Natter And Other German Rocket Jet Projects:

Natter and Other German Rocket Jet Projects Joachim Dressel, 1997-01-06 This book offers a unique view of the Natter and other German rocket jet projects

Project Natter Brett Gooden, 2005-12-31 In 1944 in response to the bombing of German cities and factories by the Allies an inventor named Erich Bachem developed Projekt Natter Viper an extraordinary highly secret vertical take off semi expendable single seat rocket fighter armed with a nose mounted honeycomb of 73 mm or 55 mm spin stabilized air to air rockets as well as 30 mm cannon The Natter was intended to offer high speed defense of key targets Once blasted into the air from its vertical launch tower the pilot of the Natter was to climb towards an enemy formation using an internal rocket target an enemy bomber and fire his battery of rockets He would then use the remaining kinetic energy to climb higher than the bombers in order to mount a ramming attack Just before impact the pilot was to trigger a mechanism that would activate an ejection seat and separate the rocket unit which would return to earth by means of an automatically deployed parachute for reuse Relatively little has been published on the Natter and this book will provide a detailed and definitive account of this unusual but fascinating aircraft This will be required reading for all those interested in the history of the Luftwaffe during World War II particularly for those fascinated by the radical and revolutionary projects which German aircraft designers contrived toward the end of the Nazi regime

Secret Projects of the Luftwaffe - Vol 1 - Jet Fighters 1939 -1945 Dan Sharp, 2020-09-22 Germany's air ministry was quick to grasp the potential of the jet engine as early as 1938 and by 1939 several German aircraft manufacturers were already working on fighter designs that would utilize this new form of propulsion Rocket engines too were seen as the way of the future and companies were commissioned to design fighters around them As the Second World War began the urgent need to bring these advanced new types into production saw a host of innovative aircraft designs being produced which would eventually result in Messerschmitt's Me 262 jet fighter and the Me 163 rocket propelled interceptor And as the war progressed efforts were increasingly made to find better ways of utilizing jet rocket and latterly ramjet engines in fighter aircraft Aviation companies from across Germany set their finest minds to the task and produced some of the most radical aircraft designs the world had ever seen They proposed rotating wing ramjet fighters arrowhead shaped rammers rocket firing bat winged gun platforms sleek speed machines tailless flying wings tiny mini fighters and a host of others ranging from deadly looking advanced fighters to downright dangerous vertical launch interceptors

Secret Projects of the Luftwaffe Volume 1 Jet Fighters 1939 1945 by Dan Sharp based on original research using German wartime documents offers the most complete and authoritative account yet of these fascinating designs through previously unseen photographs illustrations and period documentation from archives around the world

Bachem Ba 349 Natter Robert Forsyth,2018-06-28

The Bachem Ba 349 Natter was a secretive vertical take off single seat rocket interceptor intended to offer high speed defence of key targets This radical aircraft offered Luftwaffe an inexpensive means with which to intercept and attack Allied heavy bombers using a vertically launched semi expendable machine built of wood and armed with a nose mounted honeycomb battery of spin stabilised air to air rockets as well as cannon armament Launched vertically at 36 000ft per minute the pilot was expected to fly within range of the enemy bombers fire his rockets at them ram another bomber eject and parachute to the ground Illustrated with contemporary photographs and stunning commissioned artwork this study examines this inventive yet ultimately unsuccessful attempt by the Luftwaffe to defend against the tide of Allied aircraft that
