Native Soil A History Of The DeKalb County Farm Bureau:

Native Soil Eric William Mogren, 2005 Located in a region blessed by geology with nutrient rich lush black soil DeKalb County Illinois is known for its agricultural prosperity Here in 1912 an enterprising group of successful farmers businessmen and bankers joined together to form an agricultural organization dedicated to improving crop production the DeKalb County Soil Improvement Association Aided by its capable farm advisor William G Eckhardt this coalition evolved into the DeKalb County Farm Bureau a new type of organization that soon proliferated throughout the United States offering educational and farming services to rural communities One of the oldest in the United States the DeKalb County Farm Bureau is also one of the most innovative and influential Originating as a private soil improvement association it grew to offer a wide variety of assistance to farmers rural families and the community By the 1960s the DeKalb County Farm Bureau had become such a strong organization that its leadership effectively lobbied in the U S Congress for legislation supporting agricultural interests In the 1970s it entered into the international agricultural commodity marketing business shipping local grain to Europe and Asia The history of this influential organization reflects the plight of American agriculture during the past century from the early years of promise through two world wars and several economic crises Historian Eric Mogren explains how one group of progressive farmers attempted to cope with the problems they faced as agriculture turned mechanized and productive farming required scientific and technological advances Native Soil will be of interest to historians of agriculture and to those who have witnessed the positive effects of the farm bureau on the agrarian community **Farmers Helping Farmers**

Nancy K. Berlage, 2016 Introduction Organizational structure the rise of the local farm bureau Organizational strategy economic political and social functions Science cultural authority and the farm bureau bovine tuberculosis Home bureaus and the sciences of separate spheres Women and the agricultural occupation Reproducing the farm family youth clubs gender and science Conclusion **The Rural Midwest Since World War II** J. L. Anderson, 2014-02-01 J L Anderson seeks to change the belief that the Midwest lacks the kind of geographic coherence historical issues and cultural touchstones that have informed regional identity in the American South West and Northeast The goal of this illuminating volume is to demonstrate uniqueness in a region that has always been amorphous and is increasingly so Midwesterners are a dynamic people who shaped the physical and social landscapes of the great midsection of the nation and they are presented as such in this volume that offers a general yet informed overview of the region after World War II The contributors most of whom are Midwesterners by birth or residence seek to better understand a particular piece of rural America a place too often caricatured misunderstood and ignored However the rural landscape has experienced agricultural diversity and major shifts in land use Farmers in the region have successfully raised new commodities from dairy and cherries to mint and sugar beets The region has also been a place where community leaders fought to improve their economic and social well being women redefined their roles on the farm and minorities asserted their own version of the American Dream The rural Midwest is a

regional melting pot and contributors to this volume do not set out to sing its praises or by contrast assume the position of Midwestern modesty and self deprecation The essays herein rewrite the narrative of rural decline and crisis and show through solid research and impeccable scholarship that rural Midwesterners have confronted and created challenges uniquely their own *Journal of the Illinois State Historical Society* ,2018 **Annals of Iowa** ,2007 **Mining North America** John R. McNeill,George Vrtis,2017-07-03 Over the past five hundred years North Americans have increasingly relied on mining to produce much of their material and cultural life From cell phones and computers to cars roads pipes pans and even wall tile mineral intensive products have become central to North American societies As this process has unfolded mining has also indelibly shaped the natural world and the human societies within it Mountains have been honeycombed rivers poisoned forests leveled and the consequences of these environmental transformations have fallen unevenly across North America Drawing on the work of scholars from Mexico the United States and Canada *Mining North America* examines these developments It covers an array of minerals and geographies while bringing mining into the core debates that animate North American environmental history Taken all together the essays in this book make a powerful case for the centrality of mining in forging North American environments and societies **Interpreting Agriculture at Museums and Historic Sites** Debra A. Reid,2017-01-23 *Interpreting Agriculture in Museums and Historic Sites* orients readers to major themes in agriculture and techniques in education and interpretation that can help you develop humanities based public programming that enhance agricultural literacy Case studies illustrate the ways that local research can help you link your history organization to compelling local national even international stories focused on the multidisciplinary topic That ordinary plow pitch fork and butter paddle can provide the tangible evidence of the story worth telling even if the farm land has disappeared into subdivisions and agriculture seems as remote as the nineteenth century Other topics include discussion of alliances between rural tourism and community supported agriculture farmland conservation and stewardship heritage breed and seed preservation efforts and antique tractor clubs Any of these can become indispensable partners to history organizations searching for a new interpretive theme to explore and new partners to engage *Journal of Illinois History* ,2006 **The Intersection of Food and Public Health** A. Bryce Hoflund,John C. Jones,Michelle C. Pautz,2017-09-13 Presently ideas about food are in flux from a variety of sources Examples of this evolution include recognizing the importance of food on health by public health and medical professionals changing consumer desires around the production methods and components of their food a greater focus on injustices within the national food system evolving knowledge of how the food system impacts the environment and shifting economic and technological realities that underpin where and how food is produced distributed and sold These shifting ideas about food exist in contrast to the narrative of the highly functioning industrialized global food system that emerged in the second half of the 20th century This edited volume fills a void by presenting a comprehensive and engaging coverage of the key issues at the intersection of public health policy and food The

Intersection of Food and Public Health is comprised of research that examines current problems in food studies and how various stakeholders are attempting to address problems in unique ways The book will be of interest to undergraduate and graduate students in a variety of disciplines including public administration public policy public health economics political science nutrition dietetics and food studies *Illinois Heritage* ,2004
