Food Culture in the Pacific Islands Roger Haden, 2009-08-10 The food culture of the Pacific Islands has been determined by isolation from the rest of the world Original immigrants from Asia brought their foods animals and culinary skills with them then for several thousand years they were largely uninfluenced by outsiders The tropical climate of much of the region unique island geology and environmental factors also played a role in the evolution of islander cuisine which is based on unique ingredients The staples of breadfruit yams taro coconut sweet potato and cassava are incorporated into a cuisine that uses cooking and preservation techniques unique to Polynesia Micronesia and Melanesia Today food culture in the Pacific is largely one of extremes Although traditional foods and cookery survive and are highly valued Westernization has meant that the overall diet of islanders has been negatively transformed and that islands are net importers of unhealthful foods Ironically the tourism industry has re engaged islander people in food production and boosted their sense of identity Students food mavens and travellers will find this to be a stellar introduction to the current culture of the Pacific Islands with discussion of Hawaii Australia and New Zealand included Chapter 1 Historical Overview offers a fascinating chronicle of the evolution of a food culture of extremes of isolation climate environment and Western influences Chapter 2 Major Foods and Ingredients introduces a host of traditional tropical manna as well as imported products The Cooking chapter discusses the truly unique cooking styles of the islands such as steam baking in the ground in an umu oven Chapter 4 Typical Meals largely explores the emphasis on the ubiquitous processed foods A Regional Specialties chapter reveals both pan regional dishes and the noted local dishes Chapter 6 s Eating Out discussion shows the new acceptance of the individualist recreational ritual of eating away from the community The typical life cycle food rituals are covered in the Special Occasions chapter A final chapter on Diet and Health highlights the increase in Western diseases arising from diet and lifestyle changes and discusses timely food security issues as well Recipes are interspersed throughout and a timeline glossary selected bibliography and photos round out the coverage

Transforming food systems in the Pacific CTA, 2017-08-24 Many islands import most of their food much of which is calorie dense and of low nutritional value It may be cheaper than local produce but a diet based on imported food is leading to a whole range of health problems All too often nutritious indigenous foods are ignored by local populations as they are seen as poor people's food Tourism has been rapidly expanding in both regions yet there is a disconnect between the tourist market and local producers Indeed 70% of the food used in the tourist industry in the Pacific is imported As this booklet shows creating closer links between tourism and agriculture agritourism can help to reduce the food import bill and at the same time boost local food production and therefore the incomes of island farmers With support from the intra ACP Agricultural Policy Programme funded by the European Union CTA has been actively promoting links between the two regions and encouraging them to share their knowledge and experience On the one hand CTA has provided policy support which has brought together government ministries with the private sector to promote agritourism CTA also played a key role in establishing the Chefs for Development Initiative which is creating closer links between the hospitality industry and local farmers Over time these endeavours will help to generate income and employment across the value chain **Introduction to Cook Islands** Gilad James, PhD, The Cook Islands is a small island nation located in the South Pacific northeast of New Zealand The country consists of 15 islands spread out over 1.2 million square kilometers of ocean with a population of around 17 500 people The Cook Islands was first settled by Polynesian explorers over a thousand years ago and has been influenced by various European powers throughout its history The islands are known for their stunning natural beauty with white sandy beaches clear blue waters and lush rainforests The economy is primarily based on tourism and the country boasts a vibrant culture with traditions and customs unique to the Cook Islands **Pacific Fresh** Maryana Vollstedt, 1984
