International Yearbook of Foreign Policy Studies Patrick J. McGowan, 1974-12-01 **Logic of Conflict** Steven Greffenius, 2019-07-12 The author's argument ties this literature to a field that is often called the logic of inquiry. He criticizes an influential and deliberately analytical approach to the study of international conflict and show what can be gained by bringing more integrative or synthetic approaches to bear on problems in the field. The study started as an effort to work out some problems in international relations theory and it has remained that through eight years of writing and research. Still the book is more than incidentally about the Middle East and evidence from the region informs the argument made here. This evidence is of two kinds: traditional historical material from both primary and secondary sources and data on events that have occurred during the course of both conflictual and cooperative exchanges between the actors there. The treatment focuses on the relationship between Egypt and Israel between 1967 and 1979, a period that saw their relations pass from the most intense antagonism to a reasonable degree of comity if not friendship.

The Globus Model Stuart A. Bremer, 2019-09-06 This is a collection of independent works on the GLOBUS model. A first and basic application of the GLOBUS model was made through the computation of its standard run for the years 1970-2010. Stated in the simplest possible terms, GLOBUS is a computer simulation model of many important macropolitical and macroeconomic relationships within and among 25 prominent contemporary nations plus a rest of world entity. It is designed and used to explore possible solutions to long-term global problems.

International Relations in Contemporary Africa Michael O. Anda, 2000 Although developing countries far outnumber fully industrialized states, they are often neglected in the study of international relations, especially with respect to the development of foreign policy theory. *International Relations in Contemporary Africa* attempts to fill this void in the literature on comparative international relations while at the same time providing a detailed analysis of the economic development and integration of West African countries. Michael Anda specifically focuses on the members of the Economic Community of West African States (ECOWAS) and their policies which encourage coordination on issues ranging from science and technology to diplomacy and mutual defense. Tracing the diplomatic history of West Africa from independence to the present, he assesses the various dimensions of cooperation among the smaller and less developed states of West Africa while revealing the precarious nature of the economy and security in the region. Both detailed and comprehensive, *International Relations in Contemporary Africa* represents a significant contribution to African studies that appeal to those with an interest in the foreign policy of smaller states.

Harvey Starr: Pioneer in the Study of Conflict Processes and International Relations Harvey Starr, 2021-09-11 This book sets out through Starr's personal story his interest in how the ideas of intellectual trajectories and political memories could be incorporated into intellectual autobiography, thus exploring how the personal lives of individual academics intersected with their professional interests. By following the development of his approach to research, interdisciplinarity, the logic of inquiry, and the opportunity and willingness

framework scholars and researchers will see how his groundbreaking research in Conflict Processes and International Relations Theory developed and were interlinked especially diffusion geography and spatiality the democratic peace and integration decision making In addition graduate students and junior faculty should find useful hints about how to navigate their way through the complexities of becoming both a professional and successful academic and scholar This book provides the most complete treatment of the work and contributions of Harvey Starr a former President of the International Studies Association Important for contemporary students of international relations and their understanding of IR theory and methods Demonstrates an eclectic linking of theoretical logical and empirical approaches to the study of IR providing a critical logic of inquiry to do research Provides insights and blueprints for how to develop interdisciplinary and multidisciplinary scholarship highlighting geography and social psychology Affords graduate students and recent Ph D s guidance in the development of research becoming a professional and the choices to be made in one s academic career *The Power of Power Politics* John A. Vasquez,1998 In this new and much expanded edition of his classic study John Vasquez examines the power of the power politics perspective to dominate inquiry and evaluates its ability to provide accurate explanations of the fundamental forces underlying world politics **Once and Future Partners** William C. Potter,Sarah Bidgood,2018-10-09 Despite their Cold War rivalry the United States and the Soviet Union frequently engaged in joint efforts to prevent the spread of nuclear weapons Leaders in Washington and Moscow recognized that nuclear proliferation would serve neither country s interests even when they did not see eye to eye in many other areas They likewise understood why collaboration in mitigating this nuclear danger would serve both their own interests and those of the international community This volume examines seven little known examples of US Soviet cooperation for non proliferation including preventing South Africa from conducting a nuclear test developing international safeguards and export control guidelines and negotiating a draft convention banning radiological weapons It uses declassified and recently digitized archival material to explore in depth the motivations for and modalities for cooperation under often adverse political circumstances Given the current disintegration of Russian and US relations including in the nuclear sphere this history is especially worthy of review Accordingly the volume s final chapter is devoted to discussing how non proliferation lessons from the past can be applied today in areas most in need of US Russian cooperation **The Struggle for European Union by Political Parties and Pressure Groups in Western European Countries 1945-1950** Walter Lipgens,Wilfried Loth,2019-11-05 No detailed description available for The Struggle for European Union by Political Parties and Pressure Groups in Western European Countries 1945 1950 *Linkage Politics In The Middle East* Yaacov Bar-siman-tov,2019-03-04 Traditional studies of linkage politics tend to assume that internal political instability leads a government to divert attention from internal problems by initiating an external conflict or stressing the pressures of international problems In contrast quantitative studies typically conclude that there is little or no relationship between interna **Crisis And Change In World Politics** Michael Brecher,2019-04-24 This book is an effort to overcome

the major obstacle to a creative system orientation in world politics a dearth of knowledge about system level change It involves the study of international crisis and its role in change
