

SB-198 COMPANY COMPLIANCE POLICY INJURY & ILLNESS PREVENTION PROGRAM

"The Occupational Safety and Health Act of 1970 clearly states our common goal of safe and healthful working conditions for the first consideration in operating this business."

"Safety and health in our business must be part of every operation, without question, it is every employee's responsibility and right."

"As the owner of this company to comply with all laws. To do this, we must constantly be aware of conditions in all work areas that can produce injuries. We recognize it is required for each of our business owners to not safe or healthful. Your cooperation in detecting hazards and in fully understanding them, is a condition of your employment. Inform your supervisor immediately of any situation beyond your ability or authority to correct."

"The personal safety and health of each employee of this company is of primary importance. Prevention of occupationally-induced injuries and illnesses is of such consequence that it will be given precedence over operating productivity whenever necessary. To the greatest degree possible, management will provide all equipment and personal activities required for personal safety and health, in keeping with the highest standards."

"We will maintain a safety and health program conforming to the best practices of organizations of this type. To be successful, such a program must involve proper administration, injury and illness prevention, on the part of supervisors and employees. It also requires cooperation in all safety and health matters, not only between supervisor and employee, but also between each employee and their co-workers. Only through such a cooperative effort can a safety program to the best interest of all be established and maintained."

"Our objective is a safety and health program that will reduce the number of injuries and illnesses to an absolute minimum, not merely by keeping with, but by exceeding the best experience of operations similar to ours. Our goal is zero accidents and injuries."

"Our safety and health program will include:

- Providing mechanical and physical safeguards to the maximum extent possible.
- Conducting safety and health inspections to find, eliminate or control safety and health hazards as well as unsafe working conditions and practices and to comply fully with the safety and health standards for workers.
- Training all employees in good safety and health practices.
- Providing necessary personal protective equipment, and instructions for use and care.
- Developing and enforcing safety-and-health rules, and requiring that employees cooperate with these rules as a condition of employment.
- Investigating, preventing and thoroughly analyzing every accident to find out what occurred and correct the conditions so it will not happen again.
- Setting up a system to recognize employees for outstanding safety records or performance. This recognition system should not discourage employees from reporting accidents, injuries, or illnesses."

"We recognize that the responsibilities for safety and health are shared:

- The employer accepts responsibility for leadership of the safety and health program, for its effectiveness and improvement, and for providing the safeguards and/or controls to ensure safe conditions.
- Supervisors are responsible for developing proper safety and health rules and practices (or procedures) and in those they supervise, and for ensuring that all operations are performed with the utmost regard for the safety and health of all personnel involved, including themselves.
- Employees are responsible for self-education, personal observation of all aspects of the safety and health program, conducting compliance with all rules and regulations and for consistently practicing safety while performing their duties."
