book gives a comprehensive accessible and challenging overview of what is at stake and what you need to know

International Relations Theory Michael Haas, 2016-12-27 While many texts on international relations deal only with ideologies this book goes beyond discussion of ideology to provide an understanding of how global economics politics and society operate The book begins with a history of the International Studies Association which was founded to develop empirically based knowledge and was opposed to ideological isms as biased guides to policy The book focuses on four major paradigms Marxian Mass Society Community Building and Rational Choice with diagrams indicating their empirical predictions over time The Marxian paradigm focuses on scientific claims of Marx and Engels The Mass Society paradigm explains why democracies become dysfunctional The Community Building paradigm explains how communities can be and are built at the local national regional and international levels The Rational Choice paradigm assembles proposed explanations of reason based economic political and social life to demonstrate what they have in common Other candidates for paradigms are reviewed with a focus on why they need further development to become major paradigms at the decision making dyadic societal national and international system levels of analysis

Cruising in the Global Economy Christine B.N. Chin, 2016-12-05 The business of cruise tourism in recent years has commanded news media attention especially on issues of environmental pollution passenger safety and worker rights yet consumer interest in cruise vacations has not been adversely affected by negative publicity and it continues to grow at an average of 8.9% per annum This unique mode of business focusing on the production and consumption of pleasure at sea and on land offers us an unprecedented opportunity to analyze the manner in which ongoing economic restructuring processes to bring about free markets in goods services and labour can and does involve both life on land and at sea This interdisciplinary analysis elicits an examination of states relationship to the maritime regulatory structure governing ship ownership management and operations cruise lines business strategies development of port communities to capture cruise related revenue changing leisure consumption patterns and meanings and the employment of foreign migrant workers as seafarers

Straight Power Concepts in the Middle East Gregory Harms, 2010-04-09 How did the US become a world power How did it become involved in the Middle East What is the history and nature of its special relationship with Israel Given the increase in tensions in the Middle East and the United States involvement in them news coverage is in abundance Yet the reportage and discussion of American foreign policy is often narrow in scope offering little background or context And yet the historical record sharply contrasts with reportage Guiding the reader through a panoramic sweep of world and American history we see how the US became a world power how

the Middle East became modern and how Israel became an American strategic asset Disavowing the rhetoric commonly used by heads of state press secretaries news media and commentators we see how recent turmoil is closer to business as usual

Political Marketing Darren G. Lilleker, Jennifer Lees-Marshment, 2005-08-06 Political marketing has become a global phenomenon as parties try to copy the market oriented approach employed by Tony Blair to win power for New Labour in 1997 It raises fresh perspectives on the more established political marketing practices in the UK and US such as how to incorporate political leadership within the market oriented framework and the democratic implications when faced with the actual business of governing This book also highlights how the market oriented party approach has spread around the world including Europe and the new democracies of Brazil and Peru The collection also introduces the debate on whether such practices enhance or undermine democracy raising important questions on the future of political marketing

Africa and International Relations in the 21st Century S. Cornelissen, F. Cheru, T. Shaw, 2016-01-26 This book examines key emergent trends related to aspects of power sovereignty conflict peace development and changing social dynamics in the African context It challenges conventional IR precepts of authority politics and society which have proven to be so inadequate in explaining African processes Rather this edited collection analyses the significance of many of the uncharted dimensions of Africa's international relations such as the respatialisation of African societies through migration and the impacts this process has had on state power the various ways in which both formal and informal authority and economies are practised and the dynamics and impacts of new transnational social movements on African politics Finally attention is paid to Africa's place in a shifting global order and the implications for African international relations of the emergence of new world powers and or alliances This edition includes a new preface by the editors which brings the findings of the book up to date and analyses the changes that are likely to impact upon global governance and human development in policy and practice in Africa and the wider world post 2015

Political Science Revitalized Michael Haas, 2017-07-28 Political science has been described as a jigsaw puzzle with many specializations and subfields that do not talk to one another This book offers a solution that will advance the field from mid level theory to engage in cross fertilization through metatheoretical paradigms The book begins with a history of political science from the nineteenth century to the present followed by a paradigmatic history of political science including 6 metatheories in the pre behavioral era 12 in the behavioral era and the 4 major and several minor paradigms being developed today The book advances the goal of David Easton by proposing a neobehavioral political science including multimethodological innovations cross testing of paradigms and tenets of a new political science that can rise to become a truly theoretical science Each paradigm is diagramed to demonstrate the key concepts and their causal interconnections *Political Science Revitalized Filling the Jigsaw Puzzle with Paradigms* poses an exciting and provocative argument for the future of the vast field of political science
