Science of the Human Past provides students with a thorough understanding of what archaeology is and how it operates and familiarizes them with fundamental archaeological concepts and methods This volume introduces the basic components of archaeology including sites artifacts ecofacts remote sensing and excavation It discusses how archaeologists obtain and classify information and how they analyze this information to formulate and test models of what happened in the past Cultural resource management and the laws and regulations that deal with archaeology around the world are described Archaeology is placed in the context of contemporary issues from environmental problems to issues affecting Indigenous populations The sixth edition has been updated and simplified to create a more streamlined volume to meet the needs of the students and teachers for whom it is designed reflecting the latest developments in archaeological techniques and approaches Allowing students to understand the theoretical and scientific aspects of archaeology and how various archaeological perspectives and techniques help us understand how and what we know about the past Archaeology The Science of the Human Past is an ideal introduction to archaeology

Tropical Archaeobotany Jon G. Hather,2013-10-28

Tropical Archaeobotany fills the need for a substantial reference work on plant remains from the tropics It covers the examination identification and interpretation of plant remains in tropical archaeology whilst also the origins spread investigating the origins spread distribution and past use of tropical plants for food and other purposes Recent technological

developments in electron microscopy and biochemical and genetic research as well as increased interest in tropical environments and ecosystems are now beginning to realise the great potential for archaeobotanical research in the tropics. With the use of case studies from a wide range of areas this volume details the latest macroscopic microscopic and chemical techniques for the analysis of plant remains from seeds roots and tubers to epidermal fragments pollen and phytoliths. Each chapter of Tropical Archaeobotany focuses on a different aspect of archaeobotanical research using detailed examples from a variety of tropical areas though with its emphasis on techniques and methodology the book has a relevance beyond the regional scope of each chapter.

Wood in Archaeology Lee A. Newsom, 2022-01-20 In this book Lee A. Newsom offers an overview of wood in archaeology how and where it is preserved and analyzed its relevance to paleoecological and paleoenvironmental questions as well as its role as an important source of information in modern archaeological science and related historical disciplines. Her book addresses a range of questions about wood reliance practices sustainability and the overall relevance of forest ecosystems to past cultures and cultural evolution. Newsom provides a step by step treatment of archaeological analysis with clear explanations and examples from various corners of the world. She also shows how the study of archaeological wood is relevant to modern restoration ecology and conservation biology that tracks long term ancient ecosystems including questions of global change. Demonstrating the vital role of wood and timber resources to past human societies her book will interest scholars and students of archaeology historical ecology paleoecology and wood science.

Archaeology of Food: An Encyclopedia Karen Bescherer Metheny, Mary C. Beaudry, 2015-08-07 What are the origins of agriculture? Paleonutrition Mark Q. Sutton, Kristin D. Sobolik, Jill K. Gardner, 2010-04-15 Paleonutrition is the analysis of prehistoric human diets and the interpretation of dietary intake in relation to health and nutrition. As a field of study it addresses prehistoric diets in order to determine the biological and cultural implications for individuals as well as for entire populations placing archaeological interpretations into an anthropological context. Throughout history and long before written records human culture has been constantly in flux. The study of paleonutrition provides valuable insights into shifts

and changes in human history whatever their causes This is the most comprehensive and up to date book on the topic Intended for students and professionals it describes the nature of paleonutrition studies reviews the history of paleonutrition research discusses methodological issues in the reconstruction of prehistoric diets presents theoretical frameworks frequently used in paleonutrition research and showcases examples in which paleonutritional analyses have been successfully conducted on prehistoric individuals groups and populations It offers an integrative approach to understanding state of the art anthropological dietary health and nutritional assessments The most recent and innovative methods used to reconstruct prehistoric diets are discussed along with the major ways in which paleonutrition data are recovered analyzed and interpreted Paleonutrition includes five contemporary case studies that provide useful models of how to conduct paleonutrition research Topics range from ancient diets in medieval Nubia to children s health in the prehistoric American Southwest to honey use by an ethnographic group of East African foragers As well as providing interesting examples of applying paleonutrition techniques these case studies illustrate the mutually beneficial linkages between ethnography and archaeology

Maize Duccio Bonavia,2013-05-13 This book examines one of the thorniest problems of ancient American archaeology the origins and domestication of maize Using a variety of scientific techniques Duccio Bonavia explores the development of maize its adaptation to varying climates and its fundamental role in ancient American cultures An appendix by Alexander Grobman provides the first ever comprehensive compilation of maize genetic data correlating this data with the archaeological evidence presented throughout the book This book provides a unique interpretation of questions of dating and evolution supported by extensive data following the spread of maize from South to North America and eventually to Europe and beyond

Bioinformatics in Rice Research Manoj Kumar Gupta,Lambodar Behera,2021-09-24 This book provides an up to date review of classic and advanced bioinformatics approaches and their utility in rice research It summarizes databases and tools for analyzing DNA proteins and gene expression profiles mapping genetic variations annotation of protein and RNA molecules phylogenetic analysis and pathway enrichment In addition it presents high throughput technologies that are widely used to provide deep insights into the genetic architecture of important traits in the rice genome The book subsequently discusses techniques for identifying RNA protein DNA protein interactions and molecular markers including SNP and microsatellites in the contexts of rice breeding and genetics Lastly it explores various tools that are used to identify and characterize non coding RNA in rice and their potential role in rice research

Island Historical Ecology Peter E. Siegel,2018-01-29 In the first book length treatise on historical ecology of the West Indies Island Historical Ecology addresses Caribbean island ecologies from the perspective of social and cultural interventions over approximately eight millennia of human occupations Environmental coring carried out in carefully selected wetlands allowed for the reconstruction of pre colonial and colonial landscapes on islands between Venezuela and Puerto Rico Comparisons with well documented patterns in the Mediterranean and Pacific islands place this case study into a larger context of island historical

ecology **Before Ontario** Marit K. Munson, Susan M. Jamieson, 2013-10-01 Before Ontario there was ice As the last ice age came to an end land began to emerge from the melting glaciers With time plants and animals moved into the new landscape and people followed For almost 15 000 years the land that is now Ontario has provided a home for their descendants hundreds of generations of First Peoples With contributions from the province s leading archaeologists Before Ontario provides both an outline of Ontario s ancient past and an easy to understand explanation of how archaeology works The authors show how archaeologists are able to study items as diverse as fish bones flakes of stone and stains in the soil to reconstruct the events and places of a distant past fishing parties long distance trade and houses built to withstand frigid winters Presenting new insights into archaeology s purpose and practice Before Ontario bridges the gap between the modern world and a past that can seem distant and unfamiliar but is not beyond our reach Contributors include Christopher Ellis University of Western Ontario Neal Ferris University of Western Ontario Museum of Ontario Archaeology William Fox Canadian Museum of Civilization Royal Ontario Museum Scott Hamilton Lakehead University Susan Jamieson Trent University Archaeological Research Centre TUARC Mima Kapches Royal Ontario Museum Anne Keenleyside TUARC Stephen Monckton Bioarchaeological Research Marit Munson TUARC Kris Nahrgang Kawartha Nishnawbe First Nation Suzanne Needs Howarth Perca Zooarchaeological Research Cath Oberholtzer TUARC Michael Spence University of Western Ontario Andrew Stewart Strata Consulting Inc Gary Warrick Wilfrid Laurier University and Ron Williamson Archaeological Services Inc *Ancient Technologies and Archaeological Materials* Sarah U. Wisseman, Wendell S. Williams, 2013-11-26 First Published in 1993 This book is a user friendly introduction to the interface between archaeology and the natural sciences It is intended as a secondary textbook for undergraduates in interdisciplinary courses in anthropology archaeological science museum studies or materials science This title will also be useful to graduate students taking a course outside their major field and to archaeologists curators and scientists in a variety of settings who are engaged in interdisciplinary research Each chapter includes references and suggested readings a glossary of technical terms concludes the volume **Archaeological Method and Theory** Linda Ellis, 2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials Thus the reader will find entries on subject matter covering disciplinary theory legislation affecting the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively The discussion of these techniques is amplified by including results of the

work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology
