The Sloth Lemur's Song Alison Richard, 2024-05-31 A moving account of Madagascar told by a researcher who has spent over fifty years investigating the mysteries of this remarkable island Madagascar is a place of

change A biodiversity hotspot and the fourth largest island on the planet it has been home to a spectacular parade of animals from giant flightless birds and giant tortoises on the ground to agile lemurs leaping through the treetops Some species live on many have vanished in the distant or recent past Over vast stretches of time Madagascar's forests have expanded and contracted in response to shifting climates and the hand of people is clear in changes during the last thousand years or so Today Madagascar is a microcosm of global trends What happens there in the decades ahead can perhaps suggest ways to help turn the tide on the environmental crisis now sweeping the world The Sloth Lemur's Song is a far reaching account of Madagascar's past and present led by an expert guide who has immersed herself in research and conservation activities with village communities on the island for nearly fifty years Alison Richard accompanies the reader on a journey through space and time from Madagascar's ancient origins as a landlocked region of Gondwana and its emergence as an island to the modern day developments that make the survival of its array of plants and animals increasingly uncertain Weaving together scientific evidence with Richard's own experiences and exploring the power of stories to shape our understanding of events this book captures the magic as well as the tensions that swirl around this island nation Writing Environments Sidney I. Dobrin, Christopher J. Keller, 2012-02-01 Writing Environments addresses the intersections between writing and nature through interviews with some of America's leading environmental writers Those interviewed include Rick Bass Cheryl Glotfelty Annette Kolodny Max Oelschlaeger Simon J Ortiz David Quammen Janisse Ray Scott Russell Sanders Edward O Wilson and Ann H Zwinger From the standpoints of activists scientists naturalists teachers and highly visible writers the interviewees consider how different environments have influenced them how their writing affects environments and the ways readers experience environments The interviews are followed by critical responses from writing scholars This diverse range of voices speaks lucidly and captivantly about topics such as place writing teaching politics race and culture and how these overlap in many complex ways A Walk in the Woods Bill Bryson, 2010-09-08 NEW YORK TIMES BESTSELLER The classic chronicle of a terribly misguided and terribly funny The Washington Post hike of the Appalachian Trail from the author of A Short History of Nearly Everything and The Body The best way of escaping into nature The New York Times Back in America after twenty years in Britain Bill Bryson decided to reacquaint himself with his native country by walking the 2 100 mile Appalachian Trail which stretches from Georgia to Maine The AT offers an astonishing landscape of silent forests and sparkling lakes and to a writer with the comic genius of Bill Bryson it also provides endless opportunities to witness the majestic silliness of his fellow human beings For a start there's the gloriously out of shape Stephen Katz a buddy from Iowa along for the walk But A Walk in the Woods is more than just a laugh out loud hike Bryson's acute eye is a wise witness to this beautiful but fragile trail and as he tells its fascinating history he makes a moving plea for the conservation of America's last great wilderness An adventure a comedy and a celebration A Walk in the Woods is a modern classic of travel literature NOW A MAJOR MOTION PICTURE Discovering Life's Story Joy Hakim, 2024 In the second volume of the Discovering Life

s Story series by best selling author Joy Hakim the theory of evolution takes hold transforming ideas about survival extinction and life itself Can species change Or go extinct In the eighteenth century most people answer no to both questions But in the century that follows that certainty gets challenged as some people in Europe question the common belief that all creatures are the same as they ve been since life s creation The Evolution of an Idea the second volume of Discovering Life s Story opens with the Swedish naturalist Carl Linnaeus who attempts to create an organizing system for the myriad forms of life on earth It continues into the late 1800s when two Englishmen Charles Darwin and Alfred Russel Wallace each develop their own version of a startling new theory of how life forms change over time This evolutionary idea will alter the understanding of our place in the great web of life on earth In this remarkable volume author Joy Hakim continues charting the path of human discovery and shows how groundbreaking thinkers began to unlock the biological secrets of our own existence

The Sixth Extinction Elizabeth Kolbert, 2014-02-11 ONE OF THE NEW YORK TIMES BOOK REVIEW S 10 BEST BOOKS OF THE YEAR A major book about the future of the world blending intellectual and natural history and field reporting into a powerful account of the mass extinction unfolding before our eyes Over the last half a billion years there have been five mass extinctions when the diversity of life on earth suddenly and dramatically contracted Scientists around the world are currently monitoring the sixth extinction predicted to be the most devastating extinction event since the asteroid impact that wiped out the dinosaurs This time around the cataclysm is us In The Sixth Extinction two time winner of the National Magazine Award and New Yorker writer Elizabeth Kolbert draws on the work of scores of researchers in half a dozen disciplines accompanying many of them into the field geologists who study deep ocean cores botanists who follow the tree line as it climbs up the Andes marine biologists who dive off the Great Barrier Reef She introduces us to a dozen species some already gone others facing extinction including the Panamanian golden frog staghorn coral the great auk and the Sumatran rhino Through these stories Kolbert provides a moving account of the disappearances occurring all around us and traces the evolution of extinction as concept from its first articulation by Georges Cuvier in revolutionary Paris up through the present day The sixth extinction is likely to be mankind s most lasting legacy as Kolbert observes it compels us to rethink the fundamental question of what it means to be human

Kraken Wendy Williams, 2011-03-01 The enthralling examination of one of the most popular and most intriguing animals in the deep blue sea The ocean is the last remaining source of profound mystery and discovery on Earth with eighty percent of it still largely unexplored thus it is of perennial fascination In *Kraken* The Curious Exciting and Slightly Disturbing Science of Squid journalist Wendy Williams introduces one of the ocean s most charismatic monstrous enigmatic and curious inhabitants the squid More than just calamari squid species are fascinatingly odd creatures with much to teach us about our own species not to mention the obsessive interest so many of us can t help but have for the enormous beast that is the giant squid which is quick to attack sperm whales and even submarines and boats Williams also examines other equally enthralling cephalopods including the octopus and the cuttlefish and explores their

otherworldly abilities such as camouflage and bioluminescence Kraken takes the reader on a wild ride through the world of squid science and adventure along the way answering some riddles about how the human brain works what intelligence really is and what monsters lie in the deep Wendy Williams weaves a rich narrative tapestry around her subject drawing powerfully on the passions and discoveries of scientists fisherman and squid enthusiasts around the world *Last Child in the Woods* Richard Louv,2008-01-01 Louv talks with parents children teachers scientists religious leaders child development researchers and environmentalists to find ways for children to experience the natural world more deeply
