The Service Edge is required reading for every executive and manager interested in reaping the benefits of customer care and in getting one up on the competition. The Service Edge Ron Zemke, 1991-09-01 **Managing Innovation and Change** David Mayle, 2006-09-18 Building on the success of the Second Edition with 19 new chapters *Managing Innovation and Change* showcases the best work of thinkers writing in this area and provides a coherent picture of key ideas and concepts to have emerged from this exciting field. Frequently radical and intentionally provocative in terms of topic and treatment, the book covers the increasing diversity of pressures to which modern enterprises are subjected, reviews some of the more persistent acronyms to which the art of management is increasingly prone, examines the nature of innovation, looks at the broader issues surrounding change, and turns to those attributes of leadership which are consistent with the successful management of innovation and change. Handbook of Service Science Paul P. Maglio, Cheryl A. Kieliszewski, James C. Spohrer, 2010-06-14 As the service sector expands into the global economy, a new science of service is emerging, one that is dedicated to encouraging service innovation by applying scientific understanding, engineering discipline, and management practice to designing, improving, and scaling service systems. *Handbook of Service Science* takes the first major steps to clarifying the definition, role, and future of this nascent field. Incorporating work by scholars from across the spectrum of service research, the volume presents multidisciplinary perspectives on the nature and theory of service, on current research and practice in design, operations, delivery, and innovation of service, and on future opportunities and potential of service research. *Handbook of Service Science* provides a comprehensive reference suitable for a wide-reaching audience, including researchers, practitioners, managers, and students who aspire to learn about or to create a deeper scientific foundation for service design and engineering, service experience and marketing, and service management and innovation.
