

Nato And The New Technologies

Ian Bellany, Tim Huxley

Nato And The New Technologies:

NATO and the New Technologies David Hobbs, 1989 NATO has traditionally relied on its technological superiority to offset the Warsaw Pact's numerical advantage. This equation however is becoming increasingly difficult to sustain. Despite NATO's considerably greater outlays for defense, the numerical balance continues to favor the Warsaw Pact and the technological gap between East and West is narrowing. To rectify this situation, NATO has two courses of action: embrace a spectrum of new technologies which offer the prospect of dramatic improvements in capability or extract better value for the money from its defense allocations. These two possibilities need not be mutually exclusive, although historically they have been. Clearly, NATO must reform its approach to weapons procurement if it is to exploit new technology as effectively as possible in periods of budgetary stringency. The need for reform is evident. The Warsaw Pact spends less than NATO on defense but outproduces NATO in virtually every weapons category. This volume examines these problems and shows that in order to exploit available technologies at an affordable cost, NATO clearly must organize its defense procurement more efficiently. Co-published with the Atlantic Council of the United States. New Technology and Western Security Policy

Robert O'Neill, 1985-06-18 **Technologies for NATO's Follow-On Forces Attack Concept** Alan Shaw, 2008-09 This unclassified version of a report on Improving NATO's Defense Response contains primarily the executive summary of the classified report as well as the chapter on delivery systems and munitions with classified material removed. The discussions of other areas, esp. surveillance systems and the threat, were omitted because little more than what appears in the summary could be said in an unclassified report. Contents: 1. Issues Before NATO and Before Congress; 2. Topics for this Report; 3. Basic Observations; 4. NATO Strategy and the Threat to the Central Region; 5. Concepts for Follow-On Forces Attack; 6. Requirements; 7. Capabilities; 8. Opportunities; 9. Remaining Questions; 10. Delivery Systems and Munitions; 11. Glossary; 12. Charts and tables.

The papers examine strategic defence policies, nuclear weapons proliferation and arms control among many other topics. *NATO's Future* Stanley R. Sloan, 1995-09 Examines the role of the U.S. in NATO. The author finds the sources of many current problems and singles out two basic weaknesses: the failure of the European NATO Allies to form a European defense community and the parallel U.S. decision to rest NATO's defense on U.S. nuclear forces. Suggests some directions for NATO strategy, force posture, arms control policies and East-West relations. Photos, tables and figures. Glossary, Index. **NATO's Conventional Defences** Stephen J.
