B McGraw, 2023-08-31 Et al is a satirical academic journal that uses machine learning and scientific principles on absurd studies from the cat Lord Whiskers role in the extinction of the dodo bird to the quantum mysteries of untidy toddler rooms Key Features Conducts satirical research on topics ranging from quantum computing to clingy robot dog algorithms Answers questions like Can a computer understand a Scotsman and Is Sarah Palin real Secures the power grid and your home from the prying eyes of government drones a k a birds Expands science by studying cow based atmospheres and the flavortown center of the brain Solves climate change and saves the world by proposing a banana based fission reactor Nullifies the possibility of getting lost at the fair with a mirror house escape algorithm Book Description Tired of the same old math science statistics and programming memes people post online and want something a little more elaborate This is the book for you Tremble as we make up all our own facts and data hand draw diagrams in MS Paint and quote from fictional studies and journals Cower as authors write in the first person because their study is just a little too personal for them Recoil from the sheer mass of oversimplified methodology distilling someone s entire thesis into a paragraph of jokes crude enough to make it into a Mike Myers movie Over the last few years we have taken arguments that you would normally have after four Jack and cokes at game night and turned them into properly formatted research papers

with a writing tone serious enough to confuse the uninitiated These papers are high effort jokes by researchers and scientists for researchers and scientists They cover a range of topics such as the consequences of re releasing tourists back into Yellowstone National Park after COVID 19 how to play StarCraft competitively online on a quantum computer and most importantly how trees around the globe are becoming increasingly radicalized What you will learn How to draw a graph using MS Paint maybe Whether Sarah Palin is a figment of your imagination How one pirate cat brought about the extinction of the beloved dodo Why rabbits used to be jerks back in the day If you actually learn anything from these articles get your memory erased immediately Who this book is for This book is for researchers and those who love science mingled with humor It s for those who are a little too tired of the talking heads and futurists of the science world and would like something more entertaining in the form of absurd speculative studies by researchers as unbelievable as their work Anyone who has experienced academic writing or the tribulations of any research institution will enjoy the wide range of bizarre yet real world topics compiled in this book Even if you don t know much about the subject we usually have a background section
