Vientiane Marc Askew, Colin Long, William Logan, 2006-12-07 Providing insights into this neglected Southeast Asian city this interesting book interprets Vientiane's landscape physical as well as imagined as a reflection of key aspects of Lao geo political history the nature of Lao urbanism and its critical relation to constructions of Lao identity in the contemporary period It is argued that the patterns of change seen through Vientiane's past embody the key political and economic processes and transformations impacting on the people of Laos The Lao urban past has rarely been an object of attention by scholars Laos in fact is continually portrayed as a rural backwater marginal to the dynamic trends affecting most of the Southeast Asian mainland In contrast to these persistent and static portrayals of Laos as a tiny landlocked backwater with no significant urban present or past the authors aim to document explain and evaluate the significance of the Lao urban landscape Focusing on the theme of Vientiane's marginality in its various forms the book interprets this apparent marginality as an historically produced phenomenon resulting from geo politics dating from the pre colonial period and extending into the post colonial period Drawing on a wide range of research materials Vientiane is the first work of its kind on this ignored city
